DESOUTTER

THE WORLD'S LARGEST MANUFACTURERS OF LIGHT METAL LIMBS

The factory at Hendon, illustrated above, covers a floor space of nearly 20,000 square feet and employs over 260 men. . . . It is the most expensive plant ever built for the manufacture of light metal limbs. . . . Nevertheless under our special hospital scheme Desoutter Light Metal Limbs – acknowledged as surgically and mechanically the best artificial limbs in the world – can be obtained even by very poor patients. . . . We cordially invite inquiries from Surgeons and Hospitals. . . . Please address them to Desoutter Brothers Limited, 73 Baker Street, London, W.1. Desoutter limbs are 100% British.

The Desoutter Light Metal Limb illustrated here is for an above-knee amputation. The shin is made of one piece, solid-drawn from the flat sheet and finished to shape by a new machine of Desoutter design and construction. It is the strongest and lightest shin ever produced.

The Desoutter Cushion Joint Foot and Ankle – the biggest practical advance in the science of Prosthesis since the introduction of the Light Metal Limb by the Desoutter organisation in 1913 – is now supplied on all Desoutter limbs.

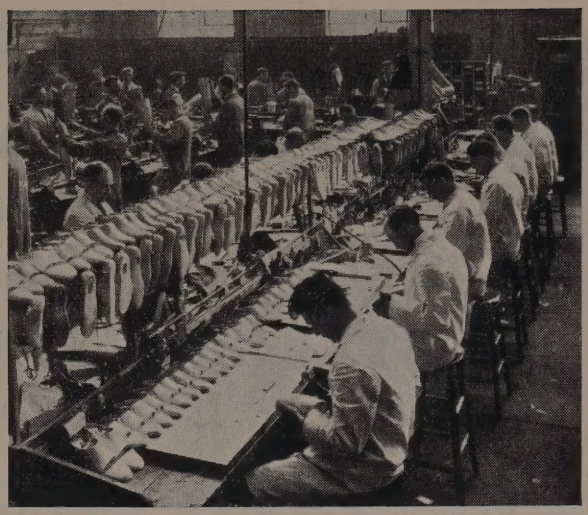
Note the movement allowed by the patent double swivel pelvic band vital for the comfort of the wearer, as it relieves all outward and twisting strains on the pelvic band when walking.

Over 30,000 Desoutter limbs are in use. They were adopted by the Ministry of Pensions upon the unanimous recommendation of a Committee of Enquiry comprising the leading Orthopædic Surgeons in Great Britain.

Branches in all the principal towns of the British Isles.

THE WORLD'S BEST AVAILABLE FOR ALL

C

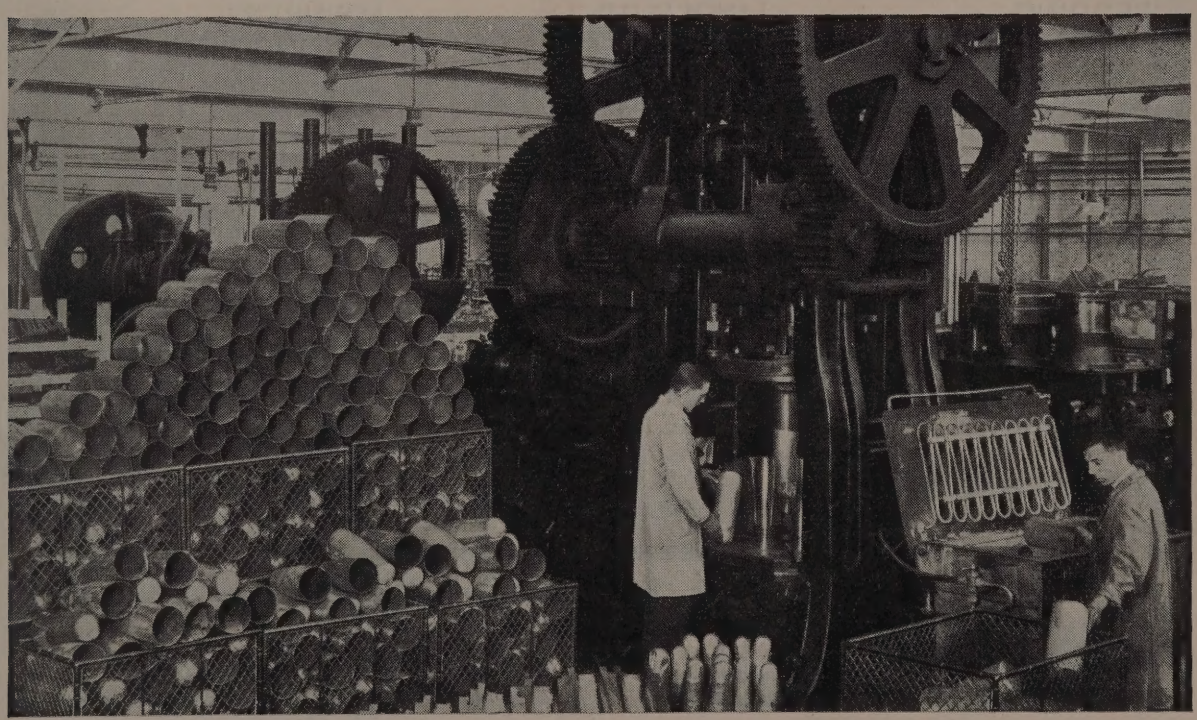


DESOUTTER

METHODS OF PRODUCTION ARE MODERN AND SCIENTIFIC

Illustrated above are two departments of the limb finishing section of the factory. Left – careful inspection and individual attention given to each limb, and right – part of the daily production of the Desoutter Cushion Joint Foot. . . . The machine illustrated below was specially designed for the production of the famous Desoutter one-piece shins and thighs. . . . It is 18 feet high and weighs over 40 tons. It has a stroke of 3 feet, exerts a pressure of 1000 tons and was installed at a cost of £5000.

Desoutter limbs are 100% British.



Contractors to the Hospitals, Mental Hospitals, Sanatoria, Etc.

Health Aspects of Vita-Weat

AND SOME INDICATIONS OF ITS USE IN HOSPITALS

In cases of diet regime a readily acceptable and beneficial alternative to ordinary soft bread will be found in Vita-Weat—the Whole-Wheat British crispbread.

For Diabetic Diet.

Vita-Weat is palatable and nourishing and provides a good vehicle for butter. It also serves as a corrective to intestinal inertia.

ANALYSIS.

Carbohydrates	Avg. 6	grms.	per	section.
Protein	,, ·98	,,	,,	,,
Fat	,, ·65	,,	,,	,,
Calorie Value	,, 37	calories	,,	,,
Number per lb.	,, 53			

To Prevent Obesity.

The starch grains in Vita-Weat are thoroughly disintegrated. No starch passes unconverted into the body to cause Obesity and Indigestion.

To Counteract Constipation.

The presence of the natural proportion of Wheat Bran in Vita-Weat in a suitable physical condition coupled with its Vitamin B content, provides a natural stimulant to peristaltic action of the intestines. When forming a suitable proportion of the daily diet Vita-Weat effectively counteracts constipation.

To Assist Dental Hygiene.

Its crispness encourages mastication and so promotes a healthy condition of the teeth and gums and a full development of the jaw bones by providing them with proper exercise.

"CLENSOL"

The Perfect Scale Remover

▣ ▣ ▣

HAS BEEN PROVED THE BEST METHOD OF REMOVING SCALE AND DEPOSIT

By the "Clensol" method water jackets, calorifiers, heaters, hot and cold water pipes, drainage systems, and lavatories can be freed from scale and deposit in a few hours without dismantling. Simply drain the water from the plant or pipe line, fill with "Clensol" solution, allow to remain for about 12 hours, then drain off and flush through with water.

▣ ▣ ▣

Used by Leading Hospitals in various parts of the country.

All work carried out under a guarantee.

▣ ▣ ▣

Samples and Catalogues supplied by Sole Manufacturers:

NOVOCAIN

The Original Preparation
English Trade Mark No. 276477 (1905)

The Safest and most Reliable Local Anaesthetic for all Surgical Cases.

THE OLDEST AND STILL THE BEST.

Ample supplies of Novocain are available for the use of Surgeons at all the chief Hospitals. Specify " Novocain " for your next operation

Does not contain Cocaine, and does not come under the Dangerous Drugs Act.

There are many reasons why " Novocain " should be used, as, apart from the fact that it obviates the need of employing antiseptics—

" Novocain " is always chosen because it is

Non-Toxic.
Non-Habit-Forming.
Easily Soluble.
Can be Sterilized by Boiling.
Does not Irritate the Tissues.
Is Compatible with Adrenaline.
Does not cause Shock or Cardiac Failure.

4 Hospital Needs

These are four essential Hospital Accessories

labour-saving, hygienic, economical and health promoting. At left is shown the **ELECTROLUX CLEANING SYSTEM** which cleans everything swiftly and quietly. At the same time it even purifies the air, ridding it of dust and germs.

The University College Hospital recently purchased 25 Electrolux Cleaning Equipments.

ELECTROLUX WATER SOFTENER

Soft water is not only beneficial to health, but saves money on soap, soda, tea, coffee and other commodities.

ELECTROLUX FLOOR POLISHER

imparts a high gloss to parquet, boards and lino, without exertion and uses less polish.

THE ELECTROLUX *SILENT* AUTOMATIC REFRIGERATOR

should be in every hospital and nursing home. There is a complete range of models, which operate on gas, electricity or paraffin.

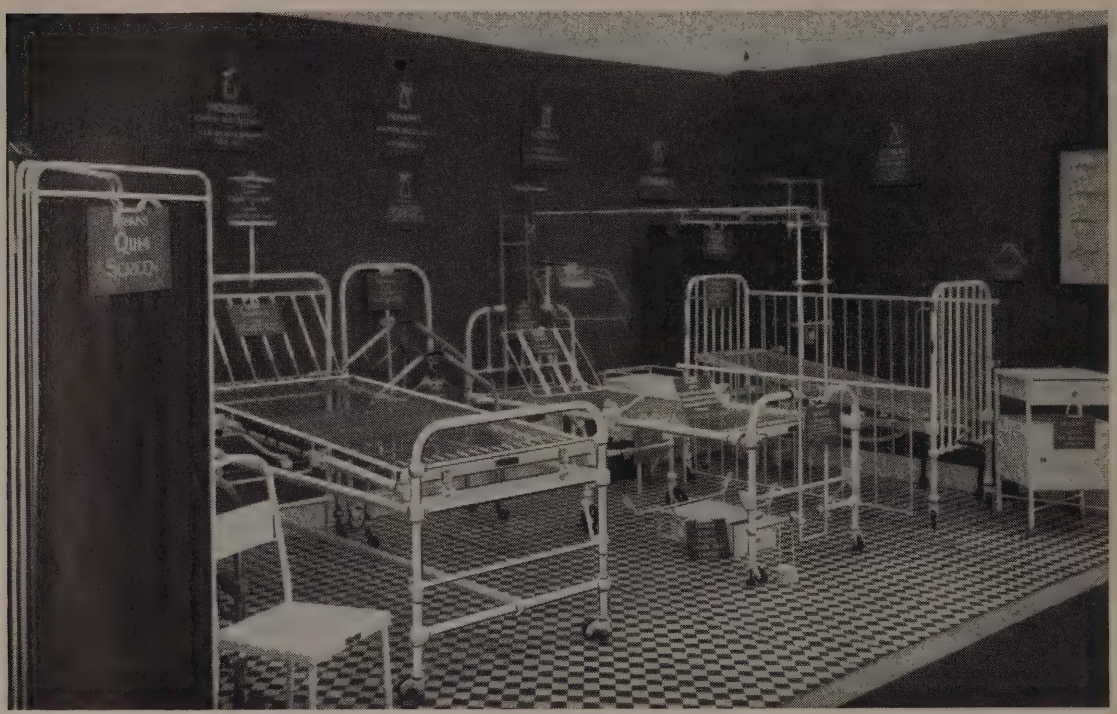
THE HOSPITALS YEAR-BOOK
1932

Inseparable from the name of hospital-beds and equipment ..is the name

IF it's Hospital Beds or Equipment it's Hoskins—that briefly but very truly epitomises the verdict of buyers throughout the World. Eighty-three years of close co-operation between our experimental department and medical men have proved the value of the Services we render, and we cordially invite you to seek our co-operation in your next requirements.

Hospital Bedsteads and equipment of every type; Steel and Wood Bedside Lockers; Trolleys; Steel Furniture; Metal Window Frames; Hoskins' Castors with the patent High-Pressure Lubrication—in fact everything for the comfort and convenience of Hospital equipment.



Photograph at the British Medical Association Exhibition, Eastbourne, July 1931

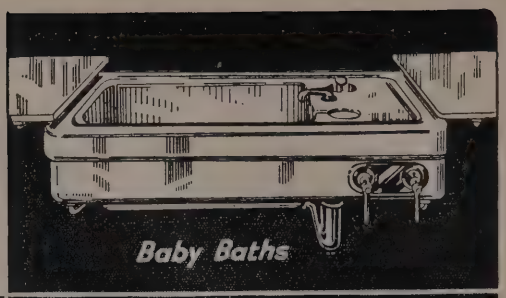
For the special needs of HOSPITALS



HYGIENE, a prime consideration in Hospital management, depends upon trouble-free sanitation.

As a result of intensive research and development, Dent & Hellyer Ld. have perfected a comprehensive range of fittings calculated to meet all general requirements of Hospitals and Institutions. Where desired, however, stock patterns usually can be adapted to accord with individual needs.

With over 200 years of experience in progressive plumbing, coupled with a wide knowledge gained on many Hospital contracts in London and the Provinces, Dent & Hellyer Ld. are in a position to advise upon and undertake any specialised sanitary work.

An interesting Catalogue of Hospital Equipment will gladly be sent upon request.

THE GOLDEN SQUARE

Ear, Nose & Throat Hospital

is successfully cooking for over
100 patients and staff on only three

AGA COOKERS

These Aga Cookers were installed in place of gas-ranges for two main reasons (1) ECONOMY. The guaranteed annual fuel consumption of an Aga Cooker is only 25 cwt. of coke or anthracite at a maximum cost of £4 a year. (2) MODERNITY. The Aga Cooker is more labour-saving than gas and as clean as electricity.

The Aga Cooker, British Made and Insulated throughout with Bell's Asbestos, provides every oven and hot-plate temperature modern cooking requires: need be refilled only once and riddled only twice every 24 hours: is simple and absolutely safe to use: is exceptionally easy to keep clean and there is nothing whatever to go wrong. The Aga was invented by a Nobel Prize Winner.

Other Hospitals who have effected enormous savings in their kitchen fuel bill by installing Aga Cookers include:—

THE EDENBRIDGE COTTAGE HOSPITAL
THE PETERSFIELD COTTAGE HOSPITAL
THE CRIPPLES' HOSPITAL, STOKE-ON-TRENT
GRAYLINGWELL MENTAL HOSPITAL, CHICHESTER

THESE THREE **AGA COOKERS** ARE COOKING FOR OVER **100** PEOPLE AT A TOTAL ANNUAL FUEL COST OF LESS THAN **£12**

For fully illustrated booklet and particulars and details of Terms and Installation, please write to the Hospital Dept., BELL'S HEAT APPLIANCES LTD., Bestobell Works, Slough, Bucks. *Telephone Slough* 830.

ORDER OF ST. JOHN AND BRITISH RED CROSS SOCIETY

An Efficient Specialist Mobile X-Ray Unit under Expert Radiological Supervision.

THE HOME SERVICE AMBULANCE COMMITTEE have recently added a

New High-powered Mobile X-ray Unit

to their existing Radiographic Service.

The Object of the Service is to provide a Higher Standard of Radiographic Examination than has hitherto been possible with ordinary portable methods, in the case of the patient whom it is dangerous—or inadvisable—to move from bed for the purpose of an X-ray examination at the local hospital or Radiologist's consulting rooms.

The Service covers London, the home counties and the provinces.

Many small hospitals, whose finances do not permit of the installation of satisfactory apparatus, prefer to take advantage of this Specialist Service.

The Unit, which is a model of completeness, is entirely self-contained; the body of the car functioning as a developing and viewing room. The car is a fast six-cylinder type, developing, when stationary, 100 milli-amperes at 95,000 volts for X-ray purposes. **It is possible, for instance, to take a radiogram of a chest in one-twentieth of a second at 48″, at which distance very little distortion is noticeable.**

Every radiogram is submitted to a Consultant Radiologist, whose report, together with the film, is forwarded to the physician or surgeon in charge of the case.

FOREWORD

By the Hon. Sir ARTHUR STANLEY, G.B.E., C.B., M.V.O.

President of The British Hospitals Association and Chairman of the Joint Council of the Order of St. John and the British Red Cross Society.

THIS is the second issue of " The Hospitals Year-Book " which, as I explained last year, is intended to incorporate statistics of all organisations concerned with the institutional treatment of the sick in Great Britain and Ireland and at the same time to provide a Directory giving those items of information that have been found, by experience, to be most generally useful.

For reasons of economy it has been decided to publish the directory every other year only as the alterations in this part are necessarily very small. This permits of interesting surveys of various phases of Hospital work and statistics written by recognised authorities.

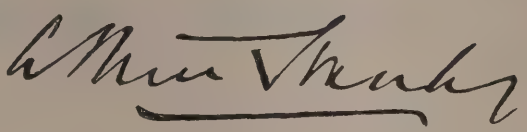
Special mention should be made of the article by Sir Charles Harris, late permanent Head of the Financial Department of the War Office, whom the Central Bureau of Hospital Information has been fortunate in securing as Financial Adviser. A financial review, written by such an eminent authority, in itself alone must recommend the book to all who are interested in Hospital finance.

I have no place in a short Foreword such as this to dwell even in the briefest way upon the many points of interest raised in this Report, but I ask all who read it to study with particular attention the " General survey of the work and finances of the Voluntary Hospitals," from which they will learn :—

1. That at the end of 1930 the Hospitals had a surplus income over expenditure for the year of nearly £750,000.
2. That the growth of accommodation amounting to no less than 1,500 beds per annum is in addition to a large expenditure on new Nurses' Homes, Out-patient Departments, Special Departments, etc., of which a list is attached to the Report.
3. That the Hospitals have derived little benefit from the Road Traffic Act, 1930.

With regard to No. 1, it must be remembered that this surplus is not evenly divided among all the Hospitals, and that some are still in dire need; and with regard to No. 3, it is possible that the Hospitals themselves are to blame for not making full use of the Act. I hope that it may be found possible to set up a Legal Department of the Central Bureau, which will prove of great service to Hospitals in this connection by giving free legal advice, and by assisting individual Hospitals in following up claims for payment which many of them now find it difficult to do.

The success of the first issue of " The Hospitals Year-Book " has shown that it meets a real need in the Hospital world, and I recommend this second issue to the careful study of all engaged in Hospital administration.



May, 1932.

EXPLANATORY NOTES

Object of Survey.

THE object of this Survey is the presentation in as full detail as possible of the position of the Hospitals in Great Britain and Ireland with reference to certain special features which may be summarised thus :—

(*a*) The facilities available for treatment,

(*b*) The extent to which they are utilised,

(*c*) The annual cost of maintaining these facilities, and

(*d*) The sources and extent of the funds by which they are maintained.

Arrangement of Tables.

In the main tables the Voluntary Hospitals are grouped under the headings :—

Group A. Hospitals having **100 or more beds.**
Group B. Hospitals having **30 to 99 beds.**
Group C. Hospitals having **less than 30 beds.**

In addition, Tables of the details of the work and finances of the following special groups are given :—

General Hospitals associated **with Medical Schools.**
" " **without Medical Schools** containing **200 or more** available beds.
" " " " " " **150 to 199** " "
" " " " " " **125 to 149** " "
" " " " " " **100 to 124** " "
" " " " " " **30 to 99** " "
" " " " " " **Less than 30** " "
Children's Hospitals.
Ear, Nose and Throat Hospitals.
Eye Hospitals.
Women's Hospitals.
Maternity Hospitals, etc., etc.

Adjustments to figures.

An attempt has been made to present the figures of all hospitals upon the basis of the Revised Uniform System of Hospital Accounts. Slight divergences from the figures published in the Annual Reports of a few hospitals will consequently be found.

The figures in the Tables giving particulars of the groups of hospitals, e.g. Table 16, include the returns made by a few hospitals covering a period longer than 12 months. This is generally due to some such cause as the changing of the date of the termination of the official year. The figures for these odd periods are omitted from the Tables giving particulars of individual hospitals. It follows, therefore, that a comparatively small difference between the totals in two sets of Tables will be found.

Omission of information in certain tables.

There are certain difficulties yet to be overcome before the editors can obtain information, either in sufficient detail or upon the same basis, to allow of its inclusion with regard to each of the four sections into which the Statistical Tables are divided, viz., London, Provinces, Scotland and Ireland.

Definition of London area.

For the purposes of the Statistical Tables, London is regarded as the area covered by King Edward's Hospital Fund for London, viz., 11 miles from St. Paul's Cathedral. This area includes portions of the counties of Essex, Hertfordshire, Kent, Middlesex and Surrey in addition to the whole of the County of London.

"Available" beds of London hospitals.

The figures of "available" beds of the London hospitals are the average daily bed complement during the year *after deducting beds temporarily closed* for Rebuilding, Extensions, Repairs, or other causes.

King Edward's Hospital Fund for London.

The Editors desire to express their thanks to King Edward's Hospital Fund for London for the leave, so kindly granted, to use the figures in its Statistical Report on the London hospitals for the purpose of compiling the Tables which appear in the Year-Book.

STATISTICAL TABLES 17–169

FINANCIAL REVIEW

By SIR CHARLES HARRIS, G.B.E., K.C.B.

(late Permanent Head of the Finance Department, War Office)
Hon. Financial Consultant to the Central Bureau of Hospital Information.

Of all the figures in this book, one may strike a reviewer at the outset as perhaps the most remarkable—that of the year (1930) to which the statistics relate. They make their appearance when everyone interested in hospitals would naturally be looking forward to the appearance of those for 1931, more especially at a time when there are few concerns anywhere whose financial position and immediate future are free from all anxiety. The objects of publishing the Year-Book are not so much to produce that full and final record without which no good official regards any subject as properly closed, as to help each hospital administrator to bring to bear on the future the lessons of the past, profiting by the experience of others engaged in the same tasks; to enable the donors, to whom the voluntary system looks, to see the progress and judge of the necessities of the hospitals, and to furnish evidence that their money is being applied to good purpose in a business-like way—and accounts two years in arrear are "not business." The Central Bureau of Hospital Information is to be congratulated on its excellent start with the Year-Book, and the date of publication this second year improves on the first, but there is still much leeway to make up, calling for good team-work by all the hospitals concerned; for the speed of a squadron is that of its slowest ship, large or small. It is understood that of the accounts of 821 hospitals outside the scope of King Edward's Hospital Fund for London, furnished direct to the Bureau, only some 40 per cent. came in within 6 months, a further 30 per cent. in July, 6 per cent. in the holiday months, 14 per cent. in October, and the last 10 per cent. straggled in by the 14th December. Though the very latest came from Cottage Hospitals, several large accounts were delayed till November. The date assigned by the King's Fund for completion of the annual accounts of its hospitals is 31st March, and long experience of somewhat similar tasks convinces me that there is nothing unreasonable in that date, though it also leads me to appreciate the effort now required to pull up the arrears, as well as the relief that will be felt when the incubus of the old account has been once for all thrown off, and the all-round improvement of tone and efficiency that will follow. A further problem in the same sphere confronting the Bureau is the still imperfect standardisation of the records and accounts. A glance at Tables 12 and 31 shows that of the full number of 969 hospitals the book covers, no less than 85 failed to give a full analysis of their expenditure, and there are in the tables other instances of figures not being available. Even when the records are complete and the form of the statistics is identical throughout, there will still be danger that the actual classification of items under the prescribed heads, and the meaning assigned by different hospitals to the same expression, may differ. It is satisfactory that such differences are believed to have been rectified "for all practical purposes" in this book; but such rectification at the centre involves correspondence and further delay in publication.

The result of delays, on the present scale, is that the experience of 1930 could not be brought to bear on 1931, while any attempt to bring it to bear on 1932 is paralysed in advance by the fact that it is already out of date and the uncertainty whether that of 1931 confirms or contradicts it. It may nevertheless be worth while to sketch in the background against which the results of the year must be viewed—the general condition of our finances, public and private, in that year. It was the first throughout which we felt the effects of the world-slump which began in 1929, and evidences of failing prosperity grew steadily worse. The volume of business of all kinds, profits, incomes generally and prices, fell heavily, while nothing rose but direct taxation, government expenditure and unemployment. In such conditions it might have been expected that hospitals would find difficulty in maintaining income, but would get some relief in the shape of reduced expenses. In fact, the figures show surprisingly little evidence of either; supporters never faltered, while on the other hand the mysterious law which makes expenditure in all public institutions respond very sluggishly to falling prices did not fail to assert itself. Both income and expenditure, for maintenance as for capital, increased in total over 1929; and the net surplus of income over expenditure fell by only some 6 per cent. This result, seen against such a background, forms a very remarkable tribute to the soundness and vitality of the voluntary system and its strong hold on the affections of the public.

Not, indeed, that in the light of the progressive further deterioration of the whole national position

since 1930, there were no danger signals. More hospitals had deficits on their maintenance accounts than in 1929, in each of the four areas (London, Provinces, Scotland, Ireland). In the Provinces and Scotland, taken together, the net surplus of total receipts over total expenditure fell from £1,414,000 in 1928 to £764,000 in 1929 and £477,000 in 1930 (Table 38). [The Year-Books contain no figures for London or Ireland before 1929; and the London figures are separately reviewed in the publications of the King's Fund, while the number of hospitals covered by the Irish figures is not yet steady enough for valid comparisons.] As available beds in both areas rose in the two years by nearly 12 per cent., it is clear that if things go on in the same way, a budget difficulty must arise. Of the two ways of balancing a budget, collecting increased income is more attractive than curtailing expenditure; but with the subscribing public in process of rapid impoverishment, the latter method may have to be adopted as the only alternative to closing beds; and there are indications in the statistics that very appreciable economies might be found possible.

For instance, of the four principal items of maintenance expenditure (Table 31): Provisions, Surgery and Dispensary, Domestic, Salaries and Wages, the first three should show some relation to the general price-levels of commodities, wholesale and retail, though the fourth follows a law of its own. The first, in particular, might be expected to follow fairly closely the separate price-index for Food and (if the buying is efficient) that for wholesale rather than for retail prices. Between 1926 and 1930, the year's average index for commodities in general fell from 89 to 72 wholesale, and from 98 to 90 retail; while for food alone the fall was from 93 to 76 wholesale and from 96 to 84 retail; and of the whole fall in food, two-thirds or more took place between 1929 and 1930. Taking the annual expenditure on the first three items, per available bed, the statistics show in the Provinces a fall from £68·4 in 1926 to £67·6 in 1929 and £67·3 in 1930, and in Scotland from £64·5 to £59 in 1929 and a rise to £60·7 in 1930. For provisions alone the corresponding figures are: Provinces, £27·1, £26·5 and £26; Scotland, £26·9, £25·6 and £25. In London, the first three items rose from £104·2 in 1929 to £104·8 in 1930, while provisions alone fell from £37 to £36·2. In no area was there any adequate reflection of the great fall in 1929–30. The striking differences given in the General Survey (p. 11) between the highest and lowest figures for 1930 expenditure under the principal items in the most important hospitals in different areas, which can easily be paralleled from the minor hospitals, strengthen the impression made by the above figures.

But let no one suppose that these variations reflect, wholly or mainly, degrees of administrative efficiency in the several hospitals; or that what is wanted is a central authority with a "yard-stick" and power to say: "The administrator of St. Crispin's is spending too much on this and that: off with his head." The General Survey indicates a variety of causes which may produce such differences; and there are some inherent in the statistics themselves. Thus, the expenditure in Table 31, though reduced to a figure "per available bed," is stated in the General Survey (p. 10) to cover the cost of out-patient work; and that this may be important, even under Provisions, is shown by the extreme case of a London maternity hospital (Table 48) which returns each "out-patient attendance" as costing 8*s.* 2*d.* including 1*s.* 10*d.* for provisions—a good example of wide difference in meaning concealed under the same name for the service given by different hospitals. Again, the cost of provisions per occupied bed, in Tables 45 and 46, includes the food of all hospital personnel fed on the premises engaged in the treatment of in-patients, as well as of patients; and this may affect comparisons appreciably, as the proportion of fed staffs to patients may vary widely. The growth of special beds for patients of the paying class may also affect the figures for some hospitals. Finally, it appears that "beds available" or "beds occupied," or both, may have an esoteric meaning, for the percentage of available beds occupied (Table 7) rises in some cases, especially in Scotland, to well over 100 per cent. and this is understood to be due not to any system of lightning change of patients in the wards, but to differences in the way of treating "extra" beds in the statistics. It is evident that the existence of this factor, to an undisclosed extent, in any hospital, imports a fundamental uncertainty into the whole of the statistics into which "beds" enter. In short, the differences exhibited in the tables between different hospitals do not do more than call attention to points at which the further investigation necessary to make the meaning of the figures clear may or may not finally disclose an element of success in administration as part cause. But the whole statistical system will fail to give its proper return, if there is mere acceptance of the conclusion that differences are inevitable, instead of such improvements of the system as will lead to comparisons that are fruitful. Such steps as the separation of patients' food from that of the staffs, and the adoption in certain tables of some such combined unit of work as that used in the Statistical Review (1930) of the King's Fund (based on

2,000 out-patient attendances = 1 occupied bed) readily present themselves for consideration. Of another kind are such steps as those recommended ten years ago by Lord Cave's Committee for co-ordinated buying by groups of hospitals, perhaps on such lines as have been found to work well and economically by the contract departments of the three Fighting Services, towards which no appreciable advance seems yet to have been made. Taking into consideration these and other paths awaiting exploration, with the all-important fact that the price-fall continued throughout 1931, there is good reason to hope that the expenditure figures in all areas will show in the immediate future substantial reductions.

As regards income, there is not much to add to the points brought out in the General Survey, which shows in the Provinces a growth per bed of "earned income" (receipts from patients and public services) to set against a shrinkage of "unearned income" (voluntary gifts, interest on investments and free legacies), while in Scotland there is growth under the last two items also. Such earned income has become a necessity for expansion and technical progress of the hospitals; but it is still true that unearned income is the life-blood of the voluntary system, the key to its independence and its strength, and danger arises to the system from the possibility of failure of such income at the present time, when new relations between the voluntary hospitals and the county or municipal institutions are coming up for consideration. It is especially important to get new subscribers, both to meet the continuous increase of beds and to make good the death-vacancies among the old subscribers. While the habit of subscription, once formed, may continue for life, it is not generally formed early in life. There are no statistics to show how long the average subscriber remains on the list, but putting it (at a pure guess) as high as 20 years, new names are wanted every year at the rate of 5 per cent. for casualties in addition to 5 per cent for expansion, or 10 per cent. in all of a constantly growing total—no light task, but not an excessive price to pay for freedom from State or Municipal interference.

Coming to the maintenance accounts, the aggregate net surplus of income over expenditure in the last three years shows in the Provinces a continuous decline from £806,000 in 1928 to £638,000 in 1929 and £507,000 in 1930; while in Scotland, though (as already stated) deficits were more numerous in 1930 than in 1929, the net surplus rose continuously from £148,000 to £211,000 and £276,000, owing to the remarkable growth of free legacies (£216,000, £276,000, and £364,000). In the Provinces, expenditure in 1930 grew by 10 per cent., or faster than either beds (9 per cent.) or income (7 per cent.), while in Scotland expenditure grew by only 4 per cent. and income by 9 per cent., though beds stood practically still. It appears from Tables 17–20 and 45–46 that in all areas and groups, where figures for individual general hospitals are available both for the deficit on maintenance per occupied bed and the weekly cost per patient, a large deficit is likely to be coupled with a high weekly cost, though not *vice versa*; suggesting that large deficits are caused not so much by failure to collect a normal income in proportion to the hospital's size and class, as by an abnormally high rate of expenditure, to whatever causes the latter may be attributable. But the weekly cost includes the expenditure on "finance," largely the cost of collecting income, and there are instances that suggest a possibility that intensive collection of income may be a cause as well as a counterweight of high expenditure.

As regards the tables generally, the reduction of the years they cover from five to two, in this the second year of a fresh start, has definite advantages. But in reviewing the figures, I have found many occasions to refer back to earlier years, because comparison of two years must leave it in doubt whether a particular variation is anything more than casual, while three years may begin to establish a definite trend. If, therefore, it should be found practicable in the next issue to give three years' figures, I believe many students of the Year-Book would welcome the extension.

The new source of hospital income (recoveries in motor accident cases) initiated by the Road Traffic Act, referred to in the General Survey, did not affect the accounts of 1930 and its financial results will be more properly dealt with in a later year; but it is clear that, as things stand, this heavy burden on the hospitals will be but slightly relieved. The question remains intimately bound up with that of the status of the pedestrian on our roads which, as Sir Alexander Butterworth's paper (p. 173) shows, remains *de facto* on a basis which might have been appropriate if the roads had been originally tracks through primeval forests, made for their own use by herds of mammoths, fairly entitled to brush aside any intrusion upon them by the quadrumanous ancestors of the pedestrian, whose proper lines of communications lay through the tree-tops overhead.

C. Harris.

GENERAL SURVEY OF THE WORK AND FINANCES OF THE VOLUNTARY HOSPITALS IN GREAT BRITAIN AND IRELAND FOR THE YEAR 1930.

THE first volume of the " Hospitals Year-Book " was published early in August 1931. It contained two sections, one devoted to statistics of work and finance, the other, a directory of hospitals and allied institutions. This, the second volume, contains the statistical portion only; it having been considered unnecessary to issue a directory portion more often than once every two years. Efforts have also been directed to a further reduction in the bulk of the book : the tables now cover a period of two years only, instead of five years as formerly. A certain amount of compression has also been effected by including in one table the figures relating to the hospitals in London, the Provinces, Scotland, and Ireland, instead of in separate tables as formerly.

The Editorial Board, to their regret and chiefly for reasons of time and cost, were obliged to omit from the first volume a comprehensive index. This omission has now been made good.

I. SCOPE OF THE SURVEY.

Ten special hospitals—(chiefly Orthopædic) containing 1,569 beds—have been included in the survey. These hospitals were omitted from former surveys owing to the fact that they are mainly supported by payments made by Public Authorities. As the source of support is becoming less and less a characteristic upon which to classify hospitals, it has been found impossible to justify their exclusion from the survey any longer. The figures of income and expenditure of all the hospitals in the survey have been adjusted, so far as the data available allow, to the basis of the Revised Uniform System of Hospital Accounts, and it is believed that an accuracy approximate enough for all practical purposes has been attained.

The survey covers 95·56 per cent. of the total number of Voluntary Hospitals in the British Isles and 96·85 per cent. of their beds. Whether it will ever be possible to reach the 100 per cent. or not remains to be seen; the important point is that each year the survey covers the field of the 1,000 independent institutions more and more completely. It is particularly pleasing that 45 out of the 58 Irish hospitals now send in details of their work and finance.

	Total Voluntary Hospital Accommodation.		Reviewed in the Year-Book.			
	No. of Hospitals.	No. of available beds.	No. of Hospitals.	Percentage of total.	No. of available beds.	Percentage of total.
London	149	16,132	148	99·33%	16,012	99·26%
Provinces	696	46,355	676	97·13%	45,974	99·18%
Scotland	111	9,100	100	90·09%	8,874	97·52%
Ireland	58	5,468	45	77·59%	3,769	68·93%
Total	1,014	77,055	969	95·56%	75,629	96·85%

II. FINANCE.

Voluntary Hospital Finance for the year 1930 may be summarised thus :—

Received	Spent	Surplus	
£15,612,750	£14,870,402	£742,348	*Table 38.*

The above figures include Income and Expenditure on Capital Account in addition to that on Maintenance Account.

Income and Expenditure on Maintenance and Capital Accounts.

The following table shows the figures of Income and Expenditure for 1929 and 1930. The financial position, it will be seen, remains relatively almost unchanged :—

	1929.	1930.		*1929.*	1930.	
Income available for maintenance	£ *11,360,737*	£ 12,251,319	Expenditure on maintenance	£ *10,417,711*	£ 11,230,605	*Table 12.*
Receipts for Capital Purposes	*3,330,737*	3,361,431	Capital Expenditure ...	*3,481,308*	3,639,797	
			Surplus for the year ...	*792,455*	742,348	
	£ *14,691,474*	£ 15,612,750		£ *14,691,474*	£ 15,612,750	*Table 38.*

In London there was a surplus of			£114,932
,, the Provinces	,,	,,	76,034
,, Scotland	,,	,,	401,459
,, Ireland	,,	,,	149,923
			£742,348

The total surplus of £742,348 was £50,107 less than in 1929. *Table 38.*

MAINTENANCE INCOME AND EXPENDITURE.

The number of hospitals with *credit balances* on their maintenance accounts in 1930 was :—

	No.	Percentage of total received.	
London	75	51%	*Table 13*
Provinces	501	74%	
Scotland	82	82%	
Ireland	31	69%	

The maintenance account of the Voluntary Hospitals as a whole is really a very remarkable one. In 1930 the income available for the purpose of meeting the cost of the year's maintenance exceeded the expenditure by £1,020,714—nor is this something of the nature of an accident, for they have had substantial surpluses for several years in succession. *Table 12.*

Indeed, the watchword which the late Lord Knutsford applied to the Poplar Hospital might be applied to the hospitals as a whole :

" The Poplar Hospital never has been in debt, is not now in debt, and never will be in debt ! "

This record of surpluses is the best answer to those who attack the Voluntary System as bankrupt on the strength of the temporary difficulties of a certain number of individual institutions. In theory, it might appear a more excellent arrangement that the surplus of one institution should be available to meet the deficit of another; in practice it would be no such thing. A hospital rightly placed, and properly managed will never fail ultimately to secure the adequate support of the community it serves. A period of shortage of money is Nature's way of showing that there is something amiss and of forcing the necessary reform. Instances of Voluntary Hospitals being closed down for want of funds are almost unknown, and this means that if longer periods than the year are taken, every hospital receives more than enough to meet its maintenance cost.

Group Income and Expenditure—Maintenance Account.

An examination of the Income and Expenditure on Maintenance Accounts of the A, B, and C groups of hospitals in the four sections, London, Provinces, Scotland, and Ireland reveals a not unsatisfactory position, only in the B group in London is there a deficit and here it amounts to no more *Table 12.* than £8,760 on a total expenditure of £807,044. In all the other groups there are substantial surpluses, which, in eight groups out of the twelve, are independent of the money derived from extraordinary sources. The surplus of the 45 Irish hospitals reviewed amounted to a sum of £147,585. This sum includes £116,128 from sweepstakes.

In the Medical School groups in London and in the Provinces, the position is less satisfactory. *Table 17.* Not only do the deficits out-number the surpluses but they are more serious than in 1929. In London there are 8 deficits and only 4 surpluses. In 1929 the deficits and surpluses were 6 each. It is true that as a group there is a larger surplus than in 1929; this is, however, largely discounted by an abnormal increase in the income of one hospital. In the Provincial Medical School Hospitals the deficits are no more numerous than in 1929 (7 deficits and 8 surpluses) but as in London they are rather more serious. There is also a group deficit of rather less than £2 per occupied bed; in 1929 there was a group surplus of more than £14 per occupied bed. In Scotland the position is better—only one of the six hospitals ended the year with a deficit—the other five had substantial surpluses. In Ireland it is not easy to appreciate the situation, partly because there is a difficulty connected with classification and partly because all the figures are not available. So far as the figures go, seven of the hospitals have substantial surpluses against two with deficits. The grand totals of the Medical School group of hospitals are interesting—£3,418,174 was raised, £3,178,832 was spent, leaving a surplus upon each occupied bed of £16·08.

In the large group of hospitals containing 200 beds or more unconnected with Medical Schools the number of surpluses are more numerous than those with deficits, but fewer than in 1929. In this *Table 18.* group £1,435,101 was raised and £1,350,440 spent, leaving a surplus of £11·79 per occupied bed—approximately £2 less than in 1929.

In the group of hospitals containing 150 to 199 beds, the surpluses are much more numerous than *Table 19.* the deficits and more numerous than in 1929. In this group £722,453 was raised, £656,211 was spent, leaving a surplus of £16·86 per occupied bed, almost £3 less than in 1929.

In the group of hospitals containing 125 to 149 beds the surpluses again out-number the deficits *Table 20.* and are more numerous than in 1929. In this group £668,518 was raised and £556,475 was spent, leaving a surplus of £35·28 per occupied bed, or approximately £27 per occupied bed more than in 1929. The figures of this group do not, however, lend themselves to a close comparison, as seven hospitals appear in it for the first time and some of them have substantial surpluses.

Table 21. In London, four of the eight groups of Special Hospitals had deficits in 1930, against only one group with a deficit in 1929. In the Provinces the groups of Special Hospitals all had surpluses in 1930.

To sum up: On the basis of surplus and deficit, the position is still satisfactory, though there has been some falling off in the Provinces from the figures of 1929. Out of the 126 hospitals reviewed separately in Tables 17 to 20 inclusive, and for which the figures are available for both years, only 18 have had deficits in both 1929 and 1930.

The following table shows the position on the basis of the available bed. This does not differ materially from that on the basis of the occupied—the percentage of occupation of the Voluntary Hospitals as a whole is very high.

Table 15. Income and Expenditure on Maintenance Account per Available Bed.

	Income.		Expenditure.		Surplus.	
	1929.	1930.	1929.	1930.	1929.	1930.

SOURCES OF INCOME.

The following tables give particulars of the sources of income upon the bases of :—

(1) the actual amount per available bed.
(2) the proportion which each bears to the total.

ANALYSIS OF THE SOURCES OF INCOME ON MAINTENANCE ACCOUNT PER AVAILABLE BED. *Table 22.*

Voluntary Hospitals in	Voluntary Gifts.		Patients' Contributions.		Public Services.		Interest on Investments.		Other Receipts.		Extraordinary Income.	
	1929.	1930.	1929.	1930.	1929.	1930.	1929.	1930.	1929.	1930.	1929.	1930.
London ...	£88·77	£90·32	£58·89	£63·21	£15·39	£15·66	£40·22	£39·39	£3·18	£3·89	£27·08	£25·54
Provinces ...	80·17	75·48	21·44	23·17	9·30	12·00	19·60	18·98	1·07	1·22	15·63	13·54

SOURCES OF INCOME SHOWN AS PERCENTAGES OF THE TOTAL.

Voluntary Hospitals in	Voluntary Gifts.	Patients' Contributions.	Public Services.	Other Receipts.	Interest from Investments.	Extraordinary Income.
London ...	37·95%	26·56%	6·58%	1·63%	16·55%	10·73%
Provinces ...	52·28	16·05	8·31	0·84	13·14	9·38
Scotland ...	39·59	6·77	4·27	1·38	20·72	27·27
Ireland ...	21·21	23·63	11·41	2·13	10·66	30·96

The incomes of the London, Provincial, Scottish, and Irish Hospitals (with the exception of sweepstakes) are derived from similar sources, but in very different proportions.

Voluntary Gifts form 52 per cent. of the income of the Provincial Hospitals and only 21 per cent. of the Irish.

Patients' payments provide 26 per cent. of the income of the London and only 7 per cent. of the income of the Scottish.

Public Authorities provide 11 per cent. of the income of the Irish and only 4 per cent. of the income of the Scottish.

Interest on Investments. The Scottish Hospitals are the best endowed, deriving nearly 21 per cent. of their income from interest on invested funds—nearly double that which the Irish Hospitals derive.

In Scotland and in Ireland the hospitals derive from " extraordinary " sources about 30 per cent. of their income—nearly 3 times as much as either the London or the Provincial. Except in Ireland " Extraordinary Income " consists almost entirely of free legacies. As the money received from sweepstakes by the Irish Hospitals in 1930 was given unconditionally it has been included under this heading.

It is difficult to draw the line between purely voluntary contributions and money derived from contributory schemes. There is, however, no evidence to show that the efforts of those who are patients, or potential patients, to help the hospitals from which they derive benefit and in the well-being of which they are deeply interested, is having, or is likely to have, any deterrent effect whatever upon the flow of purely voluntary donations and subscriptions. It is possible, too, that the same may be true regarding contributions from the State and the Public Authorities, provided that the amounts are definitely linked to specific work performed. There is no very obvious reason why a rich man should give to the Committee of an Institution which does no work for the State and refuse to give to the same Committee because as good citizens they decide to undertake on equitable terms duties which they can perform better and at the expenditure of less public money than anyone else. He could only

do so were he either very short sighted or because the real facts of the case had been imperfectly put before him.

Whether the same can be said regarding income derived from other sources remains to be seen. There is said to be a falling off in the amount of voluntary support in some of the Irish hospitals.

LEGACIES AND INVESTED FUNDS.

During 1930 the hospitals received £1,406,716 in free legacies. In addition the Provincial, Scottish, and Irish hospitals received £428,128 in earmarked legacies (the figures of earmarked legacies to hospitals *Table 42.* in London are not available). Some hospitals invest all legacies received, whether earmarked or not, and some all legacies of more than £50.

Table 23. As the survey covers a larger field each year, it is difficult to calculate the exact increase in the invested funds of the hospitals—these now amount to approximately £39,000,000.

INCOME FROM PUBLIC SERVICES.

One of the most disappointing tables is that analysing the sources of income from Public Services. Out of a total amount of £608,694 received by the Provincial and Scottish hospitals, £153,895 or 25 per *Table 24.* cent. has to be shown as "details not given." There is certainly no difficulty and little labour involved in setting forth the sources of a hospital's income under the proper headings. Indeed to do so is a duty which each individual hospital owes to the system to which it belongs and which it hopes to preserve. Not to perform this duty places the Voluntary Hospitals at a disadvantage with, *e.g.*, the Approved Societies, for they are not in a position to say exactly what these Societies contribute each year. As matters stand this sum may be £153,100 or £306,995 or any sum between these two figures. The income derived from Public Services is a growing one. Accurate information regarding it is of the utmost importance to the hospitals as a whole in their negotiations with the Public Authorities and other organisations with which they are brought in contact.

EXPENDITURE.

The headings "Provisions" and "Salaries and Wages" need no explanation, but it is probably desirable to explain that "Surgery and Dispensary" includes Drugs, Dressings, Chemicals, Disinfectants, Bandages, and Instruments and Appliances, and under the heading "Domestic" are included Furniture, Bedding, Crockery, Laundry, Water, Fuel and Light, Uniforms, etc.

The expenditure under these four headings, usually referred to as controllable, was almost exactly *Table 31.* the same in 1930 as in 1929. The proportion too which each bears to the total shows little difference between London, the Provinces, and Scotland, except that Scotland spends relatively rather more on food and less on drugs.

Analysis of the Principal Items of Expenditure.

* The cost of out-patient work is included in these figures.

THE PRINCIPAL ITEMS OF EXPENDITURE SHOWN AS PERCENTAGES OF THE TOTAL EXPENDITURE UNDER THE FOUR HEADINGS.

Voluntary Hospitals in	Provisions.	Surgery and Dispensary.	Domestic.	Salaries and Wages.
London	19·39%	15·09%	21·68%	43·84%
Provinces	22·77%	15·39%	20·78%	41·06%
Scotland	24·27%	14·40%	20·19%	41·14%
Ireland	32·07%	15·00%	21·51%	31·42%

EXPENDITURE PER OCCUPIED BED OF HOSPITALS ASSOCIATED WITH MEDICAL SCHOOLS. *Table 32.*

Medical School Hospitals in	Provisions.		Surgery and Dispensary.		Domestic.		Salaries and Wages.	
	Highest.	Lowest.	Highest.	Lowest.	Highest.	Lowest.	Highest.	Lowest.
London	£ 51	£ 31	£ 55	£ 29	£ 72	£ 37	£ 169	£ 78
Provinces ...	40	23	46	18	51	21	93	52
Scotland	29	21	23	14	27	14	60	32
Ireland	40	21	27	5	32	11	42	14

These four items of expenditure, which together account for between 80 and 85 per cent. of the expenditure on maintenance, can to-day be budgeted for on the basis of either the actual amount that ought to be spent per bed per annum or the ratio which it ought to bear to the total, according to whether the institution is Metropolitan or Provincial. The third table, giving the highest and lowest cost per bed in the Medical School Hospitals, suggests that an attempt should be made to classify them into two or more groups; the differences between the highest and the lowest cost per bed in all of the four items of controllable expenditure are much greater than ought to be found in a group of hospitals appropriately classified. This will not be an altogether easy task. Cost per bed certainly suggests at least two groups in London and two groups in the Provinces, and even in Scotland there are two which are always very much less costly than the other four.

These differences in cost can only be explained in the main by differences in the number or scope of the services given. Two departmental services called by the same name may differ in the accommodation provided, the staff (per unit of work) employed, the range of treatments attempted, the remuneration offered, without there being any reason whatever to draw critical comparisons between them: yet the cost of the hospital giving the more extended services may, even upon the basis of the individual treated, show up unfavourably unless care is taken in the grouping. At the same time, while grouping and classification are very important, it is more probable that the science and art of hospital administration would be more advanced by investigation along departmental lines—standards of cost of feeding the individual, the composition of the catering load, patients, nurses, staff employed, the cost of heating and lighting per cubic unit, etc., are matters which are occupying the attention of hospital administrators all over the world. There are unmistakable signs of a doubt arising concerning the soundness of the time-honoured belief that a hospital is an institution of so singular a character as to be in many respects administratively uncontrollable.

The returns upon which the table giving the expenditure on Fuel and Light is based are growing in number. The cost of coal, coke, gas, and electricity for all hospital purposes may be budgeted for at approximately £11 per available bed. Now that a list of hospitals in which some of the newer methods are employed, such as oil fuel for boiler purposes, electricity for cooking purposes, and so on, is available it will become possible to form estimates as to the value of these based upon actual experience; up to the present there is little evidence of a convincing character to place at the disposal of Committees of Management contemplating the extension or refitting of their institutions. *Table 37.*

III. PATIENTS TREATED DURING 1930.

The actual growth of the accommodation and work of the Voluntary Hospitals during 1930 is obscured by the increase in the number of hospitals admitted to the survey. This is of less importance inasmuch as it can be assumed from previous records that approximately 1,500 more beds are added each year, and 40,000 more In-patients and 150,000 more Out-patients treated. The two following tables show the volume of work done in the hospitals as a whole and in the four groups of larger institutions.

Table 1.

Voluntary Hospitals in	No. of Hpls. giving Details.	No. of Available Beds.	No. of New In-patients.	No. of New Out-patients.	Total No. of New Patients.
London	148	16,012	249,442	1,825,804	2,075,246

THE ROAD TRAFFIC ACT, 1930.

Memorandum 39, printed in this volume, sets out the conditions under which hospitals can obtain payments from Insurance Companies, under Section 36 (2) of the Road Traffic Act, 1930, towards the cost of treatment of persons injured in motor accidents. That this section is imperfect is no doubt true—but there is this to be said in justice to those who are responsible for it :—

1. That it was clearly realised from the outset that the Road Traffic Bill presented only a limited opportunity to get the claims of the hospitals recognised.
2. That it was better to try and get something rather than let opportunity slip by altogether.
3. That an imperfect section was better than none at all, inasmuch as it would stake out the hospitals' claim—the hospitals have suffered in the past from not seizing their opportunities, notably in connection with the Approved Societies and in connection with the remission of legacy duty.
4. That, since sentiment rendered many hospitals reluctant to do anything that might appear to be a departure from those honourable traditions which taught them to admit at all times and without question all who were victims of accidents, something in the nature of a compromise was all that could be hoped for.
5. That even if this section should provide no more than 10 per cent. of the cost of treating road accidents, viz., £25,000 to £30,000 a year—this sum was not to be despised.

There is reason to believe that the full benefit of this section is not obtained by all hospitals because of the lack of either knowledge or machinery to press their claims—nor is the fight altogether a fair one. On the one hand there is the powerful Insurance Company, on the other the injured patient, often a man or woman in humble circumstances, while in the background stands the hospital as a kind of contingent spectator. One hospital indeed has determined to contest in the Courts a contention of doubtful legality made by an Insurance Company. As the decision of the Court will make hospital law, it is very reasonably suggested that the hospitals as a whole should help and for this purpose

should form a general fund. Indeed, it is not improbable that steps will be taken to place behind each hospital in its effort to obtain recognition of its claims the full weight of their Association of over 1,000 institutions and so meet the Companies on more even terms.

At the same time, it is necessary to make fuller efforts to find some solution to the more important problem, viz., how to obtain the greater part of the cost of treating the victims of road accidents. The Council of The British Hospitals Association has decided to recommend hospitals to support as strongly as possible a Bill in Parliament which has for its object an alteration in the law which would make it unnecessary for the victim of a road accident to prove negligence on the part of the driver responsible for the accident. This proposal is developed in a paper which is printed in this volume and which has been written by Sir Alexander K. Butterworth, LL.B.

NEW BUILDINGS.

In the body of this volume, page 191, will be found a list of new buildings and extensions completed during the past two years. This list is the record of a system that is neither inactive nor bankrupt. It deserves publicity, not indeed that publicity would add to the enthusiasm of those who are responsible for the work which the lists set forth, but because it supplies an instant and ever-convincing answer to those who are never tired of asserting that the Voluntary System is a dead or dying concern. Whether it is regarded from the point of view of bricks and equipment or of money raised and spent, it is a sufficiently astonishing list. There are seven separate undertakings which have cost more than £100,000 each, nine which have cost more than £50,000, 32 more than £20,000 and 31 more than £10,000. In all, more than 300 of the Voluntary Hospitals have been adding to their accommodation or improving in one way or another their departments and their equipment. So far as is possible, this list classifies the additions, etc., under eleven headings. It has, however, been impossible to avoid an omnibus heading, owing to the inclusion in the returns of several different additions in one lump sum cost.

RELATIONSHIP BETWEEN THE VOLUNTARY HOSPITALS AND THE LOCAL AUTHORITIES UNDER THE LOCAL GOVERNMENT ACT, 1929.

Section 13 of the Act is as follows :

> " The council of every county and county borough shall, when making provision for hospital accommodation in discharge of the functions transferred to them under this Part of this Act, consult such committee or other body as they consider to represent both the governing bodies and the medical and surgical staffs of the voluntary hospitals providing services in or for the benefit of the county or county borough as to the accommodation to be provided and as to the purposes for which it is to be used."

Those who are prone to find offence in all things have criticised this section of the Act in that it does not lay an obligation upon the Voluntary Hospitals to consult the Local Authorities when they, in their turn, propose to provide additional accommodation. The framers of the Act were bound to safeguard the rate-payers by setting up some barrier against the unnecessary spending of their money, and at the same time to give the Voluntary Hospitals assurance that they would not be wiped out of existence by an arbitrary use of the power of the purse. A remote enough contingency, it is true, but the framers of laws have to err upon the side of safety. The real intention of the Act, however, is obvious enough. It is to lay quietly and without hurry the foundations of a bridge between two organically different bodies—the Voluntary Hospital and the Public Assistance Committees—each charged with duties so similar as to make it exceedingly difficult to draw dividing lines. It is only by a frank and friendly determination to work together that the available resources can be put to the best use, and progress be made without rivalry and overlapping. Any arbitrary directions or forced amalgamations would have been more likely to produce delay and confusion. All that is suggested is that the two bodies should come together, discuss what is after all the most costly portion of their work, and arrive at decisions, both reasonable in themselves and modified to meet the varying need of each town and district. In every area to-day the Voluntary Hospitals have formed the necessary Committees representative of lay and medical opinions. In many areas these Committees are working

in cordial co-operation with the Public Authorities. In others negotiations are in progress; in others again, the Public Authorities, not yet having completed their surveys, are waiting until the actual need for conference arises. Instances of unfriendly rivalry are so rare as to be negligible. Arrangements so far come to have taken the form of definitions of spheres of action; the use of Voluntary Hospital accommodation and staff for patients for the treatment of whom the Public Authorities are under statutory obligation; the payment of fees for work done for the Public Authorities; there is also an instance of the accommodation belonging to the Public Authorities being placed at the disposal of a Voluntary Hospital upon terms mutually advantageous.

There is this, however, that deserves to be said, and it is important. The State is an organised body, with definite aims and policies—both of which may and frequently ought to be, modified by considered and intelligent criticisms and even opposition. For this purpose the Voluntary Hospitals are ill equipped. They have yet to learn the importance of joint action: they have also to divest themselves of their terror of central control. The essence of the Voluntary System lies in the independence of the units forming it, and any measure of active central control that deprives them of that independence would mean their end: but central control and joint action are two distinct things; and just as the former would end the Voluntary Hospitals so will the want of the latter inevitably bring about the same result. A State or a Public Authority can meet an organised body and agree upon certain broad principles to be modified locally within reasonable limits, but no State and no Public Authority working under the State can be expected, once having determined upon its own definite policy, to modify it in a thousand different ways to suit the views and wishes of each individual hospital. It is essential, therefore, that the Voluntary Hospitals should endeavour not only to think collectively but also to strengthen their machinery for expressing their considered views.

CONFERENCE AT EASTBOURNE

At the third Joint Conference of The British Hospitals Association and the Incorporated Association of Hospital Officers held at Eastbourne in June 1931 two important matters were discussed, Out-patient Departments and the payment of the Honorary Medical Staffs of Voluntary Hospitals.

In connection with the former, H.R.H. the Prince of Wales has set up a Committee charged with the duty :—

> " to enquire into and report upon the methods in use in the London Voluntary Hospitals regarding the attendance of patients in the out-patient and casualty departments, and the effect of those methods upon the suitability of the patients treated and on the length of time during which patients wait before or after treatment."

The subject is a difficult one, and it is not to be expected that the report can be issued at a very early date.

With regard to the latter, conferences have been held under the Chairmanship of Lord Linlithgow between representatives of The British Hospitals Association and the British Medical Association, and the following Report has been submitted to each body for their consideration.

PAYMENT OF VISITING MEDICAL STAFFS OF VOLUNTARY HOSPITALS

Report by the Joint Committee of The British Hospitals Association and the British Medical Association.

(1) We were appointed jointly by The British Hospitals Association and the British Medical Association to be a Committee to consider and report upon the payment of Visiting Medical Staffs of Voluntary Hospitals. We have the honour to submit the following Report and Recommendations.

(2) Institutional treatment has largely displaced treatment in the patients' own homes, and this tendency is likely in the future to increase. Mainly as a consequence of the foregoing, social status and private means are coming to be regarded less and less by members of the public as reasons why any patient should or should not go to hospital.

(3) The substitution of institutional for home treatment has narrowed the field of private medical practice in the case of consultants and specialists. In consequence, these practitioners find it increasingly difficult to earn their living, and in many instances this is reflected in an increase in their fees to private patients.

(4) The narrowing of this field of private practice shows signs of bringing about a reduction in the numbers of consultants and specialists who are in a position to give gratuitous service to the Voluntary Hospitals. We think that this tendency is likely to increase.

(5) Under the Local Government Act, 1929, local Authorities may finance hospitals not only for patients of the poor law category, but for the whole community. Such Council Hospitals might be staffed by part-time consultants as well as whole-time Medical Officers, both on a salaried basis. Their management might be in the hands of representative committees, and they might be associated with teaching schools. They might thus closely approximate to the Voluntary Hospitals while enjoying the powerful advantage of drawing their financial support from public funds. Again, such Council Hospitals may, in accordance with the terms of the Act of 1929, receive subventions from contributory schemes on account of treatment given to contributors. In the case of patients able but unwilling to pay for their treatment, Council Hospitals may recover payment by legal process. The constantly extending demand for institutional treatment, coupled with the shortage, in most areas, of hospital accommodation, makes it, in our opinion, very probable that Local Authorities will in the course of time, contemplate ambitious schemes for the provision of beds for other than poor law patients. But whether or not this proves to be the case, it is difficult to believe that the existence of Public Authority Hospitals with paid whole and part-time Visiting Medical Staffs will not have a powerful influence in the direction of strengthening the demand for payment by the Visiting Medical Staffs of Voluntary Hospitals.

(6) The problem would appear to be to devise means whereby all Voluntary Hospital patients who can afford to do so may make a reasonable contribution towards practitioners' fees as well as meeting the cost of their maintenance while in hospital.

(7) The case of paying patients would seem to present no serious difficulty. It is self-evident that no patient whose means enable him to pay for treatment as a private person should be allowed to enter the general wards of a hospital. The provision in all suitable hospitals of a sufficient number of rooms or wards for paying patients, coupled with the strict application of a maximum means test for entry into general wards, would no doubt have an important bearing upon the position and attitude of the Visiting Medical Staffs. This is a matter which we think deserves the early attention of Management Committees of those hospitals in which such accommodation is capable of extension or has not yet been introduced.

(8) Patients who are unable to make any contribution may for the present purpose be disregarded.

(9) Contributions obtained directly from patients through the efforts of the Almoners during or after treatment constitute about 10 per cent. of the aggregate income of all hospitals. Individual contributions in this category are commonly small and, as contributory schemes and paying wards increase, such contributions may tend to disappear. It does not appear necessary at this stage to consider this class of contribution.

(10) The disposal of funds made available to the hospitals through contributory schemes seems to us to be the crux of the whole matter. We use " contributory schemes " in the widest sense. It is necessary to ask :—

(*a*) Are members of existing contributory schemes paying at this time enough to meet the cost of their maintenance while in hospital and to provide a contribution towards the remuneration of the Visiting Medical Staff ?

(*b*) Is it practicable at this moment of unexampled financial stringency and unemployment to suggest a higher rate of contribution ?

(11) Conditions and the state of local opinion are not uniform throughout the country. Experiments are still being made by individual hospitals, and a natural process of growth and adjustment is in evidence. We think it would be an error to attempt to drive the more backward regions, to seek to hold back the more progressive, or to insist upon absolute uniformity between hospital and hospital.

(12) There is general agreement on the question of payment to the Visiting Medical Staff of a part of funds paid on account of " in-patients " and " out-patients " by the State, County, or Municipal or other Public Authorities, or by Accident Insurance Companies. In this case the practice commonly

obtains of earmarking an agreed percentage of all such monies for the Visiting Medical Staffs. The importance, however, of these sources of revenue in relation to the number of patients treated must vary greatly between hospital and hospital.

(13) The effect which any scheme of payment to the Visiting Medical Staffs may have upon their status, their eligibility for membership of Hospital Management Committees, and so forth may have to be considered.

Conclusion and Recommendations.

(14) We are of opinion that the time has come to recognise the claim of the Visiting Medical Staffs to some share in the monies raised for the treatment of patients in hospital, other than those provided by voluntary subscription or donation for the treatment of free patients.

(15) We recommend the institution of contributory schemes wherever such schemes are not already in existence.

(16) We desire to record our opinion that the ideal contributory scheme is one in which the individual contributor shall contribute upon a basis designed to provide :—

(i) For the cost of maintenance of patients.

(ii) For a contribution towards the remuneration of the Visiting Medical Staffs of the hospital or hospitals concerned.

(17) We recommend the provision in all suitable hospitals of a sufficient number of rooms or wards for paying patients coupled with the strict application of a maximum means test for entry into general wards.

(18) We recommend that a standing joint committee of The British Hospitals Association and the British Medical Association should be constituted. This joint committee should meet from time to time in order to give advice to hospitals or medical boards seeking guidance, to keep each body in touch with the views and experience of the other, and generally to watch the situation.

(*Signed*) Linlithgow [*Chairman*].

ROAD ACCIDENTS

BY

Sir Alexander K. Butterworth, LL.B.

Let me explain at the outset that the law discussed in this article is not the criminal law, relating to fines and imprisonment, but the law regulating compensation for injury, and the accidents referred to are not the accidents to motor vehicles and their occupants, but accidents to other persons caused by motor vehicles. Injuries sustained by motorists on the road and damage to their cars are in the main a matter for the Insurance Companies, and I am not aware of any complaint of the law as it stands on the part of motorists or any demand by them for its amendment: in any case that is a question which the motoring organisations are well able to settle for themselves. This article is concerned with the injuries sustained by other road-users in road accidents, and its aim is to point out the hardship which such persons—and particularly pedestrians—suffer under the present traffic conditions and the present rules of law, and to suggest a remedy.

The present traffic conditions are known to everyone and their dangers and drawbacks need no emphasising. The streets and roads are so dangerous that even an alert and active person on foot is fortunate if he escapes for long without injury or imminent risk of injury. The road casualties now number nearly 200,000 a year, of which one in every 25 or so is fatal, and roughly one-half of the total happen to pedestrians or pedal-cyclists—that is to say, some 3,000 or 4,000 road-users (other than persons riding in or on motor vehicles) are killed and some 80,000 injured in a year on the roads of Great Britain.

As the risks of the road are not of their choosing and as road-users undoubtedly exercise more, rather than less, care than they did before the advent of the motor car, most persons will agree that pedestrians, cyclists, and others have a grievance which ought to be removed, if it can be. That grievance will not be completely removed until our roads are reasonably free from danger and discomfort, and one hopes that some of us may live to see that day. At present, however, it shows little sign of dawning, and in the meantime we have to meet, as fairly and reasonably as we can, the traffic problems as they exist to-day: accordingly, in this article I desire to raise the question whether the law as it stands treats injured road-users fairly in the matter of pecuniary compensation. Without suggesting that a money payment can always, or even generally, be a full recompense for serious personal injuries—still less for loss of life—such a payment goes far to meet many of the untoward results of an accident, and the question whether any class of injured persons fail to receive the compensation they are fairly entitled to, as suggested in this article, is too important to be ignored.

What, then, is the legal position? A person knocked down by a motor vehicle when walking on a road, and claiming compensation for his injuries, is in the same position as many others (though by no means all) who have sustained physical injury through misadventure—he must prove what the law calls "negligence" on the part of the person causing the injury, and he must be prepared to rebut any suggestion that he himself caused or contributed to the accident by his own conduct.

The position is the same when a pedestrian is injured by a runaway horse and would be the same, if a motorist, injured in an accident, claimed that it had been brought about by the culpable carelessness of a pedestrian. In all these cases "negligence" must be proved before a right to "damages" (as the law humorously terms compensation) is established. The accident may have been witnessed by no one except the two persons concerned, or the injured man may have died from his injuries and the person who caused the injury may be the only person left to tell the tale; unless the injured person in the one case, or his dependents in the other, can give affirmative proof of negligence—of something done which ought not to have been done or something omitted which ought to have been done—a claim for compensation will fail. It is a case of what lawyers term "damage without injury" (*damnum absque injuriâ*), using "injury" in the sense of "legal wrong"; a layman might perhaps be pardoned for thinking it would be more aptly described as "injury without damages."

Cases can easily be imagined and frequently happen, not only on the roads, in which the application of this rule of law works great hardship, and we have to consider:—

I. Whether there is anything special in the case of non-motoring road-users which distinguishes it from that of many others who sustain injuries in accidents of one kind or another, and which calls for, or justifies, special consideration and exceptional treatment; and

II. Whether, if there be a special hardship in their case, any simple remedy can be devised which will meet that hardship, without creating equal hardship in other directions, or running counter to well-established principles of English law.

It is submitted (1) that special hardship undoubtedly exists and (2) that it admits of a perfectly fair and simple remedy, namely, that **when a person lawfully using a road is injured by a motor vehicle, he shall be entitled to compensation from the person responsible, owner or driver as the case may be, unless he himself caused the accident by his own misconduct or want of care.**

I.—Dealing with the first of these two questions, we have to ask what are the circumstances which are thought to call for special consideration or exceptional treatment of the injured road-user, and for the sake of brevity I will confine my argument to pedestrians, for nearly everything which is urged on behalf of the person on foot could with equal justice be pleaded by the pedal-cyclist or the horse-rider and possibly others.

On this point it is submitted that the road statistics speak for themselves, and that the justification of special treatment is afforded by the changes in traffic conditions which have taken place since the advent of the motor car and particularly during the last twelve years, all of them adverse to those using our highways otherwise than in motor vehicles. It may be argued that the present dangers will become less serious as people become accustomed to the new conditions, but with traffic moving at the present rates of speed—and speed in the future may be even higher—it is difficult to see how any improvement can be looked for (so far as the safety of pedestrians is concerned) until many more roads are provided with footpaths or fast motor traffic is confined to special roads with crossing facilities for persons on foot. Under present conditions pedestrians and other road-users are called upon to share with vehicles, travelling at the same rate as trains upon a railway and increasing each year in size and weight, roads that are infinitely more dangerous than railway tracks, and human nature being what it is, frequent accidents are bound to occur.

If, therefore, it be asked what are the special features that are relied on as calling for special treatment of the accidents in which foot-passengers and others are killed or injured by motor vehicles, the answer is, in the first place, the frequency of such accidents, their seriousness, and very often (on the side of the injured persons) their practical inevitability; and in the second place, the fact that these accidents are the result of new road conditions, for which foot-passengers, as a class, are in no sense responsible, and from which, so far from deriving benefit, they reap nothing but danger and discomfort.

Granted that foot-passengers (or perhaps we should say "persons when on foot," for of course we are all foot-passengers at times, just as most persons are "motorists" at times), like the rest of the world, are sometimes less careful than they should be, the present state of the traffic on our roads is such that, as I have said, accidents to foot-passengers are sure to happen, however careful they may be, while, in using the roads they are doing something which not only have they a perfect right to do, but necessity often compels them to do. After all, it is to be remembered that one-half of the road casualties are caused by motorists to other motorists, so that it is clear that either accidents are a normal consequence of the present road conditions or motorists are not as careful as they ought to be.

The case might be stated thus. With a view to rapid transport the nation has decided, at any rate for the time being, that a policy of "Speed first," rather than "Safety first," is in the general interest, although experience has shown that this involves casualties comparable to those of a war between nations *; these casualties may, therefore, be regarded as the toll paid for the advantages, real or imaginary, of rapid transport, and it is only fair that that toll, so far as it can be commuted into money, should be paid either by the State or by the persons directly benefiting from the new form of locomotion: it is not fair that it should fall in any degree on those whose injuries are the direct outcome of the new conditions of transport, and who, quite apart from such injuries, are suffering a serious diminution of the rights and amenities which have been enjoyed by the walking public from time immemorial.

On this part of the argument some observations of Lord Justice Bramwell, a judge whose dicta

* Since the War, in twelve years of peace, 1,400,000 men, women and children have been killed or injured in road accidents in Great Britain, a number equal to more than half the British casualties in the Great War. Some 10,000 persons are killed and injured every three months in London streets alone—a number equal to the total casualties of the Allies at the Battle of Waterloo.

have always carried great weight, seem singularly apposite. They were made in the course of his judgment in the well-known case of *Powell* v. *Fall*, tried in the early days of traction engines. Sparks from a traction engine had caused damage, and although the engine complied with the requirements of the Locomotive Acts and there was no proof of negligence in the mode of its use, its owner was held liable for the damage. In the course of his judgment in the Court of Appeal the Lord Justice said, " It is just and reasonable that if a person uses a dangerous machine, he should pay for the damage that it occasions. If the reward which he gains for the use of the machine will not pay for the damage, it is mischievous to the public, and ought to be suppressed, for the loss ought not to be borne by the community or the injured person. If the use of the machine is profitable, the owner ought to pay compensation for the damage."

Substitute " motor coach " for " traction engine," and you have the argument of the present article in a nutshell !

The argument, so far as it seeks to justify an amendment of the law, may be put in another way. It is only by a change in law that the present-day motor vehicles are able to use the roads at all; there can hardly be a doubt that, if Parliament had passed no Statutes regulating or authorising their use, most, if not all, of the motor vehicles at present traversing our roads would have been looked upon in much the same light as a steam locomotive, and their use could have been prevented by legal proceedings. The drivers of motor vehicles on highways are in fact in the position of " Statutory licensees," and on that ground it might perhaps be argued that their rights are inferior to those of persons on foot, who need no Act of Parliament to justify their use of the highway. Be that as it may, inasmuch as the present perils of pedestrians have been brought about by changes in the law, it can hardly be urged that there is anything anomalous or unreasonable in pedestrians asking that an alteration of the law may be made *in their favour*, which, if it cannot give them complete protection against these perils, shall at least indemnify them, so far as is possible, for injuries actually sustained.

It is sometimes suggested that the provisions of the Road Traffic Act with regard to third party insurance have solved the problem of compensation for the injured pedestrian, as no doubt they have done in the main for the motorist. But that is not so.

The advent of the motor car and the frequency of road accidents which soon followed gave a great impulse to Accident Insurance, and it was not long before a new form of policy was introduced embodying provisions for the protection of motorists against " third party risks "—that is, against claims in respect of injuries to other persons or their property in addition to injuries to themselves or their cars. Before the Road Traffic Act, although a great number of motorists availed themselves of these policies, the practice was neither universal nor uniform; when, therefore, a motorist, who was uninsured and without means, caused damage to another car for which he was legally liable, the loss had to be borne by the owner of the damaged car or by the Company which had insured him. How far the protection afforded by the third party risk policies has tended to diminish the number or severity of accidents (or the contrary), or how far it is in accordance with (or against) public policy that a man should be indemnified against claims arising out of his own negligence, need not be discussed here, but the validity of these policies seems never to have been called in question.

However that may be, the Road Traffic Act has now made insurance against " third party risks " obligatory upon all motorists as regards personal injury, so that now there is always (or should be, for there are gaps in the Act still to be filled up) money available to meet valid claims for compensation, while the details of the settlement and any apportionment of the payment will no doubt be, as heretofore, matters of adjustment between the insurance offices concerned. The case of the motorist is thus met.

The case of the pedestrian is different. When a pedestrian is injured by a motorist, the question of compensation (anything or nothing, much or little) has to be thrashed out, not between two insurance offices, but between an insurance office and the injured person with no insurance office at his back. Now, under a third party policy the insurance office (apart from any practice or agreement between offices) only takes over the legal liability of the motorist, and that is merely to pay compensation when negligence has been proved against him. Naturally, the insurance office says to the injured pedestrian " Prove the negligence," and if his reply is " I have no witnesses," an equally natural rejoinder on the part of the insurance office is, " So much the worse for you : our client does not admit that he was negligent," with a reminder that an insurance office is not a philanthropic institution. Thus, to take an extreme case, if a motorist runs down a pedestrian and kills him (say,

at night, when foot passengers are particularly helpless), his dependents may be absolutely without legal redress in spite of all the provisions of the Road Traffic Act.

The only thing that the Act has done for the pedestrian is to protect him, not against the carelessness, but merely against the insolvency of the motorist. Even that protection is not an unqualified benefit, for the substitution of an insurance office for a private individual as the responsible party is not always an advantage for reasons that need not be elaborated here.

But although that is all that the Act does *directly* for the pedestrian, I venture to think that it has greatly facilitated the passing of a measure such as is here advocated. Before the Road Traffic Act was passed it might have been plausibly argued that it would be unfair to a motorist to place upon him, without any evidence that he was in fault, a liability which to a man of small means might prove ruinous. That is altered by the Act, and all that the proposed amendment of the law would necessitate is an addition to existing premiums to cover the extra risk of liability for those accidents in which the motorist is not proved to be in fault. I do not imagine that the addition would be a serious one, for presumably insurance offices at present cover such liability when a motorist takes his car to a foreign country (*e.g.*, France), where the law throws the responsibility for such accidents upon the motorist, but as to that the argument may be stated in the form of a dilemma. If the addition to the premiums be small, the objection to the proposal loses weight correspondingly; if it be great, that emphasises the hardship on the road-users affected and the need for a change in the law.

So much for the claim of pedestrians and other road-users for special consideration and exceptional treatment. Probably most persons will admit that under present-day conditions the pedestrian's "lot is not a happy one," and that, except where his trouble is the result of his own carelessness, he deserves sympathy, if not help; there remains the question of the fairness and appropriateness of the suggested remedy, viz., compensation without proof of negligence.

II.—It will simplify the argument if we eliminate the excepted class—the culpably careless—for the person who has no one but himself to blame for his mishap will be in no better position than he is in to-day. We may eliminate also the *motorist proved to be negligent;* he is liable to-day and his legal position also would remain unaltered. The cases where the law would be altered would be for the most part (1) cases of "pure accident" and (2) cases where the motorist, though he may have been negligent, is not proved to have been so.

So far as I can understand, those who are opposed to the proposed change put forward two classes of objection, which for the sake of distinction may be designated (1) the motorist's objection, and (2) the lawyer's objection. Let me explain what I mean.

(1) The motorist may urge that the proposal is unfair to him; that it removes or mitigates a possible hardship, only by creating another; that Parliament having given its sanction, expressly or impliedly, to the present traffic conditions, presumably in the general interest, it is hard to penalise a motorist who is merely availing himself of that sanction, and that if the dangers of the road (which are not limited to pedestrians) call for special provision as to compensation, either the liability for compensation should be undertaken by the State, or if that remedy be ruled out, the new rule of law should be applied equally to all road-users.

It may be admitted that an arguable case can be made out for the State, either by a system of insurance or otherwise, shouldering the burden of compensation to injured road-users, recovering what it can from the persons causing the injury, if and when they are shown to be at fault. Indeed, there are some classes of accident which it seems difficult to meet, except by some form of State action; for example, where the delinquent has wrongfully taken another person's car and is himself uninsured; and if a Bill to throw the burden of compensation on the State were introduced into Parliament, it would not be likely to meet with opposition from pedestrians or cyclists. At the moment, however, such a measure can hardly be regarded as within the range of practical politics.

The extension of the proposal to *all* road-users stands on a different footing, involving, as it would, its application to accidents to motorists caused by another motorist, or a pedestrian. The question of claims by one motorist against another is outside the scope of this article, but there seems no reason to suppose that motorists as a body would welcome the application of the proposed rule of law to such claims; that, however, is a matter for them.

But the extension to claims by motorists in respect of injuries sustained or alleged to have been sustained through the presence of a pedestrian upon the road would run counter to the whole argument upon which my proposal, rightly or wrongly, is based. That argument is that pedestrians are

suffering a special hardship from the advent of the motor car, which Parliament has allowed to travel along the roads at a very high speed and which in so travelling constantly knocks them down and kills or maims them. The pedestrian does not knock down or upset motor cars, and it is difficult to see how it could reasonably be claimed that the mere presence of a pedestrian on a road, without any carelessness on his part, should give a right of action to a motorist who was injured through running into him or trying to avoid him. The two cases are not on all fours. It is one thing to say "You knocked me down, and therefore, you must compensate me," and quite another thing to say, "If you had not been there, I should not have come to grief, and so you must compensate me, although you had as much right to be on the road as I had." A motor car is not always under complete control and it is brought on the road by the motorist for his own purposes; if, in spite of careful driving, it injures another road-user, who is also careful—say, a foot-passenger walking on the pavement—is it not right that the loss (*i.e.*, compensation for injuries) should fall on the motorist whose car and whose driving have caused the injuries, rather than on the injured pedestrian? In the absence of some system of State Insurance, one of the two must suffer—*e.g.*, pay the doctor's bill; which should it be? The injured man, who has in no way contributed to the accident (except by walking or standing where he had a perfect right to be), or the man causing the injury, even though he be free from blame or at any rate is not proved to have been in fault? In other words, is there anything unfair in the law saying to the motorist—"The law of the land has been altered in the interests of rapid transport; you are availing yourself of those altered conditions and you must do so on the terms of paying for any damage you cause"? The motorist would still have his right to sue, if he was injured *by the negligence* of a pedestrian, and I submit that the proposed alteration of the law cannot fairly be attacked on the ground of lack of mutuality.

I have passed over rather lightly the accidents to pedestrians who themselves were not as careful as they might have been and so may be said to have contributed to their own injuries. I have done this partly for the sake of simplifying the argument and partly because no question arises as to these until the main principle for which I am contending has been accepted, namely, that the liability of an owner or driver, whose vehicle injures another person, should be regarded as arising *independently of negligence*. But in any legislation embodying that principle the case of the careless pedestrian must be dealt with. It is not suggested that a motorist, who was in no way to blame, should have to compensate a person whose injuries were entirely due to his own want of care. On the other hand, much of the benefit of the proposed amendment of the law would be lost, if injured pedestrians were to be deprived of compensation, because it was suggested *after the event* that they might have escaped injury, if they had acted differently at a critical moment—had paused when they hurried forward or had hurried forward when they paused.

The matter is dealt with in a variety of ways in the different Continental codes: in some countries it is not open to the person who has inflicted the injury to plead negligence on the part of the person injured, unless he himself was entirely free from blame; in others power is given to the tribunal to reduce the amount of the compensation, if both parties were in fault. When the question comes to be discussed here, it may be found that the most practicable alternatives are (i) absolute (or nearly absolute) liability with a pecuniary limit, somewhat on the lines of the Workmen's Compensation Acts; or (ii) liability without any pecuniary limit, injury caused by the injured person's own fault being excepted. In the interests of all concerned (except the legal profession) it is important that any Act of Parliament dealing with the subject should avoid the subtleties and uncertainties of the English doctrine of "contributory negligence."

In support of the reasonableness of my main contention may be urged the fact that in several (I believe in most) European countries the law is substantially as advocated in this article. Under French law a person is liable for damage caused by a chattel under his care, which is capable of causing injury or damage, whether he has been negligent or not; it has been held that a motor vehicle is such a chattel, and the consequence is that in France a motorist, who knocks down and injures a pedestrian, has to pay him compensation, unless he can show that the accident was brought about solely by the fault of the victim himself, or by *force majeure*.

In several other countries (*e.g.*, Germany, Austria, Holland), where a motorist was only liable for injuries caused by his negligence, this was felt to be so unsatisfactory that measures have been passed dealing expressly with motor accidents and bringing the law more or less into line with the law in France. In Switzerland a similar change is now under consideration. In fact, except in

Great Britain, there seems to be a general consensus of opinion throughout Europe that the ordinary law of negligence does not meet the altered conditions of road traffic. This in itself seems an answer to the charge made in some quarters that the present proposal is "fantastic," "outrageous," and "manifestly unfair." *

(2) So much for what I have called the motorist's objection. To proceed to "the lawyer's objection," by which I mean objections raised from a legal point of view.

These objections take the line that the proposal is subversive of a well-established rule of English law, viz., that a claim for compensation for injury to person or property can only be substantiated if it is shown that the person from whom compensation is sought was guilty of what the law calls "negligence"—that is to say, that he took some step which he ought not to have taken or omitted some precaution which he ought to have observed—a principle with which we are all familiar, for it affects the legal relations of every one of us with those with whom we are brought into contact in everyday life.

Those adopting this line of argument would say in effect—"Granting your grievance, we object to your remedy, because it conflicts with a fundamental rule of law."

Now, with all submission to my lawyer friends, it seems to me that there are two answers to this class of objection and that either of them is a sufficient answer. The first is that the exceptions to the rule that liability depends on negligence are so numerous—some derived from the "common" or unwritten law, upon which the rule itself rests, and others the creation of Statutes—that if the injured pedestrian makes out a moral case for relief, there can be no legal objection to taking him out of the "rule" and placing him among the exceptions, where he will find himself in excellent company. For example, innkeepers are liable at common law for the goods of their guests and railway companies and other carriers for the things entrusted to them for carriage; you are liable to a farmer if your dog worries his sheep, and you are liable for accidents to your employees in the course of their duty. In none of these cases is the right of action dependent on negligence. In fact, so numerous are the exceptions to the rule that a plaintiff must prove negligence, that in everyday life the rule may almost be said to have disappeared, buried under exceptions, and that being so, I suggest that it is too late to object to the creation of a further exception *on principle*; we must judge of any new exception *on its merits*, and I claim for the proposed alteration of the law that it is simple, practical and fair.

The second answer is that the proposal cannot be fairly described as creating a new class of exception to the rule or law of negligence; all that it does is to apply to present-day conditions an exception already well established—extending that exception, if you like, and therefore, requiring the intervention of Parliament, but not introducing any new principle. Lawyers and those laymen who have had the good fortune to read Mr. A. P. Herbert's "More Misleading Cases," will know that I refer to what is known in the law as "the rule in *Rylands* v. *Fletcher*," and it is to the effect that a person bringing on to his own land (or on to a highway), an animal or thing which, if it escapes or gets out of control, is dangerous or likely to cause injury, is liable for the consequences apart from negligence on his part. The case of *Rylands* v. *Fletcher* was decided in 1868; that was even before the days of the red flag and the four miles an hour speed limit, and I imagine that there can be no doubt that if a present-day motor car had at that time appeared on a highway and knocked down a pedestrian, he would have recovered damages for his injuries without being called upon to prove that the driver of the car had driven carelessly, in the same way as if he had been injured by an escaped lion or bear.

At the present day an injured pedestrian would, I dare say, fail, if he were to contend that in the eye of the law a motor vehicle on the highway was legally in the same category as a wild beast, and therefore fell within the rule in *Rylands* v. *Fletcher*, but it does not follow that his failure would be from a flaw in his logic. Indeed, Mr. Herbert, in the book I have already referred to, contends very forcibly (and none the less convincingly because he combines legal argument with wit), that under the law, *as it stands to-day*, an injured pedestrian ought not to be put to proof of negligence. Thus, in the imaginary case of *Haddock* v. *Thwale*, in which an injured pedestrian sues a motorist for damages, the judge, after quoting verbatim the celebrated judgment of Mr. Justice Blackburn in

* Since this article was written the statement has appeared in *The Times* that the committee appointed by Columbia University Council for research in the social services, which for two years has studied the question of compensation for motor accidents, has reported in favour of compulsory insurance, "but holds that no system *based on liability for fault* is adequate to meet existing conditions. It favours the plan of compensation with limited liability and without regard to fault."

Rylands v. *Fletcher*, is made to say that in law Mr. Thwale's motor car should be regarded as a wild beast, and that the boast of its makers that it contains the concentrated power of 45 horses makes the comparison just. " If a man," he continues, " were to bring upon the public street 45 horses tethered together and were to gallop them at their full speed past a frequented cross-roads, no lack of agility, judgment or presence of mind in the pedestrian would excuse his injury," and he goes on to suggest that " the fact that the 45 horses are enclosed in a steel case and can approach without sound " augments their power to do injury. " The ordinary walking citizen," he says, " cannot be expected to calculate to a nicety the speed, direction and future conduct of such monsters, for not even their own drivers can do that, and in the face of a procession of them the wise may well blunder, the brave falter, the resolute waver and the swift be too slow." " Excellent fooling," it may be said, but " many a true word is spoken in jest."

However, whether or not the judgment in *Haddock* v. *Thwale* be good law, as well as good sense, the point I want to emphasise is that the rule in *Rylands* v. *Fletcher*, like the rule of French law, turns on the quality of being dangerous when uncontrolled, and one has only to turn to the statistics of persons injured by cars when standing or walking on the pavement, to realise how dangerous cars may be when they are out of control and how often that happens. I submit, therefore, that the proposal may fairly be described as embodying a recognised principle of English law, and that little weight can be attached to the argument that it flies in the face of the " law of negligence."

A recent extension or application (whichever be the apter phrase) of the rule in *Rylands* v. *Fletcher* is to be found in the Air Navigation Act, 1920, Section 9 of which provides that " where material damage or loss is caused by an aircraft in flight, taking off, or landing, or by any person in any such aircraft . . . to any person or property on land or water, damages shall be recoverable from the owner of the aircraft in respect of such damage or loss, *without proof of negligence*, . . . except where the damage or loss was caused by or contributed to by the negligence of the person by whom the same was suffered." Whether, apart from that Act, the mere fact of an aeroplane crashing and damaging private property would have rendered the airman liable without proof of negligence on his part, may be open to question, but Parliament recognised the fairness of his being so treated. It would perhaps be going too far to claim the Air Navigation Act as a Parliamentary precedent for the present proposal, because there are obvious differences between the two cases; but there are points of similarity also. Both the aeroplane and the motor car introduced a new form of locomotion, the results and consequences of which could only be fully learned by experience : each was likely to get out of control at times and to do damage when that occurred; in each case it was desirable that a new invention, with potentialities that none could fully foresee, should not be crippled by undue restrictions or responsibilities.

Arguments from analogy can never be complete and are seldom wholly convincing, but even so, the Act of 1920 may be relied on in answer to objections based on the sacrosanct character of the law of negligence and in support of the position that when that law is found to work unfairly, Parliament should not, and will not, hesitate to create a statutory exception to it, if the exception is founded on a sound principle. The Workmen's Compensation Acts perhaps afford the best illustration of this. Political expediency may have a share in helping to bring about what was a big change in the law relating to the liability of employers for accidents to the persons employed by them, but there was a broad principle underlying the initial enactment, viz., that accidents to workmen, involving personal injury, must be regarded as an incident of industrial employment and, therefore, should be dealt with on principles of insurance, carrying with them a right to compensation, independent of fault on the part of the employer and ranking among the costs of production equally with wages and other items of expense. The principle is intelligible enough, but its adoption by Parliament may well have given a shock to writers of legal text-books, for the law of negligence, as applied to the relation of Master and Servant (to adopt the Victorian phraseology), formed a code of considerable magnitude and complexity in 1897, when the first Workmen's Compensation Act was passed.*

To sum up—I submit (1) that as the conditions of road traffic and the law of the land stand to-day, pedestrians and other non-motoring road-users are subjected to real and serious hardship, arising out of the dangerous character of those conditions and the rule of law that deprives an injured person of compensation, unless he can produce affirmative evidence of negligence.

* Reference may also be made to the Railway Fires Acts, 1905 and 1923, which in effect make railway companies liable, up to a specified sum, for damage to crops, etc., arising from sparks from their engines without proof of negligence.

(2) That this hardship, so far as its pecuniary side is concerned, admits of a simple remedy, namely, by giving to such road-users, when injured by a motor vehicle, an absolute right to compensation, except when their injuries are the result of their own culpable carelessness.

(3) That the proposed remedy would in practice involve nothing more than a moderate increase in the premiums which under existing law motorists have to pay for third party insurance.

(4) That this would be nothing more than a toll that may fairly be claimed from those availing themselves of the new traffic conditions, whether it be regarded as the price paid by them for the advantages they derive therefrom or as compensation to other road-users for the danger and discomfort which those conditions impose upon them.

(5) That not only is the proposed remedy fair in its conception and simple in its operation, but that it is also free from legal objections, being strictly in accord with established legal principles and doing nothing more than giving to the persons affected (viz., injured road-users) the same legal right as already obtains in many cases under English law, namely, the right to compensation for injury without proof of negligence, and in that respect bringing English law in respect of motor accidents into line with the law of other countries.

INCORPORATION UNDER THE COMPANIES ACT, 1929.

Under Section 18 of the Companies Act, 1929, any Chamber, Institute, Society, or other Association about to be formed for the purpose of promoting commerce, art, science, religion, charity, or any other useful object which prohibits the division of profit among its members, may, if it obtains the Licence of the Board of Trade, be incorporated by registration under the Companies Acts with limited liability, but without the addition of the word " limited " to its name.

An Association desiring to be incorporated in this manner should make a written application to the Board of Trade for a Licence, and, together with such application, should transmit for consideration a draft in duplicate of the proposed Memorandum of Association and Articles of Association, a list of the promoters and proposed governing body, and an estimate of the income (with the sources from which it will be derived) and expenditure of the proposed Association.

If there is an unincorporated body, copies of the accounts and balance sheets for the last two years, and copies of any reports as to its working during that period, together with a statement showing in detail the assets (with estimated values) and liabilities to be taken over by the proposed Association, should also be forwarded. The application should also be supported by a statement giving an outline of the work done or in contemplation, with the grounds upon which the application is put forward.

If the Board of Trade are satisfied that the application may be entertained, they will furnish a notice of such application, to be inserted in a local newspaper for the information of the public, and if, after the expiration of a limited time, there appears to be no sufficient reason why the Licence should not be granted, the Board of Trade will accept the Memorandum and Articles of Association with such amendments, if any, as may be necessary, and grant a Licence.

The Board of Trade will require to have the Memorandum and Articles of Association settled on their behalf by Counsel, at the expense of the applicants, for which purpose a fee of £7 12*s*. must accompany the application, made payable to " The Assistant Secretary for Finance, Board of Trade." The Board of Trade will not, however, be responsible for the Memorandum or Articles being properly framed as regards the interests of the Association. No other fees or charges are payable to the Board of Trade, and the fees for registration of the Association may be ascertained by reference to Table II of the Tenth Schedule to the Companies Act, 1929.

THE "LANCET" COMMISSION ON NURSING.

In December 1930 the "Lancet" Commission on Nursing was appointed to inquire into the reasons for the shortage of candidates, trained and untrained, for nursing the sick in general and in special hospitals throughout the country, and to offer suggestions for making the service more attractive to women suitable for this necessary work.

In the preface to their most comprehensive and valuable report the Commission say:

"Lastly, our warm thanks are due to the proprietors of the 'Lancet,' whose public spirit made it possible to conduct this inquiry. Though it has proved far more elaborate than was anticipated, they have encouraged us to spare no expense in the pursuit of investigations that might be expected to be fruitful and add to the value of this Report."

Not only are the warm thanks of the members of the Commission itself due to the "Lancet," but those of the public in general and of the Voluntary Hospitals in particular. The thanks too of all are due to the Chairman and members of the Commission not only for the matter contained in their report, but also for the manner in which it is presented to the reader.

The following are the recommendations of the Commission:

THE GAP BETWEEN SCHOOL AND HOSPITAL.

I. Conditions of service in the nursing profession should be altered in such a way as to attract a far larger proportion of those girls who in any case will stay at school till they are 18.

II. An extensive trial should be made of combined scholarship and maintenance schemes throughout the country for girls of 16 upwards, with possible extension of such schemes to girls of 14. These girls should be chosen, not solely on examination results, but taking into consideration other factors, such as the record and interests of the girl, and probable suitability for nursing. These schemes would be rendered more effective by periodical visits of parties of school-girls to hospitals in their neighbourhood. Such visits would awaken their interest and encourage them to apply, where necessary, for maintenance grants, which could be allocated in accordance with the principles set out in proposition (2) in para. 93 of the Report, which is as follows:—

> Scholarships from the Local Education Authority carrying Maintenance Grants are the best way of meeting the general educational needs of girls who would otherwise leave school early. Such scholarships should not be based solely on success in examinations, but account should be taken also of the general record and interests of the girl, as judged by the head-mistress. The co-operation of an experienced hospital matron might well be enlisted at this stage with a view to deciding whether the candidate is likely to be suitable for nursing. Acceptance of a scholarship should not, however, bind the holder to enter a particular hospital, or indeed any hospital, for training. At the age of 16 the situation might be again reviewed with regard to each girl.

III. The curriculum in these scholarship courses should be general rather than special until the girl has reached 16 or 17, and after 17 anatomy, physiology, and hygiene could be introduced in direct preparation for the first part of a divided Preliminary State examination.

IV. Encouragement should be given to girls who have left school and are occupied in shops or offices during the day to study anatomy, physiology, and hygiene in evening classes in polytechnics, technical schools, and evening institutes, and to take the proposed Part I. of the Preliminary State examination. The same classes could be attended by girls over 17 who are working in various departments of hospitals or in convalescent homes, and possibly by first year nurses at Affiliated, Associated, or Reciprocal hospitals.

COST OF TRAINING.

V. Hospitals should recognise that the nurses are paying indirectly, if not directly, for their training, and that the onus rests on the hospitals to provide good facilities for such training, including expert instruction during hours on duty. To this end a ward sister who has to train successive batches of students should be given extra remuneration, and some relief from other duties, for teaching in the wards.

VI. Neither a maximum nor a minimum standard of payment to probationers is recommended in the present condition of shortage. The policy most likely to attract suitable candidates is that of offering low salaries to probationers and increasing the remuneration of the trained staff.

VII. As an experiment, certain hospitals which are known to give good training should advertise for probationers without offering any remuneration, but offering six weeks' holiday a year and two

short periods of study leave (one week each) during the period of training. Scholarships could be given to ensure the supply of sufficient candidates until the scheme became well known.

VIII. The professional education of nurses should be encouraged by the provision of funds expressly allocated for the purpose—*e.g.*, endowments and State subsidies.

SALARIES OF TRAINED NURSES IN HOSPITALS.

IX. *Staff Nurses.*—While the minimum scale of salary set out by the College of Nursing is adequate at important hospitals, considering that the post is a "learning" one, payment on this scale is unlikely to attract staff nurses to small, outlying, or special hospitals. We advise these hospitals to offer initial salaries between £65 and £80, varying with the experience and amenities provided.

X. *Ward Sisters.*—The minimum salary in hospitals not approved as training schools should be £80, rising to £120. The minimum salary for ward sisters in hospitals approved as partial training schools should be £90, rising to £150. The minimum salary for ward sisters in hospitals approved as complete training schools should be £100, rising after eight years to £160.

If the existing system is adjusted on these lines, we suggest that £10 of the ward sister's salary in approved training schools should be regarded as a fee for teaching.

XI. *Non-Resident Posts.*—The inclusive salary and emoluments offered to non-resident sisters should be of not less value than £250 a year—College of Nursing minimum scale for non-resident posts.

XII. *Higher Posts.*—We recommend the universal adoption of the College of Nursing scale of minimum salaries for posts higher than that of ward sister. This scale has already been adopted by many hospital authorities. In the higher administrative posts the responsibilities of the officer increase with the size of the hospital and the allocation of minimum salaries on the basis of the number of occupied beds is equitable.

SALARIES OF DISTRICT NURSES.

XIII. The College of Nursing minimum scale for resident district nurses (£85 to £120) should be adopted by District Nursing Associations, and if an all-inclusive salary is offered, it should be a minimum of £230, rising to £250 after a short term of service.

SUPERANNUATION.

XIV. All voluntary hospitals, institutions, and associations employing nurses should participate in the Federated Superannuation Scheme for Nurses and Hospital Officers.

XV. Early steps should be taken to secure the interchangeability of pension rights among employees of all Local Authorities, whether they have adopted the Act of 1922 or have a Local Act superannuation scheme, and to make provision for superannuation obligatory on Local Authorities.

XVI. Section 8 of the Local Government and Other Officers' Superannuation Act, 1922, should be extended to apply to nurses migrating between employment under Local Authorities adopting the Act, and employment under any institution or association participating in the Federated Superannuation Scheme for Nurses and Hospital Officers, and to nurses leaving hospital to undertake private nursing.

HOURS OF DUTY.

Day Duty.

XVII. The span of work should not exceed 13 hours.

XVIII. If on one, or at most two days a week the span should be extended, it should not exceed 14½ hours, and the extra time should be compensated for by extra hours off duty.

XIX. At least 1½ hours should be allowed for meals during the span, of which 40 minutes should be allocated to midday dinner.

XX. Not less than three clear hours off duty, independent of meal times, should be allowed during the span every day.

XXI. One free day each week should be allowed.

Night Duty.

XXII. The hours of night duty should not exceed 57 in any week.

XXIII. The span of night duty should not exceed 11 hours, and should be less if possible.

XXIV. If on three nights a week at most the span should be extended to 12 hours, this should be compensated for by a shorter span on the remaining nights.

XXV. If the span is 11 hours or more, 1½ hours in all should be allowed off duty for meals and rest.

XXVI. One free night should be provided every week irrespective of three-monthly breaks.

XXVII. No nurse, except a night sister engaged as a permanent officer, should be on night duty for more than three months in any year.

CONDITIONS OF ADMISSION AND SERVICE.

Probationers.

XXVIII. The forms of application sent to candidates and the Hospital Rules supplied to probationers should be revised and modernised where necessary.

XXIX. A clause requiring long notice of withdrawal should be substituted for the threat of fines or other penalties for breach of contract.

XXX. The matron should have power to suspend, but not to dismiss, a probationer pending investigation by a committee of the Board of Management.

XXXI. A separate bedroom should be provided for each nurse; the number of bathrooms should be adequate; and the common rooms and dining-room should be airy and well appointed.

XXXII. A varied and well-cooked diet should be provided. In large institutions an expert in domestic science should be appointed to undertake the housekeeping and supervise the cooking.

XXXIII. The supervision exercised over a probationer in the Nurses' Home should be relaxed; for example, she should not have to retire to bed before 10.30 p.m., or to put out lights half an hour after retirement. The privacy of her bedroom should be respected. Permission to smoke should not be unduly restricted.

XXXIV. The Nurses' Home should be run on informal lines as a hostel under a Warden.

XXXV. Off-duty time should be arranged in advance, so that the probationer knows *at least* a week beforehand between what hours she will be free on a given day.

XXXVI. A probationer on day duty should be free to go out between the time she comes off duty and bedtime without special permission.

XXXVII. Some measure of telephone facilities should be provided, and where possible reception rooms for guests should be available in the Nurses' Home.

XXXVIII. Attendance at meals adjacent to off-duty time should not be compulsory.

XXXIX. Not less than three weeks' annual holiday should be allowed.

Trained Nurses.

L. Sisters and staff nurses should be given improved conditions of service, on lines suggested in paras. 268 and 269 (*of the Report*).

LI. Where the provision of fresh accommodation for nurses is under consideration, the possibility of giving some of the nurses the alternative of living out by the offer of non-resident allowances should be explored.

LII. Efforts should be made to attract girls with administrative ability into the profession.

LIII. Posts as staff nurse should be reserved for fully trained nurses.

PROFESSIONAL EDUCATION.

XL. The *Preliminary State examination* of the General Nursing Council should be divided into two parts: Part. I.—Anatomy, Physiology, and Hygiene; and Part II.—Theory and Practice of Nursing.

XLI. Part I. should as a rule be taken before, but not more than two years before the nurse enters the wards. If a hospital wishes to admit a girl who has not taken Part I., or has failed in Part I., this should not be forbidden, provided that she is not admitted to lectures in medicine and surgery, or to Part II., before she has passed Part I. A girl who had taken Part I. more than two years before she entered hospital might be required to take it again.

XLII. The General Nursing Council should recognise as centres where the lectures for Part I. can be given, any institutions, including secondary schools, where adequate arrangements have been made to give this tuition, and in which the tuition provided is not inferior to that provided at hospitals approved as Affiliated, Associated, or Reciprocal hospitals. The lectures should be given either by a medical man or woman, or by one who holds a university degree in these subjects, or a certificate from one of certain specified physical training colleges.

XLIII. The General Nursing Council should exempt from any subject in Part I. anyone who holds a university degree which includes that subject, or has passed an advanced examination in it—*e.g.*, an Intermediate examination in science.

XLIV. Questions in the *Final State examinations* for all parts of the register should be confined to nursing treatment, and should not involve systematic medicine, surgery, gynæcology, or psychiatry.

XLV. Hospital authorities should assume responsibility for releasing a nurse from duty at least on the day before, as well as on the day of, her final written and oral examinations.

XLVI. Sister tutors should be provided in the proportion of not less than 1 to every 60 nurses in training.

XLVII. Sister tutors should not be required to undertake any duties other than those connected with education.

RECOGNITION OF PREVIOUS TRAINING.

XLVIII. The General Nursing Council should empower all hospitals approved as complete training schools giving a three years' course to make an allowance for time spent in any other approved training school, provided satisfactory evidence of such service is produced.

DOMESTIC WORK IN HOSPITALS.

XLIX. A redistribution between nurses and ward-maids of the domestic work in the wards of hospitals is urgently required. We recommend the provision of sufficient ward-maids to relieve nurses of domestic duties not directly concerned with the patient.

STAFFING OF NON-APPROVED HOSPITALS.

LIV. Hospitals which are not approved by the General Nursing Council should not seek to enlist probationers for training, but should be staffed by trained nurses and domestic workers.

TUBERCULOSIS HOSPITALS.

LV. In the Supplementary part of the register containing the names of nurses trained in the nursing of persons suffering from infectious diseases, a special section should be included in which should be placed the names of nurses trained in the nursing of patients suffering from tuberculosis.

LVI. Higher pay, greater amenities, and long holidays should be offered in connexion with work in sanatoria.

MENTAL HOSPITALS.

LVII. The filling of ward sisters' and higher posts by nurses who have had a general as well as a mental hospital training is desirable. Greater facilities for fully trained mental nurses to take a two years' course in general hospitals are urgently required.

LVIII. The provision of teaching, and accommodation for study, should be adequate; and probationers should be encouraged to undergo progressive training. Hospitals which have sought and obtained approval by the General Nursing Council as training schools should provide teaching for the State examinations.

LIX. Special care should be taken that young, inexperienced probationers do not begin their work in wards where the patients are likely to be abusive, noisy, or violent.

LX. The stretch of work during which no meal is provided should never be as long as 7 hours.

LXI. Advertisements should show clearly what is the net salary offered at the time of appointment, and nurses in hospital should be furnished on pay-days with a statement showing the gross amount due to them and the deductions which have been made.

TRAINING SCHOOLS FOR NURSES.

A LIST of hospitals approved by the General Nursing Council for England and Wales as training schools for nurses is published by the Council, and can be obtained from the offices of the Council, 20, Portland Place, London, W. 1, or a copy may be referred to at the offices of the Central Bureau of Hospital Information, 12, Grosvenor Crescent, London, S.W. 1.

The list is compiled upon the following basis :—

1. FOR TRAINING IN GENERAL NURSING.

   (a) *Complete Training Schools.* Hospitals which have satisfied the General Nursing Council that medical, surgical, gynæcological and children's diseases services are provided. At least one resident medical officer must be kept, the period of training must be not less than three years, and the ratio of medical to surgical beds must not exceed 2 : 1, or be less than 1 : 2.

   (b) *Affiliated Hospitals.* Hospitals which are not considered sufficiently large to give a complete training, but may be affiliated to a complete training school. Four years' training is here compulsory, two years being spent in the affiliated hospital, at the end of which the Preliminary State examination is taken. Having passed this examination, the probationer goes to the larger hospital for two years.

   (c) *Associated Hospitals.* (1) Hospitals deficient in one branch of training may, in order to supply that branch, associate themselves with another hospital which must have a resident medical officer. The combined period of training must extend over three and a half years. (2) A hospital for men only may associate itself in this way with a hospital for women only and one for children only, when the course may extend over four years.

   (d) *Reciprocal Hospitals.* Reciprocity between special and general hospitals involves two years in an approved special hospital, and two years in a general hospital. Training in the special hospital must include the subjects of the Preliminary State examination.

2. FOR TRAINING OF MALE NURSES.

   (a) *Hospitals approved for Complete Training.*
   (b) *Hospitals approved for Affiliated Training.*

3. FOR TRAINING OF MENTAL NURSES AND NURSES FOR MENTAL DEFECTIVES.

4. FOR TRAINING IN SICK CHILDREN'S NURSING.

5. FOR TRAINING IN FEVER NURSING.

6. HOSPITALS PROVISIONALLY APPROVED.

THE FEDERATED SUPERANNUATION SCHEME FOR NURSES AND HOSPITAL OFFICERS (CONTRIBUTORY).

FULL particulars with regard to the basis of this scheme were given in the 1931 edition of the "Hospitals Year-Book." The scheme continues to make progress and at the 1st April, 1932, the number of participating institutions was 529, containing a bed complement of 48,383, made up as follows :—

GEOGRAPHICAL ANALYSIS, 1ST APRIL, 1932.

	No. of Participating Institutions.	Branch Institutions (Convalescent Homes, Sanatoria, etc.).	Total No. of Participating Institutions.	Total Participating Bed Complement.	Percentage Participating (Beds).
London	126	11	137	14,737	82%
England (excluding London)...	274	72	344	28,240	58%
Wales	13	3	16	1,153	42%
Scotland	19	9	28	4,023	41%
Irish Free State and Overseas	2	—	2	230	—
Totals	434	95	529	48,383	61%

SIZE-GROUP ANALYSIS, 1ST APRIL, 1932.

Size Groups.	No. of Participating Institutions.	Branch Institutions (Convalescent Homes, Sanatoria, etc.).	Total No. of Participating Institutions.	Total Participating Bed Complement.	Percentage Participating (Beds).	
No. 1. 500 Beds and over	12	13	25	8,278	86%	
No. 2. 400 to 499 Beds	9	12	21	4,051	100%	81%
No. 3.—300 to 399 Beds	20	13	33	6,907	71%	
No. 4. 200 to 299 Beds	27	16	43	6,618	76%	
No. 5. 100 to 199 Beds	108	23	131	13,929	66%	
No. 6. 75 to 99 Beds	40	5	45	3,378	57%	
No. 7. 50 to 74 Beds	44	3	47	2,625	39%	47%

The Scheme is under the management and control of an Executive appointed by and from the Central Council. The Central Council, which is Incorporated, consists of representatives of Institutions that have adopted the Scheme. Nurses and Hospital Officers also have representation on the Council and on the Executive.

The Registered Office of the Scheme is 1*a*, Henrietta Street, Cavendish Square, London, W. 1, and the Secretary will gladly supply further information.

THE WORK OF A HOSPITAL ALMONER *

DUTIES.

1. To ensure as far as possible that all patients shall benefit to the full by the treatment prescribed.
2. To act as a link between the hospital and outside agencies, State or Voluntary.
3. To acquire a knowledge of the patient's circumstances and home conditions, for the use of the Medical Staff.
4. To organise the after-care of the patient on discharge.
5. To check abuse of the hospital by patients who are
   (*a*) in a position to pay for private treatment,
   (*b*) entitled to the services of a panel doctor and not requiring special hospital treatment,
   (*c*) unsuitable for treatment in a Voluntary Hospital.
6. To assess the patients and collect their contributions towards the cost of treatment and maintenance, if required to do so by the hospital authorities.

In the Out-Patient Department.

Where possible the almoner interviews all new patients after they have seen the doctor, in order to secure their co-operation in the treatment prescribed, and to assist them in carrying out the doctor's recommendation. A confidential talk in the almoner's office may result in the adoption of a plan which had seemed to the patient impracticable.

In the Wards.

It is obvious that the peace of mind necessary to the patient's recovery cannot be obtained if he has financial or family worries. Satisfactory home arrangements may have to be made by the almoner to prevent the patient from discharging himself prematurely. In addition, much of the skill and devoted care of the Medical and Nursing Staff may be nullified unless there is someone whose duty it is to arrange for the patients to carry out the instructions they have received on discharge.

Convalescent and Instrument Work.

A period at a convalescent home may give the best chance of permanent benefit from hospital treatment, and also make an earlier discharge possible, thus releasing a bed for another urgent case. All social and financial arrangements regarding convalescence and instruments are made by the almoner in co-operation with outside agencies. By supervision in the home the appliance can be correctly worn and kept in repair. In some instances the home conditions are such that this can only be achieved by institutional care, and any such plan must be carried out by the almoner.

After-Care.

The opportunities for Social Service in the after-care of patients are unlimited. The immediate need may be a district nurse, a friendly visitor, a change of environment, an ambulance to or from hospital, an invalid chair, extra nourishment, special diet, clothing, suitable employment, etc., etc., varying from the special education of an individual to the emigration of a family.

All after-care arrangements are, of course, carried on under the direction of the Medical Staff.

THE SELECTION AND TRAINING OF STUDENTS.

This summary of the duties of a hospital almoner indicates the wide scope of the work. It is clear that women of character and personality are required, and that they will need special training for this branch of social service.

The Institute of Hospital Almoners has always required a high standard of its students. It is desirable that candidates should have had a sound education up to the age of 18 with a background of general culture. In practice it is found that the work appeals very greatly to women who have had

* Reprinted from a pamphlet issued by the Institute of Hospital Almoners.

OBJECTS OF THE INSTITUTE.

1.—To select, train and arrange for the training of, suitable candidates for the work of Hospital Almoners.
2.—To grant certificates to trained and qualified students.
3.—To keep a register of trained Almoners.
4.—To recommend trained Almoners to Hospital Authorities.
5.—To extend and develop the work of Hospital Almoners.

a University education, and also to some who have held other posts and who seek wider scope for their energies and sympathies.

Candidates should be between the ages of 20 and 35, but no certificate is granted under the age of 22.

Every candidate is interviewed by a Selection Committee, and has, before the interview, an opportunity of spending two days in an almoner's department in order to see something of the work at first hand.

It is essential that every almoner should have a sound knowledge of economics and social conditions, of social legislation and of the many agencies that exist for the assistance of those in distress as well as a thorough understanding of the functions of an almoner's department and its place in hospital administration.

The training provided by the Institute of Hospital Almoners varies according to the academic qualifications of the student and may be divided into three parts; theoretical, instruction in practical social work of a general nature, and practical experience at hospital under the guidance of a certificated almoner.

Students without academic qualifications must qualify for the Social Study Diploma or Certificate of a University School of Social Study. This requires two academic sessions of nine months each. Four months' training with the Charity Organisation Society is required, which may be completed during the University course if two consecutive months are given during the long vacation. The training at hospital requires eleven months' full time work, which may be divided into two parts, one before and one after the academic work.

Students who hold a Social Study Diploma or Certificate from a University may be accepted for a practical training of eleven months' hospital work, provided that they have completed practical work which can be accepted by the Institute as the equivalent of four months' training in family case work with the Charity Organisation Society.

Students who hold a University degree in History, Economics or Psychology undertake only the practical training of fifteen months, which comprises four months' training with the Charity Organisation Society and eleven months' work with a certificated almoner at hospital.

Other graduates may be accepted for a two years' training comprising one session at a University School of Social Study and fifteen months' practical work as above.

Candidates who are accepted for practical training only may begin the course at any time. For other students the academic session begins in October, and it is advisable that some months' practical work should be undertaken before that.

CERTIFICATES.

Certificates are granted to students who have passed the University examinations and who have obtained satisfactory reports on their practical work. The Executive Council reserves to itself the right to extend or to terminate a students' training at any time should the reports on her work be unsatisfactory.

FEES.

University Fees for the Diploma or Certificate course must be paid direct to the University concerned. These vary from about thirty to fifty guineas for the two years' course. The fee to the Institute is twenty guineas, which includes both Charity Organisation Society and hospital training. The Institute fees are payable in three instalments at stated dates.

PROVINCIAL TRAINING.

Selection and Advisory Committees have been appointed in connection with the Universities at Leeds, Liverpool, Birmingham and Newcastle. The whole of the academic work and part of the practical training can be undertaken in these cities, but all students are required to take part of their practical training in London.

FEES.

Students accepted by local Selection and Advisory Committees are required to pay to the Institute a fee of ten guineas (exclusive of Charity Organisation Society training), and to the local committee such other fees as they may determine. The cost of Charity Organisation Society training, when required, is five guineas.

OFFICES.

The offices of the Institute are in Tavistock House (North), Tavistock Square, W.C. 1 (in the British Medical Association House), and the Secretary will be glad to see by appointment anyone who is interested in the work or who desires further information.

THE OFFICIAL TRUSTEES OF CHARITABLE FUNDS.

Office : Ryder Street, St. James's, London, S.W. 1.
Official Trustees : H. D. S. Leake, J. E. C. Adams, A. E. McLaren, O.B.E.

1. The Official Trustees of Charitable Funds (who are Officers of the Charity Commissioners appointed by them from time to time with the approval of the Treasury) were constituted for the express purpose of holding Stocks, Shares, Securities and Moneys affected by Charitable Trusts. The Official Trustees of Charitable Funds were incorporated by the Charitable Trusts Act, 1925 (15 Geo. V, c. 27).

2. By the Charitable Trusts Acts, provision is made for the transfer or payment to the Official Trustees of Charitable Funds, of Stock or Money in trust for a Charity, by any Person, and especially by Trustees or other holders of Charitable Funds—by the Representatives of those Persons—and by Persons desirous of discharging any Legacy or Charge given or made to or for the benefit of any Charity.

3. A Payment or Transfer may be made to the Official Trustees of Charitable Funds under these provisions, in pursuance of an Order of the Board of Charity Commissioners for England and Wales for that purpose, which furnishes, by express Statutory provision, a complete Indemnity to all Companies and Persons making a Payment or Transfer or otherwise acting in obedience to it.

4. The Official Trustees have no power to interfere in the administration of the Income, or in the management of any Charity, and their duty is confined to remitting periodically the Dividends and Income of the Funds standing in their name, through a Banker or otherwise, to or according to the order of the administering Trustees of the Charity in Trust for which the Funds are held, for the purpose of being applied by them to the objects of the Trust.

5. The general advantages of vesting Charitable Funds in the Official Trustees are as follows :—

(*a*) The complete Statutory Indemnity afforded to the Trustees or Administrators of a Charity.

(*b*) The Dividends on all Securities held by the Official Trustees are remitted without deduction of Income Tax, from which the income of Charitable Funds is, by Law, exempt. The administering Trustees are thus spared the inconvenience of claiming from the Inland Revenue Department a return of the Tax deducted as in the case of Dividends on Securities which are not held by the Official Trustees.

(*c*) The necessity for periodical Transfers of Stock and other Securities upon appointments of new Trustees, at a constantly recurring cost to the Charity, is obviated.

(*d*) Charitable Funds held by Individual Trustees, in course of time frequently become vested, either in a single surviving Trustee, or in a personal Representative of a surviving Trustee, or in some other stranger to the Trust, or again, they remain either uninvested or invested in unauthorised Securities. All risk to the security or productiveness of Trust Funds which may thus arise is avoided where Funds are vested in the Official Trustees.

(*e*) Where, especially on the foundation of a Charity, Funds are in the hands of Persons, whether Executors or others, who are not constituted, or do not desire to become the administering Trustees of the Charity, they can, by vesting the Trust Fund in the Official Trustees, not merely relieve themselves of responsibility for its safe keeping but may ensure its due application in conformity with Trusts attaching to it, by applying for Trustees to be duly appointed by the Board.

6. It is obvious that, apart from personal considerations, considerable risk of loss, or of the occurrence of difficulty in tracing the existence of Trust Funds, arises, both where Stock or other Securities are held by a single Individual or by strangers to the Trust, and also, where sums of Cash are allowed to remain in private hands uninvested. In these cases the devolution of the Fund, on the death of the holder, must almost certainly take a course foreign to the Trust, and the property of the Charity may probably become mixed with, and undistinguishable from, private funds. In any of these cases it will be the duty of the Commissioners, in accordance with the invariable practice of Courts of Equity, to take steps to ensure the safe custody of the Fund by means of its Transfer or Payment to the Official Trustees.

7. The number of separate Charities of which accounts were rendered to the Charity Commissioners during the year 1931 was 51,617, while the like number for the year 1930 was 49,349. The total number of accounts received during 1931 was 82,532.

The total sum of stocks and investments held by the Official Trustees on 31st December, 1931, amounted to £79,936,233. This sum is irrespective of 239,957 American Dollars, 76,300 Rupees, 161,800 Francs, 6875 Gold Roubles, 6000 Kronen, 4000 Pesos, 3000 Reichsmarks, and £19,187 Annuities.

The Aggregate Income derived from the stocks, securities and annuities held by the Official Trustees amounted for the year 1931 to £2,765,954.

NEW BUILDINGS OR EXTENSIONS COMPLETED BY VOLUNTARY HOSPITALS DURING THE LAST TWO YEARS.

Numbers 1 to 37 have already been published ; numbers 38 to 50 follow.

Copies of these Memoranda can be obtained at a small charge from the Director of the Bureau, 12, Grosvenor Crescent, London, S.W. 1.

CONTRIBUTORY SCHEMES.

THE answers to the questionnaire that was sent out to those responsible for the management of contributory schemes and to hospitals interested in their establishment have been summarised after the following method :—

The replies have been divided into two main classes :

(*a*) Those based upon experience.
(*b*) Those expressing views and opinions.

Each of these classes has been divided and subdivided. Firstly upon the basis of whether the contributory scheme is or should be run by the hospital, and secondly upon the basis of whether it does or does not, or it should or should not, guarantee definite benefits to the contributors.

Possibly guarantee is too strong a word, but those who are acquainted with the combination of self-help and charity which is characteristic of contributory schemes will understand what meaning to attach to the word. There is probably no contributory scheme in England where the contributor possesses a legal right to treatment. At any rate there is, so far as is known, no instance of any attempt to test the legality in the Law Courts of a refusal on the part of a hospital to admit a patient. This may be more due to a tacit understanding on the part of both hospital and contributor than to the absence of any contractual relationship between the two. However this may be, the benefits of joining a contributory scheme are definitely stated in the leaflets of a large number of schemes, and there can be no doubt that such statements provide some inducement to join. They would not otherwise be there.

456 replies in all were received, but of these 126 felt themselves unable to answer the questions or express any definite opinion. Of the 330 replies reviewed in this Memorandum some did not answer all the questions. The totals, therefore, in the various schedules which follow do not agree.

Question 1. What class of the community should be asked to support the hospitals by contributory methods? Can the class be expressed in terms of income? If so, please so express it.

SCHEDULE I.

Replies from	*Answers.* *Limits of Income.* For this purpose the highest rate of contribution under each scheme has been used.										
	All classes	Not liable to pay income tax.	National Health Insurance limit.*	British Medical Association scale.†	Not exceeding £4 per week.	Not exceeding £5 per week.	Not exceeding £6 per week.	Higher income limits.	No income limits stated.	Weekly wage earners.	Total reviewed
Group 1. *Existing schemes run by outside organisations.*											
(*a*) With definite benefits to the contributors	—	1	5	—	2	2	6	5	4	5	30
(*b*) With no stated benefits ...	—	—	3	3	2	6	17	—	19	—	50

(*a*) With definite benefits to the contributors	8	1	1	12	2	16	19	4	4	10	77
(*b*) With no stated benefits ...	5	2	4	2	—	1	4	3	1	2	24
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*											
(*a*) With definite benefits to the contributors	—	—	1	1	1	2	1	2	—	1	9
(*b*) With no stated benefits ...	1	—	1	—	3	—	—	2	—	1	8
	14	3	7	15	6	19	24	11	5	14	118

* Persons engaged in manual labour no limit; persons engaged otherwise than by way of manual labour £250.
† Single person over 16, or widow or widower without children under 16, £4 a week.
Married couples without children under 16, or persons with one dependent under 16, £5 a week.
Married couples with a child or children under 16, or persons with more than one dependent under 16, £6 a week.

The trend of opinion is definitely in favour of a statement of benefits. The majority of schemes run by hospitals give stated benefits, while the reverse is the case where schemes are run by outside organisations. Possibly the reason for this is that, included in the former, there are a considerable number of newly formed schemes. The same tendency may be observed in Group 3, opinion running largely in favour of stated benefits.

With regard to the matter of income limit, 245 out of 330 have, or are in favour of, a limit not exceeding £6 per week (if we include those described in the replies as " weekly wage earners "). Only 25 out of 118 suggest either a higher limit than £6 or no limit at all.

Question 2. Upon what grounds, in your opinion, should the invitation to become a contributor be based?

The sub-division of the groups in the schedules is based largely upon the replies to this question. It is, however, desirable to draw attention to the kind of answers received. The following quotations bear out the observation already made with regard to charity and self-help.

Group 1(*a*).

Hospitals are principally for the use of wage earners, and their contributions should give them a sense of independence when using same.

Upon the grounds that free treatment and maintenance is offered to a contributor if in hospital.

Upon the grounds that when contributors need hospital treatment they will have paid for what they receive and not be taking charity.

As an insurance.

Treatment in hospital free of charge.

It is a form of insurance against ill health.

Group 1(*b*).

Support of the local hospital on the voluntary system.

We cannot do without hospitals and no one knows who will be next to be taken in.

To help the hospital and one another.

To maintain their hospital and to benefit the members when in need.

A community ideal of service expressed in contribution towards the need of others.

Group 2(*a*).

To provide for sickness and to assist others.

Upon the ground that a small weekly payment will entitle the contributor and his dependents to free treatment should this be required.

By paying a small amount weekly they are entitled to free treatment should necessity arise, and also that it is a method of co-operation where the fortunate help the unfortunate.

A sound economic investment.

An insurance against illness and also a means of assisting a hospital.

On the grounds of duty towards himself, his dependents, and fellow men.

Because it is impossible for those earning small incomes to pay charges when most in need.

It is better to contribute small regular sums when well than to meet cost of treatment when sick.

Group 2(*b*).

To support the hospital.

To assist the hospital and the contributor if in need.

To meet the expenditure necessarily incurred in treating wage earners.

The support of the local hospital and assistance of more unfortunate comrades.

Group 3(*a*).

(1) Self protection. (2) The maintenance of hospitals.

Inability to pay for necessary services.

The advisability of making provision for medical and surgical treatment when in health.

Upon the principle of obtaining benefit by co-operation rather than by charity.

Upon the grounds of their income being inadequate to meet the cost of special treatment when necessary.

To provide specific benefits in return for the subscriber's contributions.

Self protection.

A form of insurance.

The spirit of self-help and help of others.

As a personal insurance against necessary expenditure at a time when illness is a sufficient trouble in itself.

On the ground that all may need the help of the hospital some day.

Group 3(*b*).

To assist hospitals by supplying a regular source of income.

Voluntary help to maintain the services which are mostly used by the classes admitted to the scheme.

To assist fellow workers in need.

Up-keep of the hospital ready for any emergency.

In order that an efficient hospital may be maintained against the contributor's needs and also as an act of charity.

Group 4(*a*).

To assist working classes.

No liability for doctors or hospital bills on leaving hospital.

Upon the ground of the hospital being available in emergency of illness or accident.

The wisdom of ensuring during good health provision for hospital services.

It is one's duty to provide for treatment for oneself and family.

Group 4(*b*).

Entirely voluntary contribution.

The assurance of the future of the voluntary hospitals.

The imperative duty of everyone to do their best for others as well as themselves.

The support of a necessary charity.

Question 3. What is the actual contribution in your case, and upon what is it based? If you are contemplating a Contributory Scheme, upon what do you think the amount of the contribution should be based?

SCHEDULE 2.

Replies from	*Answers.* Contributions per week. For this purpose the highest rate of contribution under each scheme has been used.									
	1*d.*	1½*d.*	2*d.*	3*d.*	4*d.*	Higher rates.	1*d.* in £ earned.	1½*d.* in £ earned.	2*d.* in £ earned.	Total giving details.
Group 1. *Existing schemes run by outside organisations.*										
(*a*) With definite benefits to the contributors	4	—	15*	7	3	1	—	—	—	30
(*b*) With no stated benefits ...	4	—	16†	12‡	10	—	5§	—	—	47
Group 2. *Existing schemes run by hospitals.*										
(*a*) With definite benefits to the contributors	14	2	31	25	3	2	3	—	—	80
(*b*) With no stated benefits ...	11	3	16	5	3	3	2	1	2	46
	33	5	78	49	19	6	10	1	2	203
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*										
(*a*) With definite benefits to the contributors	1	1	8	14	2	—	8‖	—	—	34
(*b*) With no stated benefits ...	—	—	2	3	2	—	5	—	—	12
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*										
(*a*) With definite benefits to the contributors	—	—	3	—	—	—	—	—	—	3
(*b*) With no stated benefits ...	1	—	—	—	—	—	—	—	—	1
	2	1	13	17	4	—	13	—	—	50

* 1 of which asks 25 per cent. in addition from employers.
† 1 of which asks employer for 2*s.* a year and 1 makes certain charges to contributor patients.
‡ 1 of which asks for an additional 1*d.* for each child.
§ 3 of which ask employer for a percentage addition—33⅓ per cent. in two cases.
‖ 2 of which would ask the employer for a percentage addition.

As might naturally be expected, many of those without schemes express no opinion on this point.

The following cross-reference may possibly be justified. Attention has already been called in Schedule 1 to the fact that the majority are in favour of income limits not exceeding £6 per week. It will be seen from Schedule 2 that 157 out of 253 consider a weekly payment of 2*d.* or 3*d.* appropriate. Whether 3*d.* per week is a sufficient amount to meet the benefits offered by some, is matter for actuarial calculation when (and not until) there is more certainty with regard to :—

(*a*) the benefits offered,
(*b*) the incidence of sickness,
(*c*) the number of persons covered by the weekly payment.

Question 4. Should contributory schemes be undertaken, organised and run, by an individual hospital (with or without associated hospitals) or should they be undertaken, organised and run, by an independent body?

The answers to this question provided the basis for the classification of the schemes into Groups 1, 2, 3 and 4 given in the schedules.

Here may be traced the influence of publicity and a definite policy, *e.g.* that to be found in the pamphlet issued by the British Medical Association.

Question 5. How should funds raised by contributory methods be allocated?

SCHEDULE 3.

Replies from	*Answers.*					
	Services rendered.	*Total to hpl. or hpls. to which scheme is attached.	Grants to hpls. according to need.	On a percentage basis.	According to No. of beds provided.	Total expressing an opinion.
Group 1. *Existing schemes run by outside organisations.*						
(*a*) With definite benefits to the contributors	11	13	1	4	—	29
(*b*) With no stated benefits	24	16	5	—	—	45
Group 2. *Existing schemes run by hospitals.*						
(*a*) With definite benefits to the contributors	9	58	—	5	2	74
(*b*) With no stated benefits	1	24	—	1	1	27
	45	111	6	10	3	175
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*						
(*a*) With definite benefits to the contributors	63	3	—	3	1	70
(*b*) With no stated benefits	19	—	—	—	—	19
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*						
(*a*) With definite benefits to the contributors	3	3	—	—	1	7
(*b*) With no stated benefits	1	3	—	—	1	5
	86	9	—	3	3	101

* Includes some cases which make payments to other hospitals for services rendered and certain auxiliary services.

Again the trend of opinion is plain. In existing schemes 111 out of 175 hand over the total contributions to the hospitals. 86 out of 101 considering schemes are in favour of payment for services rendered.

Question 6. What auxiliary services (*e.g.* convalescent homes, ambulances, district nursing, etc.) should in your opinion share in the money received, and to what extent?

SCHEDULE 4.

Replies from	*Answers.* Number of schemes providing or recommending the provision of auxiliary services out of contributory funds.										
	Conv. homes, dist. nursing and ambulances.	Conv. homes and ambulances.	Conv. homes and dist. nursing.	Dist. nursing and ambulances.	Conv. homes only.	Dist. nursing only.	Ambulances only.	Auxiliary services not provided but considered desirable.	None provided or against the principle.	Expressing no opinion.	Total reviewed.
Group 1. *Existing schemes run by outside organisations.*											
(*a*) With definite benefits to the contributors	10	—	1	2	—	—	7	2	6	2	30
(*b*) With no stated benefits ...	15	5	3	6	4	—	5	1	11	—	50
Group 2. *Existing schemes run by hospitals.*											
(*a*) With definite benefits to the contributors	4	5	2	1	6	2	3	—	21	39	83
(*b*) With no stated benefits ...	9	1	—	—	4	2	2	—	15	16	49
	38	11	6	9	14	4	17	3	53	57	212
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*											
(*a*) With definite benefits to the contributors	29	2	4	3	11	5	2	—	12	9	77
(*b*) With no stated benefits ...	9	3	—	—	4	1	—	—	—	7	24
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*											
(*a*) With definite benefits to the contributors	4	—	—	—	1	1	—	—	—	3	9
(*b*) With no stated benefits ...	1	1	—	—	1	—	—	—	—	5	8
	43	6	4	3	17	7	2	—	12	24	118

Auxiliary services are given by a few schemes in exceptional cases only; these are not included in the above figures. In addition to the auxiliary services mentioned some of the schemes help in the provision of surgical appliances for their members.

72 per cent. of the schemes run by outside organisations include various auxiliary services among the benefits given to their members, whereas in the group of schemes run by hospitals similar provision is made by only 31 per cent.

Several of those which do not allocate a part of their funds to auxiliary services state that the reason for not doing so is that it is not possible to provide them out of the most usual rates of contribution (2*d.* or 3*d.* per week) and at the same time pay the cost of maintenance of their members when in hospital.

In the majority of cases no mention is made of any limitation to the amount allocated to or spent on auxiliary services, but where limitation is mentioned the most common figure is 10 per cent. In a number of cases hospital expenses have priority, auxiliary services sharing in surplus only.

The following are examples of other limitations :—

Auxiliary services limited to those who are hospital patients.

3 per cent. convalescent homes, 2 per cent. ambulance, 2 per cent. district nursing.

5 per cent. to district nursing.

The opinion is expressed by several that services commonly given as " additional benefits " by Approved Societies to their insured members should not be provided by contributory schemes.

Question 7.—Should a contributory scheme pay for the maintenance and treatment of its members in institutions outside its own regional area (*e.g.* voluntary hospitals, municipal hospitals, nursing homes, etc.), and if so, upon what scale or basis?

SCHEDULE 5.

Replies from	*Answers.*								
	Not recommending any payment or definitely against the principle.	Those paying or recommending payment, with no indication of any restriction.	Yes—but only where reciprocal arrangement made.	Yes—to special hospitals only.	Yes—to voluntary hospitals only.	Against nursing homes participating.	Total expressing an opinion.	Agreeing to payments to	
								Municipal hospitals.*	Nursing homes.*
Group 1. *Existing schemes run by outside organisations.*									
(*a*) With definite benefits to the contributors	9	14	—	1	5	—	29	4	—
(*b*) With no stated benefits ...	4	17	1	—	13	8	43	14	—
Group 2. *Existing schemes run by hospitals.*									
(*a*) With definite benefits to the contributors	18	20	5	2	3	1	49	2	—
(*b*) With no stated benefits ...	9	7	3	2	—	1	22	—	—
	40	58	9	5	21	10	143	20	—
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*									
(*a*) With definite benefits to the contributors	7	54	—	—	—	—	61	4	4
(*b*) With no stated benefits ...	3	12	—	—	—	—	15	1	6
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*									
(*a*) With definite benefits to the contributors	—	4	2	—	—	—	6	4	4
(*b*) With no stated benefits ...	2	2	—	—	—	—	4	—	—
	12	72	2	—	—	—	86	9	14

* Included in the previous columns.

Opinion is strongly in favour of payment being made. Only a few make it conditional upon reciprocity. The instances given in the last two columns are the only ones specifically agreeing in the returns to payments being made to municipal hospitals and nursing homes. There may be others.

The schemes which have agreed to payments to municipal hospitals do not in the majority of cases give particulars of the bases of payment. Several of them pay the amount of the assessed fee to the patient, whereas others treat municipal and voluntary hospitals alike. Limitations in other cases are :—

(*a*) Maximum of 13 weeks.
(*b*) £1 per week.
(*c*) Not exceeding 6 guineas per patient.

Question 8. How should difficulties connected with the enrolment of contributors in schemes other than the one organised in the area in which they live, be best adjusted?

This question was found difficult to answer. The problem is really this : Are there any activities that would be better treated on a national or at least on a territorial basis? Among such have been suggested, railway systems, post offices, shipping, etc. If the suggestion is a sound one, how can it be best carried out, and what Bodies ought to be called into conference to consider and advise?

Question 9.—Should payments or allowances be made in respect of contributors occupying beds paying wards?

SCHEDULE 6.

Replies from	*Answers.*		
	Agreeing to the principle but not giving details.	Those giving details of actual or suggested arrangements.	Against the principle.
Group 1. *Existing schemes run by outside organisations.*			
(*a*) With definite benefits to the contributors	1	12	9
(*b*) With no stated benefits	3	23	14
Group 2. *Existing schemes run by hospitals.*			
(*a*) With definite benefits to the contributors	—	38	21
(*b*) With no stated benefits	—	15	5
	4	88	49
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*			
(*a*) With definite benefits to the contributors	2	48	16
(*b*) With no stated benefits	1	10	6
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*			
(*a*) With definite benefits to the contributors	—	2	3
(*b*) With no stated benefits	—	2	1
	3	62	26

Though there is a majority in favour of payment being made, there is still a considerable volume of adverse opinion. A large proportion of those objecting did so on the ground that if a patient is in a position to enter a private ward he ought not to be a member of a contributory scheme.

Possibly the real solution of the problem lies in the extension of something of the nature of contributory methods to paying wards. It would not appear that the difference between the annual premium sufficient to *pay for all interests involved* and the 3*d.* or 4*d.* a week of the contributory schemes would be a very large one.

4*d.* a week is 17*s.* 4*d.* a year, while 30*s.* a year has been suggested and tried as an appropriate payment for those who wish to provide beforehand for treatment when they require it in paying beds. It will be interesting to obtain definite information, based upon actual experience, with regard to this most important matter.

In existing schemes which agree to their members occupying paying wards, the most usual arrangement is for the contributory scheme to make an allowance towards the cost; *e.g.*

an allowance of:— (*a*) Average cost in public wards.
(*b*) 10*s.* 6*d.* per week.
(*c*) 21*s.* per week.
(*d*) 25 per cent. off usual fees.
(*e*) 50 per cent. off usual fees.

One scheme has an arrangement whereby an additional payment of 4*d.* per week entitles the contributor to the use of a private ward.

Question 10. Should a hospital have the right to question the bona fides of a contributor applying for treatment?

SCHEDULE 7.

Replies from	*Answers.*		
	Against.	In favour.	Expressing no opinion.
Group 1. *Existing schemes run by outside organisations.*			
(*a*) With definite benefits to the contributors	22	6	2
(*b*) With no stated benefits	28	16	6
Group 2. *Existing schemes run by hospitals.*			
(*a*) With definite benefits to the contributors	5	52	26
(*b*) With no stated benefits	1	17	12
	56	91	46
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*			
(*a*) With definite benefits to the contributors	12	51	14
(*b*) With no stated benefits	2	17	5
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*			
(*a*) With definite benefits to the contributors	—	4	5
(*b*) With no stated benefits	—	4	4
	12	76	28

The majority of those expressing an opinion against the right of a hospital to question the bona fides of the contributor, do so on the grounds that their machinery provides a sufficient protection against abuse. Vouchers are issued to members which before presentation to the hospital have to be counter-signed by the local secretary, or works representative as the case may be, and these vouchers are in some cases certainly, possibly in most, supported by the patient's own doctor.

Question 11. Should payments be made out of funds raised by contributory schemes to members of honorary medical staffs.

SCHEDULE 8.

Replies from	*Answers.*		
	Objecting to any payment being made.	Agreeing to the principle.	Expressing no opinion.
Group 1. *Existing schemes run by outside organisations.*			
(*a*) With definite benefits to the contributors	4	8	18
(*b*) With no stated benefits	23	19	8
Group 2. *Existing schemes run by hospitals.*			
(*a*) With definite benefits to the contributors	36	4	43
(*b*) With no stated benefits	15	1	33
	78	32	102
Group 3. *Hospitals with no existing schemes, but which recommend that schemes should be run by outside organisations.*			
(*a*) With definite benefits to the contributors	20	7	50
(*b*) With no stated benefits	7	2	15
Group 4. *Hospitals with no existing schemes, but which recommend that they should be run by the hospitals.*			
(*a*) With definite benefits to the contributors	2	—	7
(*b*) With no stated benefits	2	—	6
	31	9	78

The following are examples of the bases of payment at present being made :

(*a*) 5 per cent.
(*b*) 20 per cent. of first £1,000, 17 per cent. of next £500, 15 per cent. of the remainder.
(*c*) One-third of any surplus after paying full hospital costs.
(*d*) One-sixth of contributions from non-panel patients.

In a number of schemes the contribution is only intended to meet the hospital costs, and the medical staffs are allowed to charge fees to all patients, whether contributors or not.

It is possibly justifiable to conclude that the large number who express no opinion are waiting for guidance upon the very important general question of the payment of staff.

In order to make the information on the subject of Contributory Schemes as complete as possible, Memorandum No. 4, prepared by the Bureau, has been brought up-to-date and is reproduced as an appendix.

June 1931.

ANALYSIS OF SOME CONTRIBUTORY SCHEMES

Hospital.	Fees payable by non-members.	Subscription per annum.
A (76 beds)	From 10*s.* per day, not including medical attendance.	Single person, widow or widower, without dependents ... £1 1 0 Married couples without dependents ... ... Single persons with one dependent ... ... Widow or widower with one child under 16, or one dependent } £1 11 6 Married couple with all children under 16 ... ... Married couple with no children under 16, with one dependent only ... ... Widow or widower with all children and one other dependent } £2 2 0
B (315 beds)	£4 per week, not including medical attendance.	£1 10 0.
C (41 beds)	Maternity ward, per week £8 8 0 Private wards, per week ... £5 10 0 Extra charge for operating theatre ... ... £1 1 0 X-ray apparatus ... ... 10 6 and medical attendance	Husband and wife and all children under 16 ... ... £2 2 0 Husband and wife only, or widow or widower and all children under 16 ... ... £1 11 6 One person over 16 ... ... £1 1 0 A dependent over 16 of any of the above 10 6
D (78 beds)	From 2 to 5 guineas per week including maternity wards.	One person ... ... 10 6 Married couple ... ... £1 1 0 Married couple and children under 16 ... ... £1 11 6
E (52 beds)	Private ward, per week ... £6 6 0 Two-bed ward, per week ... £4 4 0 Theatre fee ... ... £1 1 0 *Extras :* Special nurse, special dressings or medicines, laundry, wines & spirits.	£2 2 0.

Published October 1928.
Revised June 1931.

FOR "PAYING" OR "PRIVATE" WARDS.

Privileges.	Medical attendance.	Income limit.
Use of a private ward free of hospital fees for a period of 28 days or for such extension as may be recommended by the medical staff.	By arrangement between patient and own doctor.	No restriction.
Free In-patient and certain special Out-patient treatment for himself, wife and children under 16, commencing 6 months after membership. In-patient treatment limited to four weeks except with special permission of the committee.	Premium covers medical attendance. Limited to members of the staff of the hospital.	Single person ... ... £ 350 Married couples without children under 16 ... ... £ 450 Widows or widowers with children under 16 ... £ 450 Married couples with child or children under 16 ... ... £ 550
Free treatment.	By arrangement between patient and doctor. Not restricted to members of the staff of the hospital.	No restriction.
Fees 50 per cent. below normal charges for private wards.	By arrangement between patient and doctor.	No restriction.
50 per cent. reduction off ordinary fees, but not off "extras."	By arrangement between patient and own doctor. Any medical practitioner may attend.	No restriction.
Free treatment for a period not exceeding four weeks, including services of resident medical officer, the use of operating theatre, pathological examinations and reports (unless more than two are required). X-ray examination or treatment *not* included. Benefits commence six months after membership.	By arrangement between patient and doctor. Limited to members of the staff of the hospital.	Intended for those whose incomes do not exceed £ 750 a year.

TO A HOSPITAL.

Re-imbursement of hospital (or nursing home in the case of major operations) charges up to a maximum of £ 5 a week for three weeks. Fees of a resident nurse at usual rates for a period not exceeding three weeks, when subscriber or dependent has been attended at home for an operation or serious illness. Grants at discretion of scheme towards nursing home costs in case of serious illness other than operations. Consultation fees (when arranged by subscriber's own medical attendant)—up to £ 3 3*s*. if called to patient's home or £ 1 1*s*. if patient calls upon him.	By arrangement between patient and doctor.	No restriction.
A contribution not exceeding £ 6 per week for a period of 6 weeks towards the cost of maintenance in a nursing home or paying bed of a hospital. A contribution of £ 2 2*s*. towards the fee of a consultant upon whom subscriber calls (£ 12 12*s*. per annum limit). Contributions up to £ 35 for major operations and £ 10 for minor operations. (£ 50 and £ 10 limits per annum respectively). Also grants towards additional medical services including X-ray, electrical and massage treatments, pathological examinations and anæsthetists' fees.	By arrangement between patient and doctor.	No restriction.

MEMORANDUM No. 39.

CONDITIONS UNDER WHICH HOSPITALS CAN OBTAIN PAYMENT FROM INSURANCE COMPANIES FOR THE EXPENSES OF TREATMENT OF THE VICTIMS OF MOTOR ACCIDENTS, UNDER SECTION 36 (2) OF THE ROAD TRAFFIC ACT, 1930.

KINDLY PREPARED FOR THE BRITISH HOSPITALS ASSOCIATION BY A BARRISTER AT LAW, AND APPROVED BY A LEGAL SUB-COMMITTEE OF THE COUNCIL OF THE ASSOCIATION.

THIS Memorandum has been prepared with the object of explaining in non-technical language the effect of the Road Traffic Act, 1930, in so far as it gives hospitals a claim on insurance companies for the expenses of treatment in hospital of the victims of motor accidents. The Memorandum also deals with certain difficulties that have arisen in practice under the Act, and contains the answers to a number of inquiries that have been received.

It must be realised that Section 36 (2) of the Road Traffic Act is intentionally restricted in its effect, and that, large as is the number of victims of motor accidents who are treated in hospitals every year, insurance companies will only have to make payments to hospitals in respect of such treatment in a very small proportion of cases. This proportion is, in fact, estimated to be about 10 per cent.

1. *Hospitals that are Entitled to Payments from Insurance Companies.*

Payment for the expenses of treatment of victims of motor accidents can be claimed by any hospital that is " an institution which provides medical or surgical treatment for in-patients."

The question has been raised whether this definition includes a hospital where it is usual only to provide nursing and accommodation, leaving the patients to arrange with their own doctors to attend them. The answer is that, so long as there is any medical staff who would ordinarily deal with emergency cases, the hospital comes within the definition. In the rare case where there is no such staff, the answer will depend on the judicial interpretation of the words " medical or surgical treatment "; in the meantime it is recommended that claims should be put in against insurance companies in all such cases.

2. *Conditions under which Hospitals can Claim.*

The right of a hospital to obtain a payment from an insurance company [1] for the expenses of treatment of the victim of a motor accident depends on the following conditions being fulfilled :

(*a*) The victim must, as a general rule, be either (i) a person who was not in the car [2] that was responsible for the accident, or (ii) a person who was a paying passenger in the car. But see also paragraph 3.

(*b*) The insurance company must have made a payment to the victim or his dependents in respect of his personal injury or death. See paragraph 5.

(*c*) The victim must have received treatment in the hospital as an in-patient. See paragraph 6.

(*d*) The hospital must not have made any charge in respect of the victim's treatment. See paragraph 7.

Even when all these conditions *are* fulfilled, the hospital will not *necessarily* be entitled to a payment from an insurance company (see paragraph 4). These conditions are merely the *sine qua non* for any such payment.

3. *Victims in respect of whose Treatment the Hospitals can Claim against Insurance Companies.*

It will be seen from condition (*a*) above that it is only in respect of a very restricted class of victims that the expenses of treatment can be recovered by hospitals from insurance companies.

The owner or driver of the car responsible for the accident will never come within the class.

The car owner's friends or employees, being driven in the car, will come within this class when the policy has been specially so drawn as to include them, but not otherwise. If it is possible for the

[1] Throughout this Memorandum the term " insurance company " is intended to include persons who are, in effect, authorised to be their own insurers on depositing £15,000 with the Supreme Court as a guarantee fund.

[2] Throughout this Memorandum " car " is used as a general term intended to cover every form of motor vehicle, including motor coaches, tractors, motor cycles, etc.

hospital secretary to see the policy issued by the insurance company in any particular case, he will be able to satisfy himself as to the exact classes of persons covered by the policy.

" A person not in the car that was responsible for the accident " of course includes any person in any *other* car that is involved in the same accident, as well as a pedestrian, a rider, etc. The question of responsibility for an accident is often most difficult to decide, especially when more than one car is involved in it, but fortunately, hospitals need not concern themselves with this point, as it will be decided for them (see paragraph 5).

As, however, it will always be difficult for a hospital to know whether it has a good claim for the expenses of treatment of each individual patient, it is recommended that notice should be given to insurance companies concerned of every victim of a motor accident that is admitted to the hospital (see paragraph 9).

4. *Cases in which Hospitals have no Claim against Insurance Companies.*

In the following cases the victim will receive no payment from an insurance company, and consequently the hospital will not be entitled to any payment from the insurance company for the expenses of the victim's treatment.

(*a*) If the driver or owner of the car responsible for the accident is himself killed, or dies before his victim obtains a judgment for damages against him, or before his claim is otherwise settled.

(*b*) If the victim of the accident dies before his claim is decided, and he leaves no dependents who are entitled to claim damages for his death.

(*c*) When the accident has been caused by an uninsured person in a stolen car, or in a car he is not authorised to use.

(*d*) When the accident has been caused by a car owned by a local authority[1] or a police authority, by an invalid carriage (*i.e.* specially designed for use by a person suffering from a physical disability), or by a tram car or trolley vehicle the use of which is authorised by special Act of Parliament or Order.

5. *Payment by Insurance Company to the Victim or his Dependents.*

Many inquiries have been received as to whether it is necessary to prove the negligence of the car driver before the hospital can recover a payment from the insurance company. The answer is that *the hospital* is not concerned with any question of negligence, but must merely ascertain whether any payment to the victim or his dependents has in fact been made by the insurance company under its policy; if such a payment has been made, then the insurance company must also make a payment to the hospital in respect of that victim's treatment.

In point of fact the insurance company will only make this payment to the victim either (i) if it is agreed, or has been decided in Court, that the car owner or driver insured by this company was responsible for the accident, or (ii) if responsibility is not proved or admitted, but the insurance company, in order to avoid legal proceedings, makes a payment to the victim by way of a compromise of his claim—called a " compassionate grant."

A question has also been raised as to the effect of a compassionate grant. The payment of a so-called " compassionate grant " to the victim of a motor accident is clearly such a payment as will fulfil condition (*b*) in paragraph 2 above, though some insurance companies appear to be unwilling to admit this.

As the recovery by hospitals of expenses of treatment from insurance companies depends on the victim having actually received some payment in respect of his injury, it may possibly be worth the while of hospitals to consider whether they could obtain the honorary services of a local solicitor to look into the claims of victims (being patients in hospital) who either neglect, or have not the means, to take the necessary steps for pressing their claims themselves.

6. *Expenses of Treatment that can be Recovered.*

The claim of a hospital against an insurance company is limited to £25 for each patient.

Subject to this, the hospital can claim, at the rate of the average cost of an occupied bed per day, for the number of days that the victim has been treated as an in-patient. The average cost of an occupied bed per day is arrived at by taking the hospital's total annual expenditure on the maintenance

[1] Although not under any legal obligation to make payments to hospitals, a ocal authority may be expected to meet any reasonable request for a refund of expenses of treatment of a victim to whom that Authority has incurred a liability.

of the hospital and its staff, and on the maintenance and treatment of patients, and dividing this figure by the total of daily counts of in-patients.

The view taken by some hospitals, that " treatment " in a hospital includes out-patient treatment as well as in-patient treatment is very difficult to support. In our opinion claims for payment can only be made in respect of in-patient treatment.

The question has been asked whether any extra payment can be claimed for an operation or for any special form of treatment. The answer is in the negative.

There appears to be an idea that the Act would allow a hospital to pay its medical staff special fees for attending motor-accident patients, and to increase the costs to be recovered from an insurance company by the amount of such fees. It is quite clear that the Act does not allow of this being done. As is pointed out above, the costs per day to be recovered for a motor-accident patient must be the same as the average cost for *all* the patients in the hospital.

7. *Charges made by a Hospital for Treatment.*

Condition (*d*) in paragraph 2, that " the hospital must not have made any charge in respect of the victim's treatment " gives rise to several difficulties, and raises the question as to what payments hospitals can receive from victims without losing their claim against insurance companies.

(a) *Voluntary payments by victim.* It seems clear that a purely voluntary payment by a victim to the hospital cannot legally prejudice the hospital's claim for a subsequent payment from the insurance company. Whether it is quite fair to insurance companies that hospitals should receive both payments is another matter, and this question might well be considered when some general agreement between hospitals and insurance companies is being negotiated.

(b) *Invitation to pay part of cost of treatment.* In hospitals where the usual practice is to invite patients to make such payment as they are able towards the expenses of their treatment, the question has been raised whether the acceptance of such a payment from the victim of a motor accident could be considered as " making a charge." Although the matter is not free from doubt, it is thought that such a payment may safely be treated as a voluntary payment; but care should be taken that the payment is expressly made as a " donation."

(c) *Practical difficulty of deciding whether to make a charge or not.* When it is the practice in hospital to make a definite charge to a patient of what it is thought he can pay, it is now difficult to decide how to proceed in motor accident cases.

The hospital is in a dilemma; if it makes any charge to the victim while he is in hospital, it loses its claim for a payment by the insurance company—and this payment *might* be considerably more than the victim could pay; but if it makes no charge for treatment while the victim is in hospital, and if, after the victim has left, it turns out that the hospital has no claim against the insurance company, then it will probably be too late to recover anything from the victim.

There appears to be no way out of this difficulty at present, and it can only be solved by some general agreement with insurance companies. One suggestion, which appears to be an equitable solution, is that the hospital should obtain what payment it can from the victim while he is in hospital, and deduct the amount of this payment from its claim against the insurance company. Hospitals might perhaps endeavour to come to an agreement with insurance companies on these lines in individual cases, pending the negotiation of a general agreement.

(d) *Payments to hospitals under certain contributory schemes.* If the victim of an accident is treated in hospital, and the hospital claims a payment for such treatment out of the funds of a contributory scheme to which the victim subscribes, the question has been raised whether this claim must be considered as a " charge for treatment," and so preclude the hospital from obtaining a further payment from the insurance company. This again appears to be a subject on which some general agreement with insurance companies should be reached.

8. *Methods of Insurance Companies in dealing with certain Claims.*

Some insurance companies are attempting to evade part of their liability under the Road Traffic Act by the methods mentioned below.

In some cases, an insurance company, before settling the victim's claim, has tried to bargain with a hospital as to its claim for expenses of treatment, and to persuade the hospital to accept less than the full amount to which it is entitled. Insurance companies have no right to do this, as the method of calculation of what they must pay to hospitals is clearly stated in the Act.

In other cases, an insurance company has agreed to pay a definite sum to the victim under the policy, and has subsequently deducted from this sum the amount of the payment made by the insurance company to the hospital. Strictly speaking, this does not concern hospitals. The matter must be settled between the insurance companies and the victims.

In other cases the insurance company announces to the hospital that it is proposing to make an *ex gratia* grant to the victim, but will only make the grant if the hospital undertakes not to demand any payment from the insurance company for the expenses of the victim's treatment. Such a threat by the insurance company is most improper.

The practical difficulty in all these cases is that if hospitals stand on their legal rights, it will probably result in insurance companies being less generous in the settlement of the claims of victims; and if this becomes apparent, it will obviously have the effect of raising a prejudice against hospitals, as it will be said that the hospitals are receiving payments which ought to have been made to the injured. Probably the only satisfactory method of settling these questions will be by a general agreement with insurance companies.

9. *Procedure in making Claims against Insurance Companies.*

There is not much that can be said on this subject, but this paragraph is inserted in answer to several inquiries as to what procedure should be adopted.

It is recommended that, whenever the victim of a motor accident is brought to a hospital, information should at once be obtained from the police as to the registration numbers of all cars involved in the accident, the names of their owners, and the insurance companies [1] by whom they are insured against third-party risks.

A notice should then be sent to the insurance company—or to each insurance company, if more than one car is involved—which may be in the following form :—

DEAR SIR,

Road Traffic Act, 1930, *Section* 36 (2).

I beg to inform you that A.B. was admitted to this hospital on the..... day of.....suffering from injuries incurred in a road accident in which car No..... belonging to X.Y. was involved. I understand that X.Y. is insured against third-party risks by a policy issued by your company, and I shall be much obliged if you will let me know if, and when, you make any payment under this policy to A.B. or his dependents in respect of his injuries.

.....

.....

As soon as the victim leaves hospital, or, if he has to stay in hospital for a long time, as soon as the expenses of his treatment (calculated at the average daily cost of an occupied bed in that hospital) amount to £25, a formal claim for the expenses of treatment should be sent in to the insurance company. This may be in the following form :—

DEAR SIR,

With reference to my letter to you of the.....I beg to inform you that A.B. was treated as an in-patient in this hospital from the.....day of.....to the .....day of....., *i.e.* for .....days; also that the average daily cost per patient of the maintenance of this hospital and its staff and the maintenance and treatment of its patients is *s.* *d.*

I shall, therefore, be much obliged if you will pay the sum of £..... to this hospital, being [*or* toward] the cost of such treatment, in accordance with the provisions of Section 36 (2) of the Road Traffic Act, 1930.

.....

.....

[1] If a car owner has not produced his insurance certificate to the police at the time of the accident, but is to produce it at some police station, the local police should be asked to communicate at once with that police station and ask it to note the name of the insurance company when the insurance certificate is produced there.

MEMORANDUM No. 42.

ETHERIUM TREATMENT OF WATER.

A SUMMARY OF REPLIES FROM HOSPITALS AND OTHER INSTITUTIONS WITH REGARD TO THEIR EXPERIENCE.

It must be distinctly understood that the Bureau of Information takes no further responsibility with regard to these observations than to state that they come from reputable sources.

Hospital or Institution.	Length of Experience.	Object for which used.	Cost.	Opinion.
Mental Hospital.	Some years.	Prevention of scale in the boilers.	£15 per annum for two Lancashire boilers (working alternately).	Quite satisfactory. They have certainly prevented the accumulation of hard scale on the interior of the boilers, and what deposit there is can be washed away with a hose-pipe.
		Removal of scale in wrought-iron hot-water pipes for domestic supplies.		Results not satisfactory, and I discontinued use.
School.	Several years.	Softening the cooling water for our electric light and other crude oil engines.	£9 per annum.	The method, we know not how, does keep the circulating pipes and cylinder water jackets entirely free from lime deposit even with our very hard water. We have never ventured to use it for drinking water, but if our water supply for domestic purposes and boilers could be separated we should certainly use it for boiler feed water.
Hospital.	Three years.	To counteract the lime in the water being deposited on the inner surface of the boilers and pipes as hard scale.	£20 per annum. Cylinders renewed every four months.	As we now have sectional boilers, scaling would be impossible, but the deposit is capable of being washed out as sludge with an ordinary hose-pipe. The action of the Etherium treatment has also decreased the hardness of the water by one-sixth. We find it not only more economical as contrasted with the old method of scaling the boilers by hand but vastly more convenient.
Sailors' Home.	Three years.	Water feed to boilers.	£14 per annum.	Prior to its use we were having considerable trouble with the fire tubes of the boilers notwithstanding the use of the ordinary boiler fluids. After six months' use of this treatment we found a decided reduction in the scale, and its use has been continued since. Recently the same treatment was installed for the general water supply for domestic purposes, but I am unable yet to report on the result.
College.	Five or six years.	Treating water in one of the College bath buildings (there are about fifteen baths and three shower baths).	The hire of the cylinders.	We had no experience of the activators before and regarded the installation as an experiment; it has been so far satisfactory that we are continuing to use it.
Small-pox Hospital.	Three years.	Softening water supply.	£10 per annum.	Very satisfactory. The water is obtained from a well sunk through the gravel into the Keuper Marl, its temporary hardness being 16, permanent hardness 31, giving a total hardness of 47. The consequent furring-up of boilers and gas geysers and other hot-water apparatus previously caused us much trouble, but this has now been practically all eliminated. The Hospital provides accommodation for sixteen patients.
School.		To counteract the hardness of the water.	£25 per annum.	The special treatment has been successful. The water here is particularly difficult to deal with, and before this treatment was put in the boilers had to be either repaired or renewed every two or three years.
Personal Opinion.				From what I have seen I can assert that Etherium does prevent scale and fur in boilers and pipes. Several of my friends are using it and they all express satisfaction. It is charged for on the annual rental basis, hence no capital outlay, and in the unlikely event of it not proving satisfactory it can be dropped without loss.
Firm of Engineers.				We have installed the Etherium system of water treatment in two or three Institutions. The Etherium treatment is charged on a yearly basis of so much per annum. It does not actually soften the water, but causes incrustation to drop in the boilers or cylinders in the form of a soft muddy sludge, which can be washed out. In the ordinary way this incrustation would adhere to the boiler shell or plates, making it necessary to chip same away, and as there are usually places in the boiler shell which cannot be reached by means of tools and chisels, there is danger of the boiler plates burning through. The system has also been successful at Cambridge. Usually, however, an Institution such as a Hospital finds a water softening plant a better proposition, especially where they have their own laundry and cooking apparatus.
Hospital.	Two years.	To prevent the scale due to the very hard water forming in a hard cement on the four vertical boilers.	£20 per annum.	The system has proved most effective, as it is now found that the scale can easily be removed by the hand. Before the installation the cost of cleaning three boilers was £20 9*s*. This work is now done by the boilerman without cost. A considerable saving of fuel is effected, and in the case of the laundry boiler, less soap and soda is required. The water is softened to a certain extent, but the manufacturers do not claim that the water is softened as in the case of a water softening plant.
Hotel.	Six months.	Obviate furring of boilers and pipes.	£25 per annum.	No scale on boiler plates, very small quantity of loose deposit in boiler.
Nurseries.		Used exclusively for treatment of the water of our heating systems, having regard to the formation of scale in pipes and boilers.	Varies according to the extent of the installation.	The treatment does appear to have a decided effect, and boilers may now be washed out with a hose, whereas previously it was a case of much chipping.
Theatre.	Two years.	Fitted to three main 250-gallon tanks which supply cloak-rooms and staff rooms.		Hardness of local water supply 20 per cent. We are never troubled with any stoppages, which no doubt would have arisen had the water not been treated with this process.

CONDITIONS UNDER WHICH MEDICAL STAFFS GIVE THEIR SERVICES IN COTTAGE HOSPITALS WHERE THE HOSPITAL IS IN RECEIPT OF INCOME FROM CONTRIBUTORY SCHEMES.

Hpl.	Particulars of Conditions.
A.	Any fees due to medical practitioners for services rendered to patients in the hospital are paid by the patients themselves. The four doctors on the staff of the hospital are also panel doctors. The hospital receives approximately £700 per annum from an outside contributory scheme.
B.	Doctors give their services free where patients pay the hospital 2*s.* 6*d.* per day or less. In other cases, fees are a matter of arrangement between doctors and patients. The hospital receives income from the Hospital Saving Association, and other contributory schemes, and the medical staff suggest that 20 per cent. of these receipts should be handed over to them.
C.	There has been some suggestion that the honorary medical staff should receive remuneration from those in respect of whom the hospital receives £1 per week or more. The hospital committee takes the view that the doctors are privileged by being on the honorary staff, and should not, therefore, receive payment.
D.	The hospital receives about £500 per annum from an outside fund. Members of the scheme are entitled to free maintenance and medical attendance. Medical staff give their services free.
E.	Honorary medical staff of hospital are all panel doctors, and all on the committee of the hospital. The hospital receives about £1,400 per annum from organised workmen's collections and contributory schemes. No payment is made out of this sum to those on the medical staff, other than visiting specialists. The local practitioners do not make any charge to contributory scheme patients, although they reserve the right to do so for contributors and non-contributors alike in the ordinary wards.
F.	The payment made by the contributory scheme to the hospital amounts at the present time to £2 3*s.* per week towards a cost of £3 13*s.* per week for maintenance, *after deduction* of 20 per cent. for the medical staff funds. This arrangement works very well, and gives the medical staff a considerable sum per annum.
G.	All the doctors on the staff of this hospital are also panel doctors, but only two of them are appointed to the Board of Governors. A contributory scheme in its infancy provides for 25 per cent. of the net proceeds to be paid to a medical staff fund. Out of this fund, fees are paid to visiting specialists from neighbouring towns for major operations, etc. The hospital's secretary is of the opinion that this arrangement is not much of a recompense to the medical staff for the work done.
H.	All members of medical staff are panel doctors, and all are on the committee of management of the hospital. The contributory scheme only provides for the maintenance of its members and dependents, doctors' fees being a matter of arrangement.
I.	A contributory scheme handled by an outside organisation, which provides for free hospital maintenance for contributors and their dependents. 70 per cent. of the gross receipts is paid to the hospital for maintenance charges, and 20 per cent. to the medical staff who guarantee free treatment. Panel and non-panel patients are not distinguished. Non-contributors pay for maintenance according to their means, and the medical staff are allowed to charge them fees.
J.	The local contributory scheme provides for free maintenance and treatment. The honorary medical staff give their services entirely free to any cases in the general ward.
K.	The scheme run by the hospital raises sufficient to cover full cost of maintenance of its members. In addition, 15 per cent. of this cost is credited to a medical staff fund, which is at the disposal of the medical staff. The income limit for membership of the contributory scheme is £250 per annum, and the medical staff do not charge fees for any patients, whether contributors or not, with an income less than this sum. It has been the custom for doctors to charge patients in the general wards of cottage hospitals, and on the adoption of the contributory schemes this question of payment to recompense them for the loss of fees comes up for settlement. The Secretary writes : " I think that some recompense should be made, as the appointment to the staff of a cottage hospital does not carry quite the same prestige and kudos as a similar appointment to the staff of a general hospital."
L.	The contributory scheme pays the hospital 6*s.* per day, and out of this sum the hospital allows the doctor 16*s.* per week. No fees are charged by the doctors to patients in the general wards, but the medical staff have intimated that they cannot continue to serve under the present system. The present system must therefore be considered as in the melting-pot.
M.	The medical staff have two representatives on the general committee, but no representatives on the executive. The medical staff receive 20 per cent. of all sums paid in respect of general ward patients, whether from the contributory scheme or otherwise, up to a total of £1,000. 17 per cent. of the next £500 and 15 per cent. of any sum over £1,500. The medical staff are allowed to charge fees to patients in the general wards who pay full hospital costs, but only with the consent of the executive committee. The contributory scheme provides seven-eighths of the total cost of treating these members.

MEMORANDUM No. 44.

ACCOUNTANCY STAFFS OF LARGE GENERAL HOSPITALS.

CERTAIN hospitals regarding which information has kindly been supplied have been omitted, because, either on account of the possession of considerable estates or for some similar reason, the accountancy staff is altogether upon a different scale. It is not possible to allocate the personnel or the work done to the separate activities.

There is also a group of hospitals of similar size to those given in this memorandum in which there is no definite accountancy department. It would be misleading to include these with the hospitals detailed below as it is not possible to allocate personnel or costs.

Hospital.	Number of beds.	Accountancy Staff—Salary and Emoluments.						Whether the Hospital has any system of Cost Accounts.	Whether the Head of the Department is a Chartered or an Incorporated Accountant.	Whether the Staff is responsible for the accounting of any Contributory Scheme or other system of organised Workmen's Collections.	Fees paid to Auditors.	Remarks.
		Chief Account-ant.	First Asst.	Second Asst.	Third Asst.	Others.	Total Salaries in the Department (excluding emoluments).

MEMORANDUM No. 45.

FEES AND TRAVELLING EXPENSES PAID TO VISITING SPECIALISTS OF SMALL VOLUNTARY HOSPITALS.

In some of the small Provincial towns, the local hospital is staffed by local General Practitioners, and Surgeons, Radiologists, Ophthalmic Surgeons, etc., visit the hospital from neighbouring towns. The following summary gives instances of the financial arrangements governing such appointments :—

Hospital.	No. of Beds.	Remarks.
A	8	When honorary surgeons visit the hospital for operations for which they receive no fees from the patients (which is the general rule) the hospital pays the surgeons 2 gns. for each visit (all the visiting honorary surgeons come from London).
B	8	Honorary consulting staff (the local staff are described as honorary medical staff) receive an honorarium of 5 gns. whenever called in by a member of the medical staff in connection with a case in the public wards.
C	26	There are seven honorary surgeons who are specialists on the staff of other hospitals, including ophthalmic, gynæcological, ear, nose and throat, orthopædic surgeons and a radiologist. These visiting surgeons charge fees to the patients except to members of the local contributory scheme. In respect of contributory-scheme patients fees varying from 5 gns. to 10 gns. per visit are paid by the hospital. The honorary radiologist is paid a fee of £4 3*s.* 4*d.* for each fortnightly visit.
D	12	The honorary radiologist is paid an honorarium of 2 gns. for each visit to the hospital when required, to cover his travelling expenses.
E	40	Two honorary operating and consulting surgeons are paid £250 per annum each and an anæsthetist £50. The laryngologist, the ophthalmic surgeon and the radiologist are paid 100 gns., 50 gns., and 100 gns. each, respectively, and are allowed to charge fees to patients.
F	25	A visiting surgeon who is on the staff of a medical school hospital visits the hospital to perform operations as required. He receives an honorarium of £150 per annum plus travelling expenses.
G	23	A surgeon visits the hospital when required for operations. He receives an honorarium of £60 per annum.
H	8	The surgeon visits as required and receives an honorarium of £50 per annum to cover the cost of patients who cannot afford to pay fees.

February 1932.

MEMORANDUM No. 47.

INCREASE OF SUBSCRIPTIONS BY RECOVERY OF INCOME TAX AND BY OBTAINING THE BENEFIT OF RELIEF FROM SUR-TAX.*

KINDLY PREPARED FOR THE BRITISH HOSPITALS ASSOCIATION BY W. E. C. BAYNES, OF THE INNER TEMPLE, BARRISTER-AT-LAW.

Recovery of Income Tax.

By virtue of the Income Tax Act, 1918, and subsequent Finance Acts it is possible for a hospital to effect a considerable increase of its income by the recovery from the Inland Revenue Department of the income tax that has been paid by its subscribers in respect of their subscriptions. To enable a hospital to do this, however, it is necessary that each subscriber should enter into a legally binding contract to pay to the hospital an annual subscription of definite amount during a period of at least seven years.

Seeing that income tax is at the present time 5*s.* in the £, and that the income tax recoverable is calculated on the *gross* value of the subscription to the hospital, the recovery of income tax by this method increases the value of the hospital's subscriptions by 33⅓ per cent., without any cost to its subscribers. Table A (below) shows the benefit accruing to hospitals from these agreements for subscriptions of various amounts—so long as income tax remains at 5*s.* in the £.

It should be pointed out that a subscriber who is assessable to sur-tax will actually profit by adopting this scheme, as he will be entitled to deduct the gross amount of his annual subscription from the total income shown in his next sur-tax return.

These agreements are usually so drawn as to be terminated by death, so that a subscriber's estate will not be liable to continue the subscription after he has died. If so desired, however, the agreement may be made for seven years certain, binding the subscriber's estate.

To give a concrete example: the subscriber covenants (in the proper form) to pay to the hospital out of his taxed income an annual subscription of, say, £5 5*s.* during a period of seven years. The hospital can then claim from the Inland Revenue £1 15*s.* in respect of his subscription each year —so long as income tax remains at 5*s.* in the £. The subscription appears in the hospital's subscription list as £7. The subscriber is entitled to deduct £7 from his sur-tax return.

Benefit of Relief from Sur-Tax.

If a subscriber is subject to sur-tax and is willing to give to the hospital the benefit of the relief from sur-tax to which he is entitled by virtue of his agreement, this can be effected by his adding to the amount of his present subscription the amount of sur-tax which he would ordinarily have to pay in respect of the total amount with which he will be credited in the hospital's subscription list. Although his actual payment to the hospital will in the first place be greater than at present, he will recover this excess in relief of sur-tax, so that the actual cost to him will be the same as at present.

The amount by which his present subscription should be increased to effect this object will, of course, depend on the highest rate at which he is chargeable to sur-tax. How this amount can be worked out is explained in Table B (below).

It is worth noting that the maximum advantage of this scheme to a hospital, with income tax at 5*s.* in the £ and the subscriber being chargeable to sur-tax at the highest present rate, will be the transformation of a £50 subscription into one of £148, and that without any additional cost to the subscriber.

Procedure.

The deed of covenant must first be executed; it must have a seal attached to it before signature (an ordinary adhesive seal is sufficient); and the signature of the subscriber must be witnessed.

The document must be stamped with an impressed (not adhesive) stamp, and for this purpose

* We are indebted to the National Council of Social Service for several suggestions as to details of practice which have been found to facilitate the working of this scheme.

it may be sent to Somerset House, Strand, W.C. 2, or to a local office if there is one. If not stamped within 30 days of the date of its execution, Somerset House can impose a penalty up to £10 on its subsequent presentation for stamping. If *not* stamped, no income tax will be recoverable by virtue of this document.

The stamp duty is at the rate of 2*s.* 6*d.* per £100 of the total *net* amount (*i.e.* excluding the amount of income tax to be recovered) that will be receivable by the hospital during the whole seven years; *e.g.* if the covenant is to pay £5 5*s.* annually, the stamp duty will be payable on 35 guineas and will be 1*s.* 3*d.* See Table C (below). The hospital itself usually bears the cost of this stamp.

Shortly before the first subscription payable under the covenant falls due, a request for payment should be forwarded to the subscriber (with a form of banker's order, if desired) accompanied by a form of " Certificate of Deduction of Income Tax," Form No. R 185, to be signed by the subscriber and returned to the hospital. See Form 3 (below). Certificate Forms may be obtained from the local Inland Revenue Office or from the Controller of Inland Revenue, Charity Claims Department, Cornwall House, Stamford Street, London, S.E. 1.

The claim for the recovery of income tax may then be made in the usual way on Form No. R 235. The first claim under each deed of covenant must be accompanied by the deed itself, and *every* claim must be accompanid by a " Certificate of Deduction of Income Tax," signed by the subscriber.

Suggestions.

Experience has proved that it is by no means easy to persuade subscribers to enter into these seven-year contracts, and it is suggested that the scheme should be presented to them in as simple and attractive a form as may be. The subscriber should be asked in the first place merely to execute the deed of covenant. A form of banker's order and the certificate of deduction of tax should only be sent for his signature shortly before his first subscription payable under the covenant falls due. If all these papers are sent at once, he may form an idea that the adoption of the scheme is going to cause him a lot of trouble, which is not the fact.

Care should also be taken to present the scheme in such a form that the hospital will obtain the benefit of the income tax recovered, and so as to avoid any chance of the subscriber of, say, £5 entering into a contract for £3 15*s.* only, on the ground that this is in fact a continuation of his old subscription because the hospital can recover the difference from the Inland Revenue. Cases are known where an institution, after taking a great deal of trouble to obtain these agreements, has found in the end that it is not obtaining any more than before.

Although paragraphs are included (in Form 1 below) suggesting that the benefit of the subscriber's relief from sur-tax should be given to the hospital, it is not recommended that this suggestion should be made unless the scheme can be explained to the subscriber personally. As will be understood from the notes to Table B (below), if it is not known what is the highest rate at which the subscriber pays sur-tax, it will be necessary to send him a whole table, similar to Table B, but worked out for the amount of his existing subscription.

It should also be realised that if the rate of sur-tax or income tax is reduced, the subscriber will no longer obtain the same relief from sur-tax although he will have to continue his subscription without any corresponding deduction.

As regards the Deed of Covenant, it is suggested that, before this is sent to the subscriber, the hospital should affix to it an ordinary adhesive seal and fill in all the blanks in the deed so far as possible, so that there may be nothing for the subscriber to do beyond signing it and having his signature witnessed. It is also recommended that, when the deed has been received back by the hospital, a copy of it should be sent to the subscriber to be kept by him for reference in case any question arises on it.

Care must be taken that the date of cheque, or the date of payment by bankers' order, is later than the date of the deed of covenant.

If many of these covenants are entered into, it will be found a saving of time in the long run to keep a special register of them with columns for Serial Number of Covenant, Date of Covenant, Name and Address of Subscriber, Net amount Payable under the Covenant, Date when Due. The deeds should be registered in order of the date when the subscriptions are payable, a different page being reserved for each month.

FORM 1.

Suggested Letter of Invitation to Subscribers.

DEAR SIR,

As you are already so good as to send us an annual subscription of 5 guineas, we are writing to invite you to enable us to transform your subscription into one of £7 without the need for any payment by yourself beyond the continuance of your present subscription.

If you are willing to sign the enclosed form of covenant undertaking to continue your present subscription of 5 guineas for the next seven years, the hospital will be able to recover from the Inland Revenue Department the sum of £1 15*s.* each year (being the amount of income tax you will already have paid in respect of your subscription). The amount of your subscription in the list of our Subscribers will then appear as £7. This agreement is terminable by death, so that your estate would not be liable for subsequent payments.

If you are assessable to sur-tax your adoption of this scheme will actually be of advantage to yourself, as you will be entitled to deduct £7 from the total income shown in your sur-tax return. The claim for such deduction may be worded "Less £7 charitable annuity payable to the .... Hospital, under deed of covenant dated the ..... 193....."

If you should be so generous as to wish to allow the hospital the benefit of the amount of sur-tax from the payment of which you will be relieved, you can effect this by filling up the deed of covenant, not for your present subscription of 5 guineas, but for the sum appearing in column (4) in the table below * opposite the highest rate of sur-tax at which you are charged. As the difference between your present subscription and the amount you now enter in the deed of covenant will then be saved by you when paying your sur-tax, you will realise that the actual cost to yourself under this scheme will be no more than it is at present, while the hospital will reap a substantial advantage.

If you are so good as to adopt either of the above proposals, will you kindly fill in and sign the enclosed form of covenant, *being sure to have your signature witnessed*, and return it to me.

Yours faithfully,

FORM 2.

Deed of Covenant.†

Serial No.

I ..... of ..... hereby covenant with [the Treasurer of ‡] the ..... Hospital that for a period of seven years from the date hereof or during my life (whichever shall be the shorter period) I will pay annually to [the Treasurer of ‡] the said hospital such a sum as will after the deduction of income tax leave in the hands of the hospital a net sum of ..... pounds ..... shillings and ..... pence, such sum to be paid from my general fund of taxed income so that I shall receive no personal or private benefit in either of the said periods from the said sum or any part thereof.

In witness whereof I have hereto set my hand and seal this ..... day of ..... 193.....

Address.
Occupation.

N.B.—Your signature must be witnessed.

Alternative wording of above form to be used when the covenant is to be for seven years certain and *not* terminated by death:

"hereby covenant with [the Treasurer of‡] the ..... hospital that for a period of seven years from the date hereof I or my personal representatives will pay annually, etc."

* If the invitation is sent in this form, the highest rate of sur-tax payable by the subscriber not being known, it will be necessary to send him a table similar to Table B worked out for the amount of his existing subscription.

† This form is one that has frequently been adopted and has been proved by use, but no particular form is obligatory. Copies can be obtained from the Central Bureau of Hospital Information, 12, Grosvenor Crescent, London, S.W. 1. Price for 12 copies, 1*s.* 6*d.* post free.

‡ If the hospital is incorporated these words should be omitted.

FORM 3.

Suggested Letter to Subscriber to accompany First Certificate of Deduction of Income Tax.

DEAR SIR,

I am writing to remind you that your subscription of 5 guineas to this hospital has usually been paid by you about the beginning of next month.

As you have been so good as to sign an agreement to continue this subscription during seven years, it becomes necessary to fix some date on which it is to be considered to fall due each year, and the Inland Revenue Department also requires the enclosed Certificate of Deduction of Income Tax to be signed by you.

Will you kindly fill in and sign the enclosed certificate and return it to me with your subscription. Please note that the date entered beside your signature on this form should be identical with that in column 5.

A form of banker's order is also enclosed in case you care to make use of it, and so save yourself further trouble.

Yours faithfully,

FORM 4.

R 185. *CERTIFICATE OF DEDUCTION OF INCOME TAX.

I CERTIFY that on paying to (*the Treasurer of*) *the* ..... *Hospital* of ..... the Sum mentioned in the third Column of the subjoined Statement, I deducted the amount of Income Tax shown in the fourth Column of the Statement, and I further certify that this Tax has been or will be paid by me either personally to the proper Officer for the receipt of Taxes or by way of deduction from rent or other income when received by me.

Date *6th August, 1932.* Signature.....

Business Address (if none, state Residence).....

Nature of the Annual Payment, *e.g.*, Ground Rent, Mortgage or Loan Interest, Annuity, &c. 1	Description of the Property,† or Profits, out of which the Annual Payment is made. 2	Gross Amount of the Payment from which I have deducted the Tax. 3	Amount of Income Tax *deducted by me. 4	Period (*i.e.*, year, half-year, &c.) for which the Payment was due, and Date on which due. 5
Annuity under deed of covenant dated 10th July, 1932.	*Taxed income.*	£ *s.* *d.* *133* *6* *8*	£ *s.* *d.* *33* *6* *8*	*Annual payment due 6th August, 1932.*

* *N.B.*—This form is not applicable and should not be used where Income Tax has not in fact been deducted from the gross amount payable (*e.g.*, because the payer has undertaken not to deduct tax).

† In the case of Property, its situation, including Street Address (if any), Parish, County, and names of Occupiers must be distinctly stated.

This form should be signed by the person deducting the Tax and responsible to account for such Tax to the Revenue.

The signature of the Claimant's solicitor or other agent is not sufficient.

Notes.

It will save trouble and delay if this form is filled in strictly in accordance with the ideas of the Inland Revenue Department. It is therefore advisable to fill in as many of the details as possible at the hospital, in case the subscriber fills them in incorrectly.

The above form has been filled in in italics to show what entries are considered suitable. The figures refer to an actual subscription of £100, with income tax at 5*s.* in the £.

Note that the Inland Revenue Department requires the date beside the signature and the date in column 5 to be identical.

TABLE A.

Showing the benefit accruing to hospitals from seven-year agreements so long as income tax remains at 5*s.* in the £.

Annual Subscription to be paid by Subscriber. (1)			Amount recovered by Hospital from Inland Revenue. (2)			Amount credited to Subscriber in Subscription List. (3)		
£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*

2	2	0		14	0	2	16	0
3	3	0	1	1	0	4	4	0
4	4	0	1	8	0	5	12	0
5	5	0	1	15	0	7	0	0
10	10	0	3	10	0	14	0	0
21	0	0	7	0	0	28	0	0
50	0	0	16	13	4	66	13	4
100	0	0	33	6	8	133	6	8

TABLE B.

Showing how to find the amount by which an existing subscription must be raised so as to give the hospital the benefit of the subscriber's relief from sur-tax; also the amount of income tax recoverable from the Inland Revenue Department, and the total value of the subscription to the hospital.

If the present subscription is for £5 5*s.*, and assuming that income tax remains at 5*s.* in the £, then :

When the highest rate of Sur-tax payable by Subscriber is		His Subscription of £5 5*s.* must be raised by (3)	Amount to be paid by Subscriber and entered in Deed of Covenant. (4)	Income tax recoverable by Hospital at 5*s.* in £ on figure in Col. (6). (5)	Value of Subscription to Hospital and amount to be credited to Subscriber. (6)	Amount of Sur-tax from the payment of which Subscriber will be relieved. (7)
Basic rate in £. (1)	As now increased by 10%. (2)					
s. *d.*	*s.*	£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*
1 0	$1\frac{1}{10}$	8 3	5 13 3	1 17 9	7 11 0	8 3
1 3	$1\frac{3}{8}$	10 7	5 15 7	1 18 6	7 14 1	10 7
2 0	$2\frac{1}{5}$	18 0	6 3 0	2 1 0	8 4 0	18 0
3 0	$3\frac{3}{10}$	1 9 7	6 14 7	2 4 10	8 19 5	1 9 7
3 6	$3\frac{7}{20}$	1 16 3	7 1 3	2 7 1	9 8 4	1 16 3
4 0	$4\frac{2}{5}$	2 3 7	7 8 7	2 9 6	9 18 1	2 3 7
5 0	$5\frac{1}{2}$	3 0 9	8 5 9	2 15 3	11 1 0	3 0 9
5 6	$6\frac{1}{20}$	3 10 11	8 15 11	2 18 7	11 14 6	3 10 11
6 0	$6\frac{3}{5}$	4 2 6	9 7 6	3 2 6	12 10 0	4 2 6
6 6	$7\frac{3}{10}$	4 19 6	10 4 6	3 8 2	13 12 8	4 19 6
7 0	$7\frac{7}{10}$	5 10 9	10 15 9	3 11 11	14 7 8	5 10 9
7 6	$8\frac{1}{4}$	6 8 4	11 13 4	3 17 9	15 11 1	6 8 4

It will be seen that in each case the sur-tax on the figure in column (6) is identical with the figure in column (3), so that the subscriber will be relieved from sur-tax to the exact amount by which his subscription has been increased.

The figures for a subscription of any other amount will be in the same proportion, *e.g.*, for a subscription of 1 guinea, all the figures in columns (3) to (7) should be divided by 5 and for a subscription of 20 guineas they should all be multiplied by 4.

In the event of the tax rates being altered, the amount by which any particular subscription requires to be raised (column (3)) may be found for *any* rate of income tax and *any* rate of sur-tax from the formula :

$$\frac{az}{20 - x - z}$$

where a represents the present subscription, x the income-tax rate (in shillings), and z the sur-tax rate. *E.g.*, if the existing subscription is £50, the income-tax rate 4*s.* 6*d.* in the £, and the subscriber's highest sur-tax rate $3\frac{3}{10}$*s.* in the £, then the necessary increase of the existing subscription will be :

$$£\frac{50 \times 3\frac{3}{10}}{20 - 4\frac{1}{2} - 3\frac{3}{10}} = £13\ 10s.\ 6d.$$

The amount to be entered in the deed of covenant will therefore be £63 10*s.* 6*d.* The income tax recoverable by the hospital will be at the rate of 4*s.* 6*d.* in the £ on the *gross* value of the annual subscription to the hospital, *i.e.*, at the rate of 4*s.* 6*d.* for every 15*s.* 6*d.* contained in £63 10*s.* 6*d.*, or $\frac{9}{31}$ of that sum, which is £18 8*s.* 9*d.* The actual value of the subscription to the hospital will therefore be £81 19*s.* 3*d.*, and on this amount the subscriber will be entitled to relief from sur-tax at the rate of $3\frac{3}{10}$*s.* in the £, or £13 10*s.* 6*d.*, which is identical with the amount by which his annual subscription will have been increased.

TABLE C.

Stamp duty charged on the total amount payable under the Covenant during the whole seven years (*i.e.* seven times the amount in column (1) in Table A or column (4) in Table B).

February 1932.

APPROVED SOCIETIES WHICH HAVE INCLUDED HOSPITAL BENEFIT IN THEIR THIRD VALUATION SCHEMES.

THE following is a list of Approved Societies which have included Hospital Benefit in their Third Valuation Schemes recently completed.

The question of the continuance of the benefit is re-considered by each society on each valuation, and the present list will, therefore, be subject to revision during the years 1934, 1935, and 1936, and schemes which include the benefit may be varied from time to time by the societies with the consent of the Minister of Health.

Payment will be made by the societies only in respect of those members who were in the society during the time that the surplus out of which Hospital Benefit is payable, accrued.

It is necessary for a Hospital to furnish to the Approved Society the following particulars :—

.....Hospital.

Address .....

.....

To the ..... Approved Society.

Particulars of cases treated as In-Patients during the quarter ended .....

(1) Membership No.	(2) Surname.	(3) Christian Name.	Name of District or County.		(6) Treated as In-Patient.
			(4) District.	(5) County.	
					From To Weeks Days
				Total	

N.B.—The day of admission and the day of discharge must be counted as one day.
NOTE.—*This form is to be drawn up by the hospitals.*

The addresses given are those for correspondence. They are not, in all cases, the Registered or Head Offices of the Societies.

Unless indicated otherwise the membership of all societies given in this list includes both sexes.

SOCIETIES APPROVED FOR OPERATION IN ENGLAND

(including those approved for operation also in other parts of the United Kingdom).

March 1932.

THE DUTIES OF A SENIOR RESIDENT MEDICAL OFFICER.

With a view to assisting a hospital where the duties of a Senior Resident Medical Officer were under review, enquiries were made of selected hospitals where similar appointments are made. Extracts from the enquiry and also of the replies received are given below.

Extracts from Enquiry.

"One of the Resident Medical Officers at this institution is from time to time elected Senior Resident Medical Officer. In addition to his ordinary duties as a House Surgeon to one of the Senior Surgeons, he is required to assist in the general medical and surgical work of his juniors. He receives for this work an addition of £50 to his salary of £150.

"On paper this sounds satisfactory, but in practice this officer does not care to interfere with the work of the House Surgeons, nor does he stay in the services of the hospital sufficiently long to acquire the administrative tact and discretion so necessary for such a post.

"It is assumed that all voluntary hospitals have experienced this particular difficulty. Do you know of any hospital that has solved this problem?"

Extracts from Replies Received.

Hospital A.

"Several of the larger provincial hospitals have adopted the principle of appointing a Resident Medical Officer or Medical Superintendent who takes charge of the Residents and acts as a liaison officer between the Honorary Staff, the Board and the Residents. It has worked well here for some years. We have had single men of experience and married men. Our present Resident Medical Officer, who has been with us nearly two years, received £450 per annum with board, apartments and laundry as a single man, but he has just married and now has a house, provided by the hospital, and £600 a year. He has charge of the six Residents, arranges the admissions and discharges from hospital and also acts as Superintendent of our branch establishment."

Hospital B.

"The procedure referred to in the letter you have received is very similar to that in operation here for our Resident Medical Officers.

"Several years ago we instituted the appointment of one of the ordinary Residents as Senior Resident Medical Officer, mainly for disciplinary reasons. He receives an additional salary of £40 per annum to that of the other Residents, and for this he is expected to be more or less responsible for the general behaviour of the Resident Staff; to see that the operation list is compiled daily: to furnish the few medical statistics we publish in the Annual Report, and to act as Medical Officer to the domestic servants."

Hospital C.

"In this hospital we have a system of rotation. A Resident seldom gets appointed as House Surgeon unless he has had hospital experience and the first post which is usually held by him in this hospital is that of Resident Casualty Officer. We therefore know all our Residents before they are appointed to House Surgeoncies. We have four House Surgeons, and each one moves up to the senior position in due time. The senior post carries with it certain administrative duties inasmuch as the holder exercises supervision over the juniors, but of course he does not in any way interfere with the work of his House Surgeon colleagues, and if their work is unsatisfactory reference is at once made to the Surgeon for whom that particular House Surgeon works unless the difficulty is of such a nature that a chat with the Resident himself will easily remove it.

"The senior of the four House Surgeons is called before the Board each week with the Senior House Physician, and they give a report, which is prepared in the office, of the number of admissions, the number of deaths, and particulars of their work during the week. In this way the Board keeps a hold over the Residents and are in touch with them.

"With regard to further supervision, this is exercised by the Office Staff though in a way which does not lead the Residents to realise that they are pretty well supervised. The office keeps the waiting list and each week the House Surgeon for the particular week attends once, twice or three times, as the case may be, whenever beds are vacant, to go through the waiting list and arrange for the admission of patients, who are then written to by the Office Staff. In the same way with regard to death certificates. Every morning the Residents attend in the Office and sign certificates. Post mortem examinations are arranged through the Office and generally much of the written work, which was formerly undertaken by Residents, and which there is no doubt they were unfitted by experience to undertake successfully and with due regard to all the interests involved, is now undertaken by the Office Staff.

"I think this is as near as anything can be to the ideal arrangement, and it works happily with the Resident Staff, who find that when they are involved in any difficulty the Office will help them out and their work is in this way eased."

Hospital D.

"I venture to think that the difficulties referred to in your letter are common in most hospitals, some perhaps in a lesser degree. A close co-operation between Resident Medical Officers and Secretaries is desirable and should certainly help to remove the difficulties."

Hospital E.

"The position regarding the Senior Resident Officer at this hospital is exactly the same as at your correspondent's institution. I appreciate his difficulty which can hardly be overcome while Residents are birds of passage. There are, of course, exceptions, and we happen to have been fortunate."

Hospital F.

"On both the Medical and Surgical sides we appoint men of senior standing (F.R.C.S., on the Surgical side). Although these officers are not attached to Honoraries they secure clinical work in addition to their administrative and disciplinary duties. The Resident Surgical Officer is given a number of emergency operations in addition to Out-patient Department work. The main attraction, however, is that the posts are usually stepping stones to the Honorary Staff."

April 1932.

SPECIAL TRAVELLING FACILITIES FROM HOSPITALS TO CONVALESCENT HOMES.

THE Railway Companies have agreed to issue tickets at the reduced rate of a fare and a third for the return journey to patients travelling from *approved* Hospitals which are Members of The British Hospitals Association to *approved* Convalescent Homes :—also for the issue of tickets at the same rate to relatives or friends who wish to visit such patients at the Convalescent Homes, or to accompany the patients during the journey.

Books containing 25 vouchers with counterfoils are supplied by The British Hospitals Association to hospitals desiring to take advantage of the arrangement and when further supplies are required it is necessary for the counterfoils of the used vouchers to be returned duly filled in.

A charge of 2*s*. per book is made to cover cost. Vouchers for relatives or friends are different from those for patients and are prepared in separate books.

A list of Convalescent Homes already approved for this purpose follows. It is necessary for the Association to submit the names of any others to the Railway Clearing House for approval before vouchers can be issued to persons travelling to them.

The following information is of general interest.

1. For children under fourteen years of age the fare is one-half of the reduced fare charged for adults.
2. Hospital Officers travelling to or from approved Convalescent Homes may use visitors' vouchers if accompanied by patients on either journey
3. The vouchers for both patients and visitors are issued by the Association and not by the Railway Companies.
4. The arrangement does not in any way interfere with certain special concessions granted some time ago by individual Railway Companies.
5. Separate books of vouchers are not necessary for each Convalescent Home. The Vouchers can be issued for use in connection with any approved Convalescent Home.
6. The tickets for patients are available for return within three months, and those for visitors for return within five days (Sundays not counted).

LIST OF CONVALESCENT HOMES APPROVED BY THE RAILWAY CLEARING HOUSE, AND TO WHICH THE CONCESSION WILL APPLY.

Alva (Clackmannanshire)... ...	The Lady Aberdeen Memorial Home.

The British Hospitals Association

(Incorporated)

12 GROSVENOR CRESCENT, LONDON, S.W. 1

CHIEF OBJECTS OF THE ASSOCIATION.

To be the Representative Association of those hospitals in Great Britain and Northern Ireland which are under voluntary management.

To provide opportunities for the consideration and discussion of all matters directly or indirectly connected with hospital management.

To publish papers and reports of conferences, discussions and proceedings connected with hospital management.

To maintain or co-operate in maintaining a Bureau of Information on all matters connected with hospital management.

To organise intercommunication and co-operation between the Association and Government departments and other associations and bodies connected with hospitals or hospital management or the treatment of disease in Great Britain and elsewhere.

Through its Regional and Central Organisation the Association is able to ensure that the views of the Voluntary Hospitals receive due consideration by the Houses of Parliament and the Municipal Authorities.

MEMBERSHIP.

There are two classes of Members:—

1. Representative Members, *i.e.*, those nominated by Voluntary Hospitals for election as their representative members.
2. Ordinary members:—Any person or corporation may apply for membership. Such applications must be supported by nominations from representative members of the Association.

The Association has (May 1932) a membership of over 1,300, representing 685 Institutions.

ANNUAL SUBSCRIPTION.

The ANNUAL SUBSCRIPTION for all members is ONE GUINEA per annum.

All communications should be addressed to the Honorary Secretary.

CENTRAL BUREAU OF HOSPITAL INFORMATION

12 Grosvenor Crescent, London, S.W.1

The aims of the Bureau, which is carried on under the auspices of The British Hospitals Association, the Joint Council of the Order of St. John and the British Red Cross Society and the Incorporated Association of Hospital Officers, may be summarised as follows:—

To publish annually a "Hospitals Year-Book" containing a directory of hospitals in Great Britain together with a report giving particulars of the work done, finances, etc.;

To collect and summarise data concerning all matters of administrative interest to those engaged in hospital management;

To undertake enquiries with the object of obtaining facts for those responsible for guiding hospital policy;

To establish a library where books, pamphlets and diagrams dealing with matters of hospital administration, construction and equipment may be consulted;

To act as a Clearing House of information in order that the experience of all may be at the service of each.

The Committee of the Bureau welcome enquiries and would ask Administrators to let them know at once the subjects of importance upon which they believe collated information would be helpful, both to themselves and to others engaged in hospital work.

DONOUGHMORE, *Chairman.*

R. H. P. ORDE, *Director.*

THE BRITISH RED CROSS SOCIETY AND ORDER OF ST. JOHN HOSPITAL LIBRARY

NEEDS

Books and Librarians for Hospitals

OVER 2,000 BRITISH HOSPITALS AT HOME AND ABROAD ARE SUPPLIED.

THOUSANDS OF BOOKS AND MAGAZINES ARE NEEDED, AND VOLUNTARY LIBRARIANS FOR HOSPITALS AT HOME.

The Secretary, British Red Cross and Order of St. John HOSPITAL LIBRARY, 48, Queen's Gardens, Lancaster Gate, LONDON, W.2

UNIVERSITY OF ABERDEEN

ACADEMICAL YEAR, 1932-1933

FACULTY OF MEDICINE

The Faculty of Medicine embraces Thirteen Chairs, besides Lectureships, from which instruction is given in all the main departments of Medical Science. Instruction is also given in special departments of medical practice by Lecturers appointed by the University Court. Clinical Instruction is obtained in various Hospitals and other Institutions in Aberdeen.

The Degrees in Medicine granted by the University are: Bachelor of Medicine (M.B.), Bachelor of Surgery (Ch.B.), Doctor of Medicine (M.D.), Master of Surgery (Ch.M.). The Degree of Doctor of Philosophy (Ph.D.) is also granted in this Faculty. They are conferred only after examination, and only on students of the University. A Diploma in Public Health is conferred after Examination on Graduates in Medicine of any University in the United Kingdom. Bursaries, Scholarships, Fellowships, and Prizes, are open to competition in this Faculty.

Students are required to begin study in the Winter Term, which commences in October.

The University also grants the following Degrees: In Arts—Doctor of Letters, Doctor of Philosophy, Master of Arts, Bachelor of Education; In Science—Doctor of Science, Doctor of Philosophy, Bachelor of Science (in Pure Science, Agriculture, Forestry, and Engineering); In Divinity—Doctor of Divinity (Honorary), Doctor of Philosophy and Bachelor of Divinity; In Law—Doctor of Laws (Honorary), Doctor of Philosophy, Bachelor of Laws (LL.B.), and Bachelor of Law (B.L.); In Commerce—Bachelor of Commerce (B.Com.).

A Diploma in Fine Art is also conferred by the University.

A prospectus of the Classes, Fees, etc., may be had on application to the SECRETARY, of the University.

H. J. BUTCHART, *Secretary.*

THE Hospital is the only one of its kind in the City of Liverpool and South-West Lancashire, and as well as serving this large district, it also serves the Wirral and a great portion of the County of Cheshire, and is very frequently utilised by patients from the Northern Counties of Wales.

The object of the Hospital is to treat all dental diseases and irregularities of the teeth and to encourage means for their prevention.

Supported by Voluntary Contributions.

Subscriptions or Donations payable to either of the joint Hon. Treasurers.

Queen Charlotte's Maternity Hospital

(formerly Queen Charlotte's Lying-in Hospital)

Marylebone Road, London, N.W.

Founded 1739 — UNENDOWED

Incorporated by Royal Charter . . 1885

Supported by Voluntary Contributions.

PATRON.
HER MAJESTY THE QUEEN.

PRESIDENT.
LORD HOWARD DE WALDEN.

TREASURER.
ANTHONY DE ROTHSCHILD, ESQ.

CHAIRMAN.
SIR SAMUEL SCOTT, BART.

OBJECTS OF THE HOSPITAL

(1) The Delivery of Married Women, both in the Hospital and at their own homes.

(2) The Delivery of deserving Single Women, in the Hospital, *with their first child only.*

(3) The training of Medical Pupils, Midwives and Maternity Nurses.

Since the foundation of the Hospital over 200,000 **Poor Women have been relieved.** Last year **2800** Patients were received into the Hospital, and **1780** were attended and nursed at their own homes, and there were over **20,000** attendances at the Ante-Natal and Child Welfare Departments.

The **Annual Expenditure** is about **£38,000,** while the ordinary sources of **Income** yield but **£20,000,** leaving a **Deficit** of over **£18,000** to be raised annually from **Fresh Sources.**

The Committee **most earnestly plead for help** for maintenance and for rebuilding the Hospital on the new Site at Goldhawk Road, Hammersmith.

CONTRIBUTIONS to both the General and the Building Funds will be thankfully received by the Hospital Bankers, Martin's Bank, Ltd., Whitehall, S.W., or at the Hospital by

ARTHUR WATTS, *Secretary.*

LONDON LOCK HOSPITAL AND HOME

PATRON - H.M. THE KING.

Founded 1746, this Special Hospital and Home has for 186 years devoted all its energies to the treatment of venereal and genito-urinary diseases. Thousands of young women and others from all parts of the kingdom have been relieved of their bodily suffering and helped regain their self-respect, and thereby enabled to make a fresh start in life.

Annual Subscriptions and Donations are earnestly pleaded for and will be gratefully received by
J. F. W. DEACON, Esq., M.A., D.L., J.P., and
The LORD KINNAIRD, Hon. Treasurers, or by
Hy. J. EASON, F.C.I.S., Secretary.

Bankers: BARCLAYS BANK LTD.

Offices: 283 HARROW ROAD, LONDON, W.9.

FORM OF BEQUEST.

I bequeath to the Treasurers for the time being of the London Lock Hospital and Home, Harrow Road, Paddington, W.9, and Dean Street, Soho, W., both in the County of London, the sum of £ , to be applied for the purposes of the (Female Hospital, Home *or* Male Hospital and Out-Patients' Department, *as may be desired*), *and I direct the said Legacy to be paid free of death-duty, and as soon as conveniently may be after my death.*

GORDON HOSPITAL

FOR RECTAL DISEASES

VAUXHALL BRIDGE ROAD

FOUNDED 1884

Joint-Presidents—The Marquis and Marchioness of Aberdeen and Temair

Chairman—H. Scott Dennington, Esq.

Vice-Chairman—Capt. R. Corfield

Patients are seen at 2 p.m., Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, and Tuesday Evenings at 6 p.m.

The Practice of the Hospital is free to the Medical Profession.

Private, Semi-private and General Wards.

The Gordon Hospital provides for sufferers whose means are unequal to the cost of private treatment and who yet are not fit subjects for a free hospital.

Subscriptions and Donations will be gratefully received by

Lt.-Col. CLEMENT COBBOLD,
Secretary.

The First Special Hospital in London

FOR CANCER

The Cancer Hospital (free) is fully equipped and specially staffed for the better treatment and research into the Causes of Cancer, and has to its credit a long and honourable record of successful work.

In addition to the accommodation for operable cases in the early stages of the disease, a certain number of beds are provided for advanced cases who are kept comfortable and free from pain.

Help is urgently needed to meet the cost of the New Wing, which comprises a Radiological Department and accommodation for "middle-income" patients who can contribute towards their cost.

GREATLY NEEDS HELP

500 Beds constantly occupied

The two Institutions, Hospital and Sanatorium, combined with arrangements as to aftercare, represent the most complete and successful method of treatment.

Special Wards and Rooms for Paying Patients, 4 to 8 guineas per week.

BROMPTON, S.W. 3. **FREDERICK WOOD,** *Secretary.*

HAMPSTEAD GENERAL & NORTH-WEST LONDON HOSPITAL

In-Patients: Haverstock Hill, N.W.

Telephone Nos.: Primrose Hill 1151/3.

Out-Patients: Bayham Street, Camden Town.

Telephone No. North 1734.

The General Hospital for Hampstead, Highgate, Kentish Town, Gospel Oak, Hendon, and all the outlying North-Western Districts.

Treasurer.—HOWARD B. FIGGIS

In addition to **117 Beds in the Public Wards,** there are 21 beds for patients who, although of limited means, are able to contribute towards their maintenance. Contributory beds three and a half guineas per week, or private rooms seven guineas per week, the patients being attended by their own Doctors.

The charges for cases attended by practitioners or consultants practising outside the district are five guineas for Contributory Beds and nine guineas for Private Rooms.

The Normal Annual Expenditure amounts to £30,000.

The Hospital is Unendowed and further support is urgently needed.

HAROLD WIGG, Secretary.

GUY'S HOSPITAL

LONDON BRIDGE, S.E.1.

URGENTLY NEEDS HELP

Founded in 1725 by Thomas Guy, a Bookseller and Publisher in the City of London. Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The hospital is empowered to receive gifts of, and to hold lands up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital) notwithstanding the provisions of the Mortmain Acts.

Number of Beds and Cots - 648

(Including 31 Cubicles for Paying Patients, etc.)

In-Patients (1931) 12,068

Out-Patients (1931) 122,867

Total Expenditure (1931) £192,138

Income from Endowments (1931) £68,910

Over and above the Income from Endowments the Hospital is dependent for support from other sources to the extent of

£120,000 PER ANNUM

The Governors earnestly appeal for additional Annual Subscriptions and Donations towards Maintenance; for Capital Contributions towards the Re-endowment Fund of the Institution; and for Testamentary Gifts. Please write for particulars of Subscriptions under Covenant; or capital benefactions under Life Assurance Scheme.

£1,000 names or endows a BED in perpetuity.

A Yearly Subscription of **£50** or **£25** SUPPORTS A BED or a COT respectively.

A copy of the Annual Report of the Hospital will be sent, together with any further information desired, on application to the Clerk, Guy's Hospital, London Bridge, S.E. 1.

***Treasurer*—F. P. WHITBREAD, Esq.** ***Bankers*—THE BANK OF ENGLAND**

CITY OF LONDON HOSPITAL for DISEASES of the HEART and LUNGS

(VICTORIA PARK HOSPITAL) E.2.

Treasurer: SIR G. WYATT TRUSCOTT, BT.

Chairman: SIR A. KAYE BUTTERWORTH.

Founded in 1848 by City Bankers, Merchants and others, including many members of the Society of Friends, such as the families of Gurney, Alexander, Barclay, Sturge, Fox and Braithwaite.

1 in 4 of all deaths result from Heart Disease and 1 in 12 from Consumption. These together with other Chest diseases account for nearly one-half of the total deaths in this country. Supreme importance attaches therefore to this hospital work.

There are 186 beds and over 40,000 attendances of Out-patients. Annual expenditure over £35,000. Assured income only about £2,000.

A Legacy or Donation of £1,000 gives the right to name a Bed, and £500 a Cot, in perpetuity. The Committee plead for increased support.

CITY ROAD LONDON, E.C.1

THE HOSTEL OF GOD

(THE FREE HOME FOR THE DYING)

29 North Side, Clapham Common, S.W.4.

Patroness:
HER ROYAL HIGHNESS THE DUCHESS OF YORK

Patrons:
THE RIGHT REV. THE LORD BISHOP OF SOUTHWARK; THE RIGHT REV. BISHOP TALBOT.

President:
H.R.H. PRINCESS ALICE, COUNTESS OF ATHLONE.

Medical Officer:
W. A. RYAN, L.R.C.P., S.I.

Honorary Consulting Surgeon:
W. SAMPSON HANDLEY, M.D., M.S., F.R.C.S., L.R.C.P.

Treasurer:
REGINALD ABEL SMITH.

THIS Hostel was founded in 1891. Its object is to provide a Home, where men and women of a superior class, poor, in the last stages of illness, without homes or friends able to maintain them, and who, having seen better days, shrink from claiming the shelter of the County Hospital and can appreciate very fully the refinement and comfort which we are able to give them, may end their days in peace carefully and tenderly nursed and surrounded by everything that can cheer them and alleviate their sufferings.

The Home is almost entirely dependent upon charity; it is absolutely free to all without distinction of creed or country.

Application for admission to be made to the Sister Superior, 29 North Side, Clapham Common, S.W. 4.

Cheques to be crossed "Messrs. HOARE, 37 Fleet Street, E.C. 4," and made payable to "The Hostel of GOD."

Treasurer—SIR HENRY LOPES, BT.

The Board earnestly **APPEAL** for **SUBSCRIPTIONS** and **DONATIONS** to maintain and extend the operations of this Institution.

The work of the Royal Hospital and Home for Incurables, Putney, is two-fold: it affords a **Home** for some, and grants a pension of £20 a year to others.

This Charity is national in its character; persons are received as inmates and Pensioners from all parts of the United Kingdom.

Present number of Beneficiaries: **Inmates, 246; Pensioners, 650.**

An **Annual Subscriber** has one vote for Half-a-Guinea, and an additional vote for every additional Half-Guinea.

A **Life Subscriber** has one vote for Life for Five Guineas, and an additional Vote for Life for every additional Five Guineas.

A Donation entitles to Votes at the next Election, according to the amount.

The **Elections** are held Half-Yearly, in the months of May and November.

The Hospital may be visited any week-day, between the hours of 2 and 5.30, by the Governors and Friends of the Institution.

£50,000 required yearly; only £12,000 assured.

Bankers—Messrs. GLYN, MILLS & CO., 67 Lombard Street, E.C.3.
Offices, Bond Court House, Walbrook, E.C.4.

BARNWOOD HOUSE
GLOUCESTER.

A REGISTERED HOSPITAL for the CARE and TREATMENT of LADIES and GENTLEMEN suffering from NERVOUS and MENTAL DISORDERS. Within two miles of the G. W. Railway and L. M. & S. Railway Stations at Gloucester, the Hospital is easily accessible by rail from London and all parts of the United Kingdom. It is beautifully situated at the foot of the Cotswold Hills, and stands in its own grounds of over 280 acres. Voluntary Boarders of both sexes are also received for Treatment. Special accommodation for Lady Voluntary Boarders is also provided at the MANOR HOUSE, which has its own private grounds and is entirely separate from the main Hospital.

For particulars as to Terms, etc., apply to
ARTHUR TOWNSEND, M.D.

Telephone: No. 7 Barnwood. Resident Superintendent.

CHEADLE ROYAL
CHEADLE, CHESHIRE.

This REGISTERED HOSPITAL, with a SEASIDE BRANCH at Colwyn Bay, N. Wales, is for the treatment and care of those of the Upper and Middle Classes suffering from MENTAL and NERVOUS DISEASES.

The Hospital is governed by a COMMITTEE, appointed by the TRUSTEES of the Manchester Royal Infirmary.

In addition to the Main Building there are separate villas. Extensive grounds. Hard and grass tennis courts, cricket and croquet grounds, and a court for badminton. There are also wireless installations. Golf may be had within easy distance. Occupational therapy.

VOLUNTARY, TEMPORARY and CERTIFIED Patients received.

The Hospital is 9 miles from Manchester, 50 minutes by rail from Liverpool, and 3½ hours from London.

For Terms and further information apply to the Medical Superintendent.

Telephone: Gatley 2231.

LADIES and GENTLEMEN received for treatment under Certificates and without Certification, as either **Voluntary or Temporary Patients**, at a WEEKLY FEE of **TWO GUINEAS** and upwards. An Illustrated Booklet giving full particulars can be obtained from the **Medical Superintendent.**

The Institution is within two miles of Dartford Station, on the Southern Railway, with frequent electric train service, and is about 16 miles from London. Trams and Motor Omnibuses pass the door.

Telephone: **DARTFORD 57.**

Telegraphic Address: **STONE HOUSE, DARTFORD, KENT.**

BETHLEM ROYAL HOSPITAL
FOR NERVOUS AND MENTAL DISORDERS

Monks Orchard, Monks Orchard Road, Eden Park, Beckenham, Kent.

Reg. Tel. Address: BETHLEM, BECKENHAM
Telephone: SPRINGPARK 1180–1181
Station: EDEN PARK (Southern Railway)

President: LORD WAKEFIELD OF HYTHE, C.B.E., LL.D.
Treasurer: Sir LIONEL FAUDEL-PHILLIPS, Bart.
Physician-Superintendent: J. G. PORTER-PHILLIPS, M.D., F.R.C.P.

This Registered Hospital is now situated at Monks Orchard, in some 250 acres of park, pleasure and farm grounds. Applications can be considered on behalf of patients of the educated classes in a presumably curable condition.

With a view to early treatment, voluntary or uncertified patients are admitted.

Patients who can contribute 5 guineas weekly towards the cost of treatment and maintenance may be received as vacancies arise. The Committee will also consider applications for admission at lower rates and in certain cases will be prepared to admit patients free of charge.

Every facility for specialised investigation and treatment is provided in the Lord Wakefield Science and Treatment Unit. In this Unit is found the X-Ray and Dental Departments, and the Bio-Chemical, Pathological and Psychological Laboratories.

Furthermore provision is made for Electro-Therapy and Hydro-Therapy to be carried out in all their forms.

In addition to the Resident Medical Staff, Consultants in special branches of Medicine and Surgery are available whenever required.

The comfort of sensitive patients is greatly enhanced by the fact that the majority are given single bedrooms.

For forms and further particulars apply to the Physician-Superintendent at the Hospital.

THE COPPICE, Nottingham,
HOSPITAL FOR MENTAL DISEASES.

President—LORD HENRY BENTINCK.

This Institution, for the reception of **Private Patients** of both sexes of the **Upper and Middle Classes** only, at moderate rates of payment, is beautifully situated in its own grounds about two miles from Nottingham, and from its singularly healthy and pleasant position, and the comfort of its internal arrangements, affords every facility for the relief and cure of those mentally afflicted. Divine Service is held in the Institution every Sunday by the Chaplain, who also visits the Patients. Carriage exercise is provided. There is a branch Seaside Villa at Lowestoft.

For Terms, etc., apply to Dr. HUNTER, Medical Superintendent.

VOLUNTARY BOARDERS.—Patients are received without certificates who are in a condition to apply voluntarily for admission. This method is particularly applicable to persons in the commencing stages of mental or nervous disorder, since early treatment may ward off a serious attack, and avoid the necessity for certification.

HEIGHAM HALL, NORWICH

A PRIVATE MENTAL HOME situated in 14 acres of well-wooded grounds. For Ladies and Gentlemen suffering from Nervous or Mental Illness. Voluntary Patients, Temporary Patients, and Patients under Certificates are admitted for Treatment. Fees: from 4 guineas a week upwards, according to requirements. A few vacancies exist for Ladies and Gentlemen at reduced fees on the recommendation of the Patient's own Physician. Apply to Medical Superintendent: Dr. J. A. Small. Consulting Physician: Dr. G. Stevens Pope. Telephone: 80 Norwich. Telegrams: Small, 80 Norwich.

THE LAWN, LINCOLN

This registered hospital for mental and nervous diseases was one of the first hospitals in England to introduce more humane methods into the treatment of mental illness, and affords special facilities for intensive psychotherapy to co-operative patients requiring such treatment. Private patients and voluntary boarders of both sexes are received for treatment, including adults suffering from after effects of encephalitis lethargica. Fees from £4 4s. weekly, reductions being made in special cases, preference in granting such reductions being given to residents of Lincolnshire. The Hospital combines the advantages of town and country, being situated in large grounds on the southern side of the hill-top near the cathedral, obtaining a maximum of fresh air and sunshine, while within easy access of the centre of the town.

For full particulars apply to the Resident Medical Superintendent, Dr. Mary R. Barkas. **Telephone: Lincoln 165.**

Telephone: NORTH 0888.

Telegraphic Address: "SUBSIDIARY, LONDON."

NORTHUMBERLAND HOUSE

GREEN LANES, FINSBURY PARK, N. 4.

A Home for the Treatment of Patients of both sexes suffering from Mental Illnesses.

Conveniently situated four miles from Charing Cross. Nearest Stations, Finsbury Park (Piccadilly and Moorgate St., Underground and G.N. Railways). Cars and Buses pass the Gate. Six acres of ground, highly situated, facing Finsbury Park. Private Villas. Voluntary boarders received without certificates. Terms from Four-and-a-Half Guineas per week.

For further particulars apply to the Medical Superintendent.

SOUTH LONDON INSTITUTE FOR THE BLIND

83 BOROUGH ROAD, LONDON, S.E.1

(Registered under the Blind Persons Act, 1920)

This institute was founded in Southwark in 1870, and was, until his death, under the patronage of that well-known philanthropist, the 7th Earl of Shaftesbury.

The object of the Charity is, by means of voluntary helpers, to organise work among the poor blind in the following directions:—(1) a Bureau for those seeking employment; (2) a Polytechnic in which religious services are conducted and educational classes carried on; and (3) a home for unmarried blind women.

This Society relies upon voluntary contributions. Nearly all the workers are honorary.

LEGACIES

THERE are many people whose **sympathies** are with **"poor ladies"** and who long to help them and to make their narrow lives less sordid, but who are unable to do so for lack of **present means.**

Legacies of £10, £20, £50 and upwards to thousands of pounds are very **useful and gratefully received.**

This Society was begun over 46 years ago by asking for shillings. The donations yearly increase by asking not only for shillings, but for pounds. Over 300 poor ladies are helped by **monthly pensions,** and many others are very glad of orders for plain or fancy needlework. Boxes can be sent on approval by post.

Please make cheques and orders payable to Miss Smallwood's Society.

NAZARETH HOUSE.

HAMMERSMITH, LONDON, W.

Telegraphic Address: "RELIGIO, HAMMER, LONDON."

The Sisters devote themselves to the care of the Aged Poor of both sexes—irrespective of creed—and of Orphan and Incurable Children, whom they receive into houses specially adapted for that purpose.

To the Aged Poor and Incurable Children they give a permanent Home; the Orphan Children they educate and fit for after life. The Institution has no funds and depends for support on the alms daily collected by the Sisters—the money, food and clothes bestowed by the generous and charitable.

THE BRANCH HOUSES ARE

In the Archdiocese of Westminster—
Nazareth House, Isleworth.
Nazareth House, Finchley, London, W.

Diocese of Brentwood.—
Nazareth House, Southend.

In the Diocese of Birmingham—
Nazareth House, Oxford.
Nazareth House, Rednal, Birmingham.

In Liverpool—
Nazareth House, Great Crosby.
Nazareth House, Lancaster.
Nazareth House, Wavertree.
Nazareth House, Ditton.
(Home for Little Boys.)
St. Joseph's Home for Incurables, Wavertree.

In Newport—
Nazareth House, Cardiff.
Nazareth House, Swansea, S. Wales.
(Home for Boys.)

In Down and Connor—
Nazareth House, Ballynafeigh, Belfast.
Nazareth Lodge, Ravenhill Road, Belfast.
(Home for Little Boys.)

In Ballarat—
Nazareth House, Ballarat.
St. Joseph's Home for Boys, Sebastopol, Ballarat.

Also—
Nazareth House, Camberwell East, Melbourne.
Nazareth House, Aberdeen, N.B.
Nazareth House, Middlesbrough.
Nazareth House, Northampton.
Nazareth House, Nottingham.
Nazareth House, Southsea.
Nazareth House, Bexhill.
Nazareth House, Cheltenham.
Nazareth House, Kilmarnock, N.B.
Nazareth House, Londonderry.
St. Joseph's Home for Boys, Termonbacca, Derry.
Nazareth House, Cardonald, Glasgow, N.B. (Teleg. Address: "Nazarene, Glasgow.")
Nazareth House, Heaton Park, Manchester.
Nazareth House, Blackburn, Lancs.
Nazareth House, Sligo
Nazareth House, Carlisle.
Nazareth House, Plymouth.
Nazareth House, Newcastle-on-Tyne.
Nazareth House, Cape Town.
Nazareth House, Kimberley.
Nazareth House, Port Elizabeth.
Nazareth House, Durban, Natal.
Nazareth House, Johannesburg.
Nazareth House, Christchurch, New Zealand.
Nazareth House, Moreton Bay, Brisbane, Queensland.
St. Joseph's Home for Boys, Midleton, Christchurch, New Zealand.
Nazareth House, Westbury-on-Trym, Bristol.
Nazareth House, Southampton.
Nazareth House, San Diego, California.
Nazareth House, Fourteen Streams, S. Africa.
Nazareth House, Mallow.
Nazareth House, Edinburgh.

There is a Girls' Industrial School attached to Nazareth House, Aberdeen; a Junior Boys' Industrial School to Nazareth Lodge, Belfast. There is a Certified Poor Law School for Girls attached to each of the following: Nazareth House, Middlesbrough, Nottingham, Northampton, Cardiff and Southsea; and Boys' Certified Poor Law Schools to Nazareth House, Southend and Swansea. A Poor Law School for small Boys and Girls to Nazareth House, Heaton Park, Manchester.

Many of the Houses are burdened with debt, and alms in money or kind are earnestly solicited to meet pressing needs. Cheques and P.O. Orders may be made payable to Mrs. Elizabeth Murphy, Superior General, or to the Mother Superior of any of the above Houses.

FORM OF BEQUEST.

I give and bequeath to the Mother Superior General for the time being, of Nazareth House, Hammersmith, W., Home for Aged Poor and Incurable Children, the sum of , free of legacy duty, to be applied to the general purposes of the said Institution.

WILL YOU HELP?

The LONDON MEDICAL CHARITIES FUND

Patron: H.R.H. THE DUKE OF YORK, K.G., G.C.V.O.

President:
LIEUT.-COL. SIR WALTER RAYMOND GREENE, BART., D.S.O., J.P.

Vice-Presidents:
SIR H. J. ORMOND, J.P. | CHARLES F. WRIGHT, ESQ.
SIR G. W. H. JONES, M.P., LL.B. | ALFRED ROOKS, ESQ.

OBJECTS OF THE FUND.—For providing Hospital Letters, Medical, Surgical, Dental, and Ophthalmic relief; also convalescent home-treatment for the deserving poor.

The London Medical Charities Fund have, during the last few years, distributed to hospitals, dispensaries, convalescent homes, grants in medical relief and surgical appliances, the sum of nearly **£13,750**, and have given to the poor over **6,500** letters of recommendations to hospitals.

FUNDS ARE URGENTLY NEEDED

Contributions and Donations may be sent to the Secretary and Superintendent:—

MR. A. C. EVANS,
Balfour House, 119, Finsbury Pavement, E.C.2.

IMPERIAL CANCER RESEARCH FUND

Patron—**His Most Gracious Majesty the King.**
President.—**His Grace the Duke of Bedford, K.G.**
Chairman of the Executive Committee—
Sir Humphrey Rolleston, Bart., G.C.V.O., K.C.B.
Hon. Treasurers { **Sir George Makins, G.C.M.G., C.B.** / **Sir Percy Sargent, C.M.G.**
Director—**Dr. J. A. Murray, F.R.S.**

THE object of the research is for the good not only of the whole British Empire, but of the whole world. The scope of the work embraces detailed investigation of Cancer as it occurs in the human race and in the vertebrate kingdom. Our recent researches have undoubtedly advanced our knowledge of Cancer, and it is not too much to hope that the further prosecution of the investigations will ultimately yield results of the greatest importance on the nature and treatment of the disease.

DONATIONS & SUBSCRIPTIONS may be sent to the Honorary Treasurer, 8–11, Queen Square, London, W.C. 1, or may be paid to the Westminster Bank, Limited, Marylebone Branch, 1, Stratford Place, London, W., A/c Imperial Cancer Research Fund.

FORM OF BEQUEST

I hereby bequeath the sum of £ to the Treasurer of the Imperial Cancer Research Fund under the direction of the Royal College of Physicians of London and the Royal College of Surgeons of England, 8–11, Queen Square, Bloomsbury, London, W.C. 1, for the purpose of Scientific Research, and I direct that his receipt shall be a good discharge for such legacy.

Hospital Pathological Service

After some 40 years' experience in carrying out routine and special pathological investigations for many hundreds of Hospitals and similar Institutions, a highly efficient Hospital Pathological Service has been developed by

THE CLINICAL RESEARCH ASSOCIATION.

The organised team-work of experts in all branches of Pathology enables the examination of specimens to be carried out at a moderate cost and with the minimum delay consistent with accuracy, whilst the large amount of material received daily by the Association permits of elaborate investigations being performed as ordinary routine work.

The cost of the service will be found to compare favourably with the capital charges, running expenses and salaries for a smaller and less efficient laboratory organisation. All the necessary apparatus for the collection and transmission of specimens is provided.

Any further information as to the working and cost of the scheme will be forwarded on application to:

The Secretary, THE CLINICAL RESEARCH ASSOCIATION, LTD.,
YORK BUILDINGS, ADELPHI, W.C.2

Telegrams: Tubercle, Westrand, London. **Telephone: Temple Bar 8993 (3 lines)**

SPURGEON'S ORPHAN HOMES

Hon. President: Rev. H. TYDEMAN CHILVERS
Hon. Treasurer: ROBERT P. HIGGS, ESQ.

Founded for the benefit of Poor Fatherless Children by
CHARLES HADDON SPURGEON
WHO STATED:

"Children need more than four walls to shelter them: THEY NEED A HOME *where the virtues of a Christian character shall be fostered and developed . . . adapted as far as possible to compensate the loss of parental influence and control."*

Christian and Unsectarian, the most necessitous cases are accepted first, and the family life is maintained, FOR EACH HOUSE IS A HOME.

Nearly 5,000 orphans have already been received, and the ever-present needs and claims are worthy of your support.

Gifts and Donations are gratefully acknowledged by the Secretary,
SPURGEON'S ORPHAN HOMES,
STOCKWELL, LONDON, S.W.9.

Our Annual Report containing a Legal Form of Bequest will gladly be sent on application.

ROYAL SOLDIERS' DAUGHTERS' HOME

65, ROSSLYN HILL, HAMPSTEAD, N.W.3

Founded - 1855

Entirely supported by Voluntary contributions. No grants have ever been received from Public Funds. Girls admitted between 6 and 11 years and trained for domestic service until they are 17, when a situation is guaranteed to them, and they receive a complete outfit.

Vice-President—General The Rt. Hon. Sir NEVILLE LYTTELTON, G.C.B., G.C.V.O.

Vice-President and Chairman—Field-Marshal The Viscount PLUMER, G.C.B., G.C.M.G., G.C.V.O., G.B.E.

Secretary—Major H. S. MARSHALL, D.S.O.

Bankers—LLOYDS BANK LTD., 6 PALL MALL, S.W. 1

UNIVERSITY OF EDINBURGH

Chancellor : Sir JAMES M. BARRIE, Bart., O.M., M.A., LL.D.
Rector : The Right Hon. WINSTON CHURCHILL, M.P., LL.D.
Principal and Vice-Chancellor : Sir T. H. HOLLAND, K.C.S.I., K.C.I.E., LL.D., F.R.S.
Secretary to the University : W. A. FLEMING, M.A., LL.B., Advocate.

The Academic Year begins about the middle of October and ends early in July.

The University embraces **Six Faculties,** viz. : **Arts, Science, Divinity, Law, Medicine and Surgery,** and **Music,** in all of which full instruction is given and Degrees are conferred. There are many different avenues to the **Degree of M.A.** (Honours and Ordinary), the graduation subjects embracing English, History, Modern Languages, Science, etc., besides Ancient Languages, Philosophy, Mathematics, &c. The wide scope of the Arts Curriculum permits of the combination of Arts, Science, Medical, Law, or Special Studies; and it has been shown by successes of Edinburgh students in the Civil Service Examinations that it is possible to combine study for Degrees in Arts, Science or Law with preparation for this and other Special Examinations. In addition to the Ordinary and Honours Degrees in Arts, the Higher Degrees of D.Litt., D.Sc., and Ph.D. are conferred. The Degree of **Bachelor of Education** is conferred on candidates who have attended courses and passed Examinations in Psychology and in Education (Theoretical and Practical). **Diplomas** in **Education,** in **Geography,** in **Actuarial Mathematics,** and in **Social Study,** in **German** and in **Spanish** are granted. The Degree of **Bachelor of Commerce** (B.Com.) is conferred, and Special Courses in Industrial Law and other kindred subjects are provided. Degrees in **Science** (B.Sc. and D.Sc.) may be taken in **Pure Science, Engineering, Agriculture, Veterinary Science, Forestry, Mining,** and in **Technical Chemistry.** There is also a **Diploma in Technical Chemistry.** There are fully equipped Science Laboratories, and other necessary appliances, in all these Departments. The curriculum in **Divinity** affords a thorough training in Theological subjects, and the Degree of **Bachelor of Divinity** (B.D.) is conferred. The **Law** Faculty, besides furnishing the professional equipment necessary for those intending to practise in Scotland, contains Chairs in Jurisprudence and Public International Law, Constitutional Law and Constitutional History, Roman Law, and Political Economy, as also Lectureships in other important branches of Law, and is thus adapted for students preparing for the Civil Service Examinations, and for legal, political, and administrative appointments generally. The Degrees of **Bachelor of Laws** (LL.B.) and **Bachelor of Law** (B.L.) are conferred. The Faculty of **Medicine** has a full curriculum in Medicine and Surgery, and is equipped with very extensive Laboratories, and all other necessary appliances for Practical Teaching. Ample facilities are afforded for Clinical Instruction at the Royal Infirmary, Maternity Hospital, Royal Hospital for Sick Children, Hospital for Infectious Diseases and Royal Edinburgh Hospital for Mental Disorders. Four **Degrees in Medicine and Surgery** are conferred by the University, viz. : **Bachelor of Medicine** (M.B.), **Bachelor of Surgery** (Ch.B.), **Doctor of Medicine** (M.D.), and **Master of Surgery** (Ch.M.) : and these Degrees qualify for practice throughout His Majesty's Dominions, and for admission to the Naval, Military, and other Public Medical Services in the United Kingdom. **A Diploma in Tropical Medicine and Hygiene** (D.T.M. & H.) is conferred on Graduates in Medicine of the University, and specially approved Medical Practitioners who have resided abroad. There are also **Diplomas in Public Health** (D.P.H.), in **Psychiatry** (Dipl. Psych.), in **Radiology** (D.R.), and in **Tropical Veterinary Medicine ;** in **Music** there is a full course of study for graduation, and the Degrees of Mus.B. and Mus.D. are conferred.

The University Staff consists of 56 Professors, about 160 Readers and Lecturers, and over 70 Assistants and Demonstrators. The annual amount available for Fellowships, Scholarships, Bursaries, Prizes, etc., is about £25,000. Facilities are afforded for research in scientific and other subjects.

Women may attend the Classes in all the Faculties, and they are admitted to all the Degrees.

Information regarding Matriculation, the Curricula of Study for Degrees, etc., the Examination for Fellowships, Scholarships, etc., may be obtained from the DEANS OF THE FACULTIES, or from the SECRETARY OF THE UNIVERSITY; and full details are given in the University Calendar, published by MR. JAMES THIN, 55 South Bridge, Edinburgh—price 6s. by post. The Preliminary and Degree Examination papers in each of the Faculties are also published by MR. JAMES THIN, viz.—Preliminary Examinations, 1s.; Arts Bursaries, 6d.; Degree Papers : Arts, 1s.; Science, 1s.; Law and Medicine, 6d. each; Divinity and Music, 3d. each.

January, 1932. By order of the Senatus. W. A. FLEMING, *Secretary to the University.*

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE

FOUNDED BY RAHERE A.D. 1123.

Department of Preliminary Science.

YOUR SYMPATHY

may be conveyed in practical help to the world's needy sufferers by a contribution to the work of

MEDICAL MISSIONS

carried on by the doctors and nurses of the

LONDON MISSIONARY SOCIETY

in the fifty-two hospitals and dispensaries maintained in Asia, Madagascar and Africa.

Last year 404,524 patients were helped in the Name and Spirit of Jesus Christ. £12,000 a year is needed to maintain this work.

The Treasurer of the Society is
J. C. PARSONS, Esq., F.C.A.

Gifts, large or small, may be sent to Rev. NELSON BITTON, Home Secretary, Livingstone House, Broadway, Westminster, S.W.1.

BRITISH AND FOREIGN BIBLE SOCIETY

is a partnership of Christians who belong to many communions but join hands to translate God's Book into every language, and to place the printed copies within all men's reach at prices which the poor can afford to pay.

It has already helped the Gospel to speak in over 650 different tongues.

It provides all our Foreign Missions with editions of the Scriptures in the languages which they need, and it does this practically without expense to the Missions themselves.

Full information from the **Secretaries, 146 Queen Victoria Street, London, E.C. 4.**

Northern Police Orphanage.

HARROGATE, Yorks.
